Recapturing Technology for Education Mark Gura, Bernard Percy, 2005 Despite significant investment of funds, time, and effort in bringing computers, the Internet, and related technologies into our classrooms, educators have turned their back on these new power tools of the intellect. School is the last remaining institution to keep 21st Century technology at arms distance. How can technology be used to enrich and enhance traditional approaches to instruction? How does it move teaching into new territory? What actions need to be taken in order to successfully transform our schools to effective, technology-supported learning environments? Why has this happened and what can be done to reverse it? Recapturing Technology for Education answers these questions. It re-establishes the legitimacy and urgency of tapping technology to make our schools relevant and effective once again. This book explores the reasons why educators have resisted making the leap to a technology-supported brand of teaching and learning, and it will provide an education worthy of 21st Century children. Includes: Interviews and quotes of experts in the field, References, reviews, and recommendations of free resources available to educators. Written for both education professionals and lay persons, it will also be useful to all who are interested in understanding Instructional Technology and unleashing its potential to positively impact.

How We Forgot the Cold War Jon Wiener, 2012-10-15 “Here’s a book that would’ve split the sides of Thucydides. Wiener’s magical mystery tour of Cold War museums is simultaneously hilarious and the best thing ever written on public history and its contestation.” —Mike Davis, author of *City of Quartz* “Jon Wiener, an astute observer of how history is perceived by the general public, shows us how official efforts to shape popular memory of the Cold War have failed. His journey across America to visit exhibits, monuments, and other historical sites, demonstrates how quickly the Cold War has faded from popular consciousness. A fascinating and entertaining book.” —Eric Foner, author of *Reconstruction: America’s Unfinished Revolution, 1863–1877* In *How We Forgot the Cold War*, Jon Wiener shows how conservatives tried—and failed—to commemorate the Cold War as a noble victory over the global forces of tyranny, a ‘good war’ akin to World War II. Displaying splendid skills as a reporter in addition to his discerning eye as a scholar, this historian’s travelogue convincingly shows how the right sought to extend its preferred policy of ‘rollback’ to the arena of public memory. In a country where historical memory has become an obsession, Wiener’s ability to document the ambiguities and absences in these commemorations is an unusual accomplishment.” —Rick Perlstein, author of *Nixonland: The Rise of a President and the Fracturing of America* “In this terrific piece of scholarly journalism, Jon Wiener imaginatively combines scholarship on the Cold War, contemporary

journalism, and his own observations of various sites commemorating the era to describe both what they contain and, just as importantly, what they do not. By interrogating the standard conservative brand of American triumphalism, Wiener offers an interpretation of the Cold War that emphasizes just how unnecessary the conflict was and how deleterious its aftereffects have really been.”—Ellen Schrecker, author of *Many Are The Crimes: McCarthyism in America*

The Flickering Mind Todd Oppenheimer, 2007-12-18 *The Flickering Mind*, by National Magazine Award winner Todd Oppenheimer, is a landmark account of the failure of technology to improve our schools and a call for renewed emphasis on what really works. American education faces an unusual moment of crisis. For decades, our schools have been beaten down by a series of curriculum fads, empty crusades for reform, and stingy funding. Now education and political leaders have offered their biggest and most expensive promise ever—the miracle of computers and the Internet—at a cost of approximately \$70 billion just during the decade of the 1990s. Computer technology has become so prevalent that it is transforming nearly every corner of the academic world, from our efforts to close the gap between rich and poor, to our hopes for school reform, to our basic methods of developing the human imagination. Technology is also recasting the relationships that schools strike with the business community, changing public beliefs about the demands of tomorrow’s working world, and reframing the nation’s systems for researching, testing, and evaluating achievement. All this change has led to a culture of the flickering mind, and a generation teetering between two possible futures. In one, youngsters have a chance to become confident masters of the tools of their day, to better address the problems of tomorrow. Alternatively, they can become victims of commercial novelties and narrow measures of ability, underscored by misplaced faith in standardized testing. At this point, America’s students can’t even make a fair choice. They are an increasingly distracted lot. Their ability

to reason, to listen, to feel empathy, is quite literally flickering. Computers and their attendant technologies did not cause all these problems, but they are quietly accelerating them. In this authoritative and impassioned account of the state of education in America, Todd Oppenheimer shows why it does not have to be this way. Oppenheimer visited dozens of schools nationwide—public and private, urban and rural—to present the compelling tales that frame this book. He consulted with experts, read volumes of studies, and came to strong and persuasive conclusions: that the essentials of learning have been gradually forgotten and that they matter much more than the novelties of technology. He argues that every time we computerize a science class or shut down a music program to pay for new hardware, we lose sight of what our priority should be: “enlightened basics.” Broad in scope and investigative in treatment, *The Flickering Mind* will not only contribute to a vital public conversation about what our schools can and should be—it will define the debate.

Flickering Clusters Cheryl L. Ney, 2001 The essays in this collection discuss the development and implementation of the collaborative Women and Science Project, which aimed to improve

undergraduate science education by increasing faculty expertise in gender and science scholarship and pedagogy, and by providing role models of professional women scientists, improving the classroom climate, and creating science communities. The essays are: (1) Flickering Clusters (Jacqueline Ross); (2) Foundations of Teaching and Faculty Development (Cheryl Ney); (3) Transforming Pedagogy (Laura Stempel with Cheryl Ney and Jacqueline Ross) and How Can We Improve Our Science Teaching? A Case for Cultural Knowledge (Catherine Middlecamp); (4) Transforming Classroom Climate and Changing Course Content (Laura Stempel with Cheryl Ney and Jacqueline Ross) and Shades of Grey: Changing the Content of Science Courses To Include and Encourage the Underrepresented (Caitlyn Allen); (5) Building Collaborative Communities (Laura Stempel with Cheryl Ney and Jacqueline Ross) and A Project Administrator's Perspective (Jacqueline Ross); and (6) Institutionalizing Change (Laura Stempel with Cheryl Ney and Jacqueline Ross), Developing and Implementing a 'Gender issues in Science' Course (Kim Mogen), The Math and Science Program for Minority Students Program (Marc R. Goulet); and Ensuring the Future: Institutionalizing the Values of the Women and Science Program (Michael Zimmerman). An epilogue by Jacqueline Ross discusses the essays and the project. Appendixes contain an Evaluators' Report by Judith Levy and Gloria Rogers and a literature review by Nancy Mortel and Rebecca Armstrong with Phyllis Weisbard and Laura Stempel. (SLD).

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on

the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Estudios acerca de la próxima sociedad Dirk Baecker, 2018 Este examen acerca de la repercusión de los medios electrónicos y digitales, previo a la llegada del smartphone y las redes sociales, se desarrolla a partir de una premisa: la próxima sociedad es la sociedad de los computadores. Aquella sociedad, para Dirk Baecker, difiere dramáticamente de la sociedad de la imprenta de modo semejante a como lo hizo la sociedad de la escritura antigua: si la Antigüedad tuvo que lidiar con un exceso de símbolos y la Modernidad con un exceso de críticas, la próxima sociedad se caracterizará por un exceso de control. Niklas Luhmann ha señalado que una cultura debe

responder a la estructura de un exceso de significado, administrándolo selectivamente para su adaptación, en vista de la penetración de nuevos medios de comunicación, lo que hace de Estudios acerca de la próxima sociedad una interpelación indirecta, una pregunta incómoda para nosotros, por el diagnóstico de nuestra contemporaneidad ante la importancia que tiene actualmente la hipermedialidad y la introducción de dispositivos de comunicación que modelan significativamente las lógicas sociales. Este es un libro imprescindible para todo aquel interesado en aquella incómoda pregunta.

JavaScript на примерах, 2 изд. Климов Александр Петрович, 2009 На примерах рассмотрены методы разработки сценариев на языке JavaScript. Представлены нестандартные приемы работы с объектами и изображениями, примеры работы с датами и системными настройками, создание спецэффектов и др. Уделено внимание разработке шуточных программ и игр. Показано создание интерактивных Web-страниц, получение сведений о системе и браузере, создание расширения для браузеров. Приведены практические советы по работе с JavaScript. Все примеры написаны с учетом особенностей двух популярных браузеров: Internet Explorer и Mozilla Firefox. Во втором издании появились новые и переработаны старые примеры с учетом появления новых ОС и браузеров.

Flickers of Film Jason Sperb, 2015-12-15 Whether paying tribute to silent films in *Hugo* and *The Artist* or celebrating arcade games in *Tron: Legacy* and *Wreck-It-Ralph*, Hollywood suddenly seems to be experiencing a wave of intense nostalgia for outmoded technologies. To what extent is that a sincere lament for modes of artistic production that have nearly vanished in an all-digital era? And to what extent is it simply a cynical marketing ploy, built on the notion that nostalgia has always been one of Hollywood's top-selling products? In *Flickers of Film*, Jason Sperb offers nuanced and

unexpected answers to these questions, examining the benefits of certain types of film nostalgia, while also critiquing how Hollywood's nostalgic representations of old technologies obscure important aspects of their histories. He interprets this affection for the prehistory and infancy of digital technologies in relation to an industry-wide anxiety about how the digital has grown to dominate Hollywood, pushing it into an uncertain creative and economic future. Yet he also suggests that Hollywood's nostalgia for old technologies ignores the professionals who once employed them, as well as the labor opportunities that have been lost through the computerization and outsourcing of film industry jobs. Though it deals with nostalgia, *Flickers of Film* is strikingly cutting-edge, one of the first studies to critically examine Pixar's role in the film industry, cinematic representations of videogames, and the economic effects of participatory culture. As he takes in everything from *Terminator: Salvation* to *The Lego Movie*, Sperb helps us see what's distinct about this recent wave of self-aware nostalgic films—how Hollywood nostalgia today isn't what it used to be.

Flicker Jeffrey M. Zacks, 2015 How is it that a patch of flickering light on a wall can produce experiences that engage our imaginations and can feel totally real? From the vertigo of a skydive to the emotional charge of an unexpected victory or defeat, movies give us some of our most vivid experiences and most lasting memories. They reshape our emotions and worldviews--but why? In *Flicker*, Jeff Zacks delves into the history of cinema and the latest research to explain what happens between your ears when you sit down in the theatre and the lights go out. Some of the questions *Flicker* answers: Why do we flinch when Rocky takes a punch in Sylvester Stallone's movies, duck when the jet careens towards the tower in *Airplane*, and tap our toes to the dance numbers in *Chicago* or *Moulin Rouge*? Why do so many of us cry at the movies? What's the difference between remembering what happened in a movie and what happened in real life--and can we always tell the

difference? To answer these questions and more, Flickr gives us an engaging, fast-paced look at what happens in your head when you watch a movie.

HTML, XHTML, and CSS Rob Huddleston, 2009-04-15 If you've ever been curious about any of the multitude of internet acronyms, the web technologies they represent, and how they can benefit you, this book is a great place to start. This book covers all the necessary topics to get up and running with HTML, XHTML, and CSS while offering readers a guide to modern, standards-based design. Key tasks covered in the book include setting up a Web page, reducing image resolution, creating radio buttons, adding a hit counter, adding an embedded sound, adding content from other sites such as integrating a blog and creating an RSS feed. Large topics are broken into smaller, more approachable sub-topics that are clearly explained on two pages eliminating the back and forth page flipping required in other references. Arranged so that skills build progressively throughout the book coupled with bold page headers it is simple to flip through and easily find any section or topic you are looking for. Understandable with straightforward terms that avoid intimidating and unexplained jargon, this is a book that will benefit complete novices and advanced users alike. While primarily focused on the technologies outlined in the title, this book goes on to provide tips on integrating with Google, Flickr, social bookmark sites and even creating and implementing RSS feeds. Rest assured, each of these technologies is explained with the benefits of each outlined. A serious resource that quickly and concisely gets to the point, this book helps you gain real skills that will have you online in short order. Best of all, you can be confident that you are doing so the right way. **HTML, XHTML, and CSS: Your visual blueprint™** for designing effective Web pages offers visual learners a solid reference that employs straight forward examples to teach you to create and design Web pages with impact. Apply It and Extra sidebars highlight useful tips and high-resolution screen shots clearly illustrate each task

while succinct explanations walk you through the examples. The associated website contains all the needed code to learn HTML.
