Regulating homosexuality in Soviet Russia, 1956–91 Rustam Alexander,2021-05-25 This ground-breaking book challenges the widespread view that sex and homosexuality were unmentionable in the USSR. The Khrushchev and Brezhnev eras (1956–82) have remained obscure and unexplored from this perspective. Drawing on previously undiscovered sources, Alexander fills in

this critical gap. The book reveals that from 1956 to 1991, doctors, educators, jurists and police officers discussed homosexuality. At the heart of discussions were questions which directly affected the lives of homosexual people in the USSR. Was homosexuality a crime, disease or a normal variant of human sexuality? Should lesbianism be criminalised? Could sex education prevent homosexuality? What role did the GULAG and prisons play in homosexuality across the USSR? These discussions often had practical implications – doctors designed and offered medical treatments for homosexuality in hospitals, and procedures and medications were also used in prisons.

Soviet and Post-Soviet Sexualities Richard C.M. Mole, 2019-01-23 Despite Soviet Russia having been one of the first major powers to decriminalise homosexual acts between men, attitudes towards lesbian, gay, bisexual and transgender (LGBT) people in contemporary Russia and the other post-Soviet states have become increasingly hostile, with the introduction of laws restricting their rights and an increase in homophobic violence. This book explores how this situation has come about. It discusses how meanings attached to non-heteronormative sexualities have been constructed for specific socio-political purposes by elites in line with Marxist-Leninist or nationalist thought, explores how attitudes to non-normative sexualities developed historically and examines the current situation in the post-Soviet space, including Russia, Transcaucasia, Central Asia and the Baltic States. The book provides a wealth of detail on this understudied subject and assesses how LGBT subjects are responding to this state of affairs.

The Valuation of Financial Companies Mario Massari, Gianfranco Gianfrate, Laura Zanetti, 2014-01-07 This book presents the main valuation approaches that can be used to value financial institutions. By sketching 1) the different business models of banks (both commercial and investment banks) and insurance companies (life, property and casualty and reinsurance); 2) the structure and peculiarities of financial institutions' reporting and financial statements; and 3) the main features of regulatory capital frameworks for banking and insurance (ie Basel III, Solvency II), the book addresses why such elements make the valuation of financial institutions different from the valuation of non-financial companies. The book then features the valuation

models that can be used to determine the value of banks and insurance companies including the Discounted Cash Flow, Dividend Discount Model, and Residual Income Model (with the appropriate estimation techniques for the cost of capital and cash flow in financial industries). The main techniques to perform the relative valuation of financial institutions are then presented: along the traditional multiples (P/E, P/BV, P/TBV, P/NAV), the multiples based on industry-specific value drivers are discussed (for example, P/Pre Provision Profit, P/Deposits, P/Premiums, P/Number of branches). Further valuation tools such as the "Value Maps" or the "Warranted Equity Method" will be explained and discussed. The closing section of the book will briefly focus on the valuation of specific financial companies/vehicles such as closed-end funds, private equity funds, leasing companies, etc.

Robots in American Popular Culture Steve Carper, 2019-06-12 They are invincible warriors of steel, silky-skinned enticers, stealers of jobs and lovable goofball sidekicks. Legions of robots and androids star in the dream factories of Hollywood and leer on pulp magazine covers, instantly recognizable icons of American popular culture. For two centuries, we have been told tales of encounters with creatures stronger, faster and smarter than ourselves, making us wonder who would win in a battle between machine and human. This book examines society's introduction to robots and androids such as Robby and Rosie, Elektro and Sparko, Data, WALL-E, C-3PO and the Terminator, particularly before and after World War II when the power of

technology exploded. Learn how robots evolved with the times and then eventually caught up with and surpassed them.

Needlework through History Catherine Amoroso Leslie, 2007-04-30 Needlework serves functional purposes, such as providing warmth, but has also communicated individual and social identity, spiritual beliefs, and aesthetic ideals throughout time and geography. Needlework traditions are often associated with rituals and celebrations of life events. Often-overlooked by historians, practicing needlework and creating needlework objects provides insights to the history of everyday life. Needlework techniques traveled with merchants and explorers, creating a legacy of cross-cultural exchange. Some techniques are virtually universal and others are limited to a small geographical area. Settlers brought traditions which were sometimes re-invented as indigenous arts. This volume of approximately 75 entries is a comprehensive resource on techniques and cultural traditions for students, information professionals, and collectors.

Travels in the Land of Hunger Domenico Italo Composto-Hart, 2019-07-26 In the spring of 2004 - after living in Tokyo, Japan for over three years pursuing a career as a freelance musician - science fiction and fantasy author Domenico Italo Composto-Hart set off on a half-year backpacking journey through the lands of East and Southeast Asia, Siberia, Central Russia, the Baltic states, the Nordic countries, and Eastern and Western

Europe. Traveling by foot, bus, train, and boat - and seeing the world through the analytical lens of anthropology, archaeology, and economics - Domenico documents, researches, and deciphers the developing nations he encounters as they rise through the turbulence of unregulated Western capitalism and globalization. *Travels in the Land of Hunger* is the author's reflective account of the dark, long-lasting impact of Western colonialism and imperialism, the Vietnam War, the Khmer Rouge regime, the 1997 Asian financial crisis, and the sex tourism and sex trafficking industries in Southeast and East Asia. It is also a narrative of finding exotic beauty, inspiration, inner strength, and unexpected love.

Bollypolitics Ajay Gehlawat, 2024-03-21 This book provides an in-depth exploration of the evolving landscape of Bollywood cinema in response to recent socio-political changes in India, including a surge in sectarian violence and the ascent of Hindutva, or Hindu nationalism, under Prime Minister Narendra Modi's leadership. Through a comprehensive analysis of prominent filmmakers and actors like Sanjay Leela Bhansali, Kangana Ranaut, Akshay Kumar, and Anupam Kher, Ajay Gehlawat investigates the extent to which their recent works align with key tenets of the Hindutva movement. He scrutinizes the growing influence of the Bharatiya Janata Party (BJP) on film production, manifesting in collaborations covering diverse themes, from Modi's Clean India initiative to the nation's space exploration endeavors and grand historical epics such as *Padmaavat* (2018) and *Manikarnika* (2019) that

seek to reshape Indian history in line with Hindutva ideology. Gehlawat goes on to dissect smaller budget films like Article 15 (2019) and Shubh Mangal Zyada Saavdhan (2020), which tackle pressing social issues like caste-based violence and homophobia exacerbated by the surge in right-wing extremism in India. In doing so, he elucidates the profound and far-reaching impact of Hindutva ideology on Indian cinematic narratives and aesthetics, while also considering the broader implications for Indian society as a whole.
