Radical Gardening George McKay, 2013-08-22 War is the natural occupation of man . war-and gardening. Winston Churchill to Siegfried Sassoon, 1918 In the common public perception, contemporary gardening is understood as suburban, as leisure activity, as television makeover opportunity. Its origins are seen as religious or spiritual (Garden of Eden), military (the clipped lawn, the

ha-ha and defensive ditches), aristocratic or monarchical (the stately home, the Royal Horticultural Society). Radical Gardening travels an alternative route, through history and across landscape, linking propagation with propaganda. For everyday garden life is not only patio, barbecue, white picket fence, topiary, herbaceous border.. From window box to veggie box, from political plot to flower power, this book uncovers and celebrates moments, movements, gestures, of a people's approach to gardens and gardening. It weaves together garden history with the counterculture, stories of individual plants with discussion of government policy, the social history of campaign groups with the pleasure and dirt of hands in the earth, as well as original interviews alongside media, pop and art references, to offer an informing and inspiring new take on an old subject.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle

Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Marketing Food to Children and Adolescents Nicoletta A. Wilks, 2009 This book explores the concern about the dramatic increase in childhood obesity in the United States which has prompted Congress to request that the Federal Trade Commission conduct a study of food and beverage marketing to children and adolescents. The results of that study - an analysis of 2006 expenditures and activities by 44 companies - are presented here. Included are not only the traditional measured media - television, radio, and print, but also activities on the Internet and other new electronic media, as well as previously unmeasured forms of marketing to young people, such as packaging, in-store advertising, event sponsorship, and promotions that take place in schools. Integrated advertising campaigns that combine several of these techniques and often involve cross-promotions - linking a food or beverage to a licensed character, a new movie, or a popular television program, dominate today's landscape of advertising to youth. The data presented in this book tell the story of food and beverage marketing in a year just preceding, or early in the development of, industry self-regulatory activities designed to reduce or change the profile of such marketing to children. Furthermore, this book, which compiles information not previously assembled or available to the research community, may serve as a benchmark for measuring future progress with respect to these initiatives.

Handbook of Translation Studies Yves Gambier, Luc van Doorslaer, 2010-10-28 As a meaningful manifestation of how institutionalized the discipline has become, the new Handbook of Translation Studies is most welcome. The HTS aims at disseminating knowledge about translation and interpreting to a relatively broad audience: not only students who often adamantly prefer user-friendliness, researchers and lecturers in Translation Studies, Translation & Interpreting professionals; but also scholars, experts and professionals from other disciplines (among which linguistics, sociology, history, psychology). Moreover, the HTS is the first handbook with this scope in Translation Studies that has both a print edition and an online version. The HTS is variously searchable: by article, by author, by subject. Another benefit is the interconnection with the selection and organization principles of the online Translation Studies Bibliography (TSB). Many items in the reference lists are hyperlinked to the TSB, where the user can find an abstract of a publication. All articles are written by specialists in the different subfields and are peer-reviewed

Monte Carlo Modeling for Electron Microscopy and Microanalysis David C. Joy, 1995-04-13 This book describes for the first time how Monte Carlo modeling methods can be applied to electron microscopy and microanalysis. Computer programs for two basic types of Monte Carlo simulation are developed from physical models of the electron scattering process--a single scattering program capable of high accuracy but requiring long computation times, and a plural scattering program which is less accurate but much more rapid. Optimized for use on personal computers, the programs provide a real time graphical display of the interaction. The programs are then used as the starting point for the development of programs aimed at studying particular effects in the electron microscope, including backscattering, secondary electron production, EBIC and cathodo-luminescence imaging, and X-ray microanalysis. The computer code is given in a fully annotated format so that it may be readily modified for specific problems. Throughout, the author includes numerous examples of how such applications can be used. Students and professionals using electron microscopes will want to read this important addition to the literature.
