Classification and Clustering for Knowledge Discovery

Saman K. Halgamuge, Lipo Wang, 2005-09-02 Knowledge Discovery today is a significant study and research area. In finding answers to many research questions in this area, the ultimate hope is that knowledge can be extracted from various forms of data around us. This book covers recent advances in unsupervised and supervised data analysis methods in Computational Intelligence for knowledge discovery. In its first part the book provides a collection of recent research on distributed clustering, self organizing maps and their recent extensions. If labeled data or data with known associations are available, we may be able to use supervised data analysis methods, such as classifying neural networks, fuzzy rule-based classifiers, and decision trees. Therefore this book presents a collection of important methods of supervised data analysis. Classification and Clustering for Knowledge Discovery also includes variety of applications of knowledge discovery in health, safety, commerce, mechatronics, sensor networks, and telecommunications.

OCUP 2 Certification Guide Michael Jesse

Chonoles,2017-08-24 OCUP 2 Certification Guide: Preparing for the OMG Certified UML 2.5 Professional 2 Foundation Exam both teaches UML® 2.5 and prepares candidates to become certified. UML® (Unified Modeling Language) is the most popular graphical language used by software analysts, designers, and developers to model, visualize, communicate, test, and document systems under development. UML® 2.5 has recently been released, and with it a new certification program for practitioners to enhance their current or future career opportunities. There are three exam levels: Foundation, Intermediate, and Advanced. The exam covered in this book, Foundation, is a prerequisite for the higher levels. Author Michael Jesse Chonoles is a lead participant in the current OCUP 2 program—not only in writing and reviewing all the questions, but also in designing the goals of the program. This book distills his experience in modeling, mentoring, and training. Because UML® is a sophisticated language, with 13 diagram types, capable of modeling any type of modern software system, it takes users some time to become proficient. This effective resource will explain the material in the Foundation exam and includes many practice questions for the candidate, including sample problems similar to those found in the exam, and detailed explanations of why correct answers are correct and why wrong answers are wrong. Written to prepare candidates for the OCUP 2 Foundation level exam while they learn UML® Illustrated with UML® diagrams to clarify every concept and technique Offers hints for studying and test-taking based on the specific nature and structure of the Foundation Level

exam Includes practice exam material, sample questions and exercises, warnings, tips, and points to remember throughout

Developing and Implementing Web Applications with Visual Basic .NET and Visual Studio .NET Mike

Gunderloy,2003 This certification exam measures the ability to develop and implement Web-based applications with Web forms, ASP.NET, and the Microsoft .NET Framework. This exam counts as an core credit toward the new MCAD (Microsoft Certified Application Developer) certification as well as a core credit toward the existing MCS.D .NET certification. This book is not intended to teach new material. Instead it assumes that you have a solid foundation of knowledge but can use a refresher on important concepts as well as a guide to exam topics and objectives. This book focuses exactly on what you need to pass the exam - it features test-taking strategies, time-saving study tips, and a special Cram Sheet that includes tips, acronyms, and memory joggers not available anywhere else. The series is supported online at several Web sites: examcram.com, informit.com, and cramsession.com. The accompanying CD features PrepLogic(tm) Practice Tests, Preview Edition. This product includes one complete PrepLogic Practice Test with approximately the same number of questions found on the actual vendor exam. Each question contains full, detailed explanations of the correct and incorrect answers. The engine offers two study modes, Practice Test and Flash Review, full exam customization, and a detailed score report.

A Companion to Mill Christopher Macleod,Dale E. Miller,2018-04-12 This Companion offers a state-of-the-art survey of the work of John Stuart Mill — one which covers the historical influences on Mill, his theoretical, moral and

social philosophy, as well as his relation to contemporary movements. Its contributors include both senior scholars with established expertise in Mill's thought and new emerging interpreters. Each essay acts as a go-to resource for those seeking to understand an aspect of Mill's thought or to familiarise themselves with the contours of a debate within the scholarship. The Companion is a key reference on Mill's theory of liberty and utilitarianism, but also provides a valuable resource on lesser-known aspects of his work, including his epistemology, metaphysics, and philosophy of language. The volume is divided into six sections. Part I covers Mill's life, his immediate posthumous reputation, and his own telling of his life-story. Part II brings together an accessible and comprehensive summary of the various influences on Mill's thought. Part III offers an account of the foundations of Mill's philosophy and his thought on key philosophic topics. Parts IV and V tackle issues from Mill's moral and social philosophy. Part VI concludes with a treatment of the broader aspects of Mill's thought, tracing his relation to major movements in philosophy.

Conspiracies Andy Thomas, 2019-12-10 At any time in our history, you will find significant and seemingly indisputable events occurring, the kind that can change the course of our lives -- the assassination of President John F. Kennedy, the terrorist attacks of 9/11. Yet for every one of them, somebody, somewhere will loudly dispute the 'official' account, doubting that the truth has been told. In today's environment, with trust in authorities at an all-time low, conspiracy theories have found a new currency, and websites and social networking ensure they receive a wider and more rapid spread than ever before. But how do we separate truth from imagination? Was Princess Diana murdered, as many people think, despite all the official denials? Did NASA really go to the Moon, when anomalies in the photographic record suggest otherwise? Could 9/11 really have been set up by agencies within the USA itself? The Kindle edition includes an update on all the conspiracy theories that have emerged in the wake of the Coronavirus pandemic. The author opens the conspiracy casebook by examining the mindset of those who believe in conspiracies, and considers whether the dismissive attitude towards them has been fair. Part Two looks into history to establish that conspiracies do occur, credibility should therefore be given to belief in some of the alleged plots and cover-ups of today. This leads into a well-argued examination of some of the most popular conspiracies of our times, including theories over assassinations, UFO cover-ups, and widely voiced concerns over 9/11 and the 'New World Order'. Part Three draws the conclusion that while not all conspiracy theories can be proven, they do at least draw attention to paths not to take, and can be valuable in helping to create a better world where new trust and hope can be forged. Are we living in a world of control, of oppression, of habitual deception? Is this really how things are, or simply human

nature massively distorted through a dark lens? The truth probably lies somewhere in the middle.

So Long Constipation, Part 1 Katarina Nolte, 2013-05-26
In *So Long Constipation, Part 1* you will learn how to eliminate your constipation by learning what causes it and how this comes about. You will learn about the relationship between our daily environment and the gut. You will discover, in simple detail, how things like stress, industrial toxins and our modern diet and lifestyle influence the delicate balance of our mind-body system. You will familiarize yourself with the main aspects of this delicate balance in relation to gut function.

Mobile Technology Consumption: Opportunities and Challenges Ciaramitaro, Barbara L., 2011-10-31 Whether used for communication, entertainment, socio-economic growth, crowd-sourcing social and political events, monitoring vital signs in patients, helping to drive vehicles, or delivering education, mobile technology has been transformed from a mode to a medium. *Mobile Technology Consumption: Opportunities and Challenges* explores

essential questions related to the cost, benefit, individual and social impact, and security risks associated with the rapid consumption of mobile technology. This book presents the current state of mobile technologies and their use in various domains including education, healthcare, government, entertainment, and emerging economic sectors.

Expanding the Donor Base in Higher Education Noah D. Drezner, 2013-04-17 Winner of the Association of Fundraising Professionals 2014 Skystone Partners Research Prize in Philanthropy and Fundraising Traditionally, institutions have relied on wealthy White men to reach their fundraising goals. But as state investment in public higher education lessens and institutions look to philanthropy to move from excellence to eminence, advancement officers continually need to engage all populations, including many that have historically been excluded from fundraising strategies. Based on theory, research, and past practice, *Expanding the Donor Base in Higher Education* explores how colleges and universities can build culturally sensitive fundraising and engagement strategies. This edited book presents emerging research on different communities that have not traditionally been approached for fundraising—including Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) alumni, African Americans, Latinos, graduate students, young alumni, women, and faculty donors. Chapters discuss and analyze successful programs and provide practical suggestions and strategies to create and implement fundraising programs that engage these new donor populations. *Expanding the Donor Base in Higher Education* is an essential resource for any institution looking to expand their pool of donors and cultivate a more philanthropic mindset among alumni and students.

Duty of Care in the Human Services Rosemary

Kennedy,2009-11-12 The human services are established to support the most vulnerable and marginalised people in our society. Yet media and other reports frequently highlight a disturbing picture of industry failures, malpractice and abuse. This book addresses the response of legal and quasi-legal bodies to human service failures. It outlines those areas of law which are most likely to be activated by human service shortcomings, and those aspects of direct human service delivery which are most likely to attract legal attention. Essential reading for those studying or working in human services and social work, this book is designed to alert people to the legal risks arising as a result of inadequate human service delivery.

Photography, Cinema, Memory Damian Sutton,2009 This is a philosophical investigation into the differing sensations of time in cinema and photography. Throughout the work, Sutton connects and grounds cinema and photography as starting points to comprehend how we come to terms, ultimately, with time itself as pure, immanent change.

Gujarat Under Modi Christophe Jaffrelot, 2024-03-01

state of the Indian Union, his stewardship as Chief Minister of Gujarat being the longest in that state's history. Modi and his BJP supporters explained his achievement by pointing to economic growth under his leadership, yet detractors point out that Modi has been more business-friendly than market-friendly--to the benefit of large industrial corporations, and at the cost of great social polarization. In 2002, an anti-Muslim pogrom of unparalleled ferocity occurred in Gujarat, leading to the biggest number of Muslim deaths since Partition. The state's Hindu majority immediately rallied around Modi. No serious riot has occurred in Gujarat since,

but polarization was key to Modi's strategy there, and he has deployed that strategy again and again since he became Prime Minister of India in 2014. For Modi has cultivated a communal image. A marketing genius, his messaging combines the politics of Hindutva with economic modernization, to the clear appreciation of Gujarat's middle class. Christophe Jaffrelot's revealing book shows how Modi's Gujarat served as the laboratory of Modi's India, not only in terms of Hindu majoritarianism and national populism, but also of caste and class politics.

Calculating compassion Rebecca Gill, 2016-05-16

Calculating compassion examines the origins of British relief work in late-nineteenth-century wars on the continent and the fringes of Empire. Commencing with the Franco-Prussian war of 1870–71, it follows distinguished surgeons and ‘lady amateurs’ as they distributed aid to wounded soldiers and distressed civilians, often in the face of considerable suspicion. Dispensing with the notion of shared ‘humanitarian’ ideals, it examines the complex, and sometimes controversial, origins of organised relief, and illuminates the emergence of practices and protocols still recognisable in the delivery of overseas aid. This book is intended for students, academics and relief practitioners interested in the historical concerns of first generation relief agencies such as the British Red Cross Society and the Save the Children Fund, and their legacies today.

A History of Birdwatching in 100 Objects David Callahan, 2014-08-14 This book looks at 100 items that have profoundly shaped how people watched, studied and engaged with the avian world. Each item contains around 500 words on a double-page spread and include an illustration of the object in question. The book includes the objects listed below as well as many more. The range of items is international and cross-cultural. Subjects include:

*An Egyptian 'field guide' (early tomb decorations of birds, identifiable as species) *Ornithologiae libri tres: the first British bird guide (a 1676 publication that attempted to itemise all British birds known at the time) *The Dodo specimen held at the Horniman museum *Systema Naturae by Carl Linnaeus (the first-ever system of scientific names in 1758, and still the international standard today) *The shotgun *The book, The Natural History and Antiquities of Selborne by Gilbert White (1789) *HMS Beagle (the ship on which Darwin made his ground-breaking discoveries) *Aluminium bird rings (used to record movement and longevity of individuals and species) Along with many more modern innovations including walkie talkies, pagers, radio tags and apps.
