The Uneven Offshore World Justin Robertson,Michael Tyrala,2022-03-24 Informed by world-systems analysis, this book examines the shifting patterns of accommodation and resistance to the offshore world, with a particular focus on Mauritius as a critical but underappreciated offshore node mediating foreign investment into India and Africa. Drawing on a large pool of financial data and elite interviews, the authors present the first detailed comparative study of the Mauritius-India and Mauritius-Africa offshore relationships. These relationships serve as indicative test cases of the contemporary global tax reform agenda and its promise to rein in offshore finance. Whereas India's economic power and multilateral track record have enabled it to actively shape this agenda and implement it in a robust manner, most African countries have found themselves either unable to meet its stringent criteria or unwilling to do so out of fear that it might discourage investment. Its impact on offshore financial centers has likewise been limited. A few of the least sophisticated ones appear to have fallen by the wayside, but the rest have either remained largely unaffected, or, like Mauritius, succeeded in consolidating their operations and surviving the current round of regulatory headwinds. The findings suggest that the contemporary global tax reform agenda has thus far not only failed to make good on its promise but also actually reinforced numerous existing power hierarchies. The Uneven Offshore World is written in an accessible style and aimed at readers without specialized knowledge of tax issues.

How to Read Texts Neil McCaw,2013-09-26 Now in its second edition, *How to Read Texts* introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills. Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: – Debates around critical theory – The role of history and context – The links between creativity and criticism – The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, *How to Read Texts* is an indispensable guide for students making the transition to university study.

Tax, Inequality, and Human Rights Philip G. Alston,Nikki R. Reisch,2019-04-11 For the first time, *Human Rights and Tax in an Unequal World* brings together works by human rights and tax law experts, to illustrate the linkages between the two fields and to reveal their mutual relevance in tackling economic, social, and political inequalities. Against the backdrop of systemic corporate tax avoidance, the widespread use of tax havens, persistent pressures to embrace austerity policies, and growing gaps between the rich and poor, this book encourages readers to understand fiscal policy as human rights policy, with profound consequences for the wellbeing of citizens around the world. The essays collected examine where the foundational principles of tax law and human rights law intersect and diverge; discuss the cross-border nature and human rights impacts of abusive practices like tax avoidance and evasion; question the role of states in bringing transparency and accountability to tax policies and practices; highlight the responsibility of private sector actors for the consequences of tax laws; and critically evaluate certain domestic tax rules through the lens of equality and non-discrimination. The contributing scholars and practitioners explore how an international human rights framework can anchor debates around international tax reform and domestic fiscal consolidation in existing state obligations. They address what human rights law requires of state tax policies, and what a state's tax laws and loopholes mean for the enjoyment of human rights within and outside its borders. Ultimately, tax and human rights both turn on the relationship between the individual and the state, and thus both fields face crises as the social contract frays and populist, illiberal regimes are on the rise.

A Global Analysis of Tax Treaty Disputes Eduardo Baistrocchi,2017-08-17 This two-volume set offers an in-depth analysis of the leading tax treaty disputes in the G20 and beyond within the first century of international tax law. Including country-by-country and thematic analyses, the study is structured around a novel global taxonomy of tax treaty disputes and includes an unprecedented dataset with over 1500 leading tax treaty cases. By adopting a contextual approach the local expertise of the contributors allows for a thorough and transparent analysis. This set is an important reference tool for anyone implementing or studying international tax regulations and will facilitate the work of courts, tax administrations and practitioners around the world. It is designed to complement model conventions such as the OECD Model Tax Convention on Income and on Capital. Together with *Resolving Transfer Pricing Disputes* (2012), it is a comprehensive addition to current debate on the international tax law regime.

Development of the Constitutions in China and the Visegrad States Lu Da,2021-08-30 This book deals with the development of constitutional law in China and Visegrad states by employing a comparative perspective. It is the first time that the researcher compared the constitutional development in the China and the Visegrad states. It offers a few glimpses of development of constitution in the (former) socialist states to readers who are interested in the constitutional law or China-V4 relations. With the increased cooperation between China and V4 countries, this book gives the undergraduates in the university to think about the BRI and 17+1 network from a Chinese perspective. Last, compared to the previous works which mainly focus on North America and/or Western Europe, this book provides a new angle on comparative constitutional law.

Identity Politics Inside Out Lisel Hintz, 2018-08-28 The trajectory of Turkey's Justice and Development Party (AKP) rule offers an ideal empirical window into puzzling shifts in Turkey's domestic politics and foreign policy. The policy transformations under its leader Recep Tayyip Erdogan do not align with existing explanations based on security, economics, institutions, or identity. In *Identity Politics Inside Out*, Lisel Hintz teases out the complex link between identity politics and foreign policy using an in-depth study of Turkey. Rather than treating national identity as cause or consequence of a state's foreign policy, she repositions foreign policy as an arena in which contestation among competing proposals for national identity takes place. Drawing from a broad array of sources in popular culture, social media, interviews, surveys, and archives, she identifies competing visions of Turkish identity and theorizes when and how internal identity politics becomes externalized. Hintz examines the establishment of Republican Nationalism in the wake of imperial collapse and examines failed attempts made by those challenging its Western-oriented, anti-ethnic, secularist values with alternative understandings of Turkishness. She further demonstrates how the Ottoman Islamist AKP used the European Union accession process to weaken Republican Nationalist obstacles in Turkey, thereby opening up space for Islam in the domestic sphere and a foreign policy targeted at achieving leadership in the Middle East. By showing how the inside out spillover of national identity debates can reshape foreign policy, *Identity Politics Inside Out* fills a major gap in existing scholarship by closing the identity-foreign policy circle.

Multilateral Cooperation in Tax Law Martin Klokar, Katharina Moldaschl, 2023-10-03 An in-depth analysis of various aspects of multilateral cooperation in tax law Tax evasion and aggressive tax planning causing base erosion and profit shifting (BEPS) has been a widely discussed topic among academics and tax policy makers over the past decades. Increasing globalization and digitalization have contributed to the intensification of this issue in recent years. At the same time, states continue to largely insist on their sovereignty in the area of tax law. However, due to their cross-border nature, issues related to BEPS are shared problems among the states and can typically not be solved by a single nation. Therefore, multilateral cooperation represents an option to build a bridge between the states' demand for sovereignty and the problems caused by BEPS. In this regard, the OECD, the UN, and the EU play an important role in introducing international tax standards in an attempt to effectively address tax evasion and aggressive tax planning in many ways. The interaction and cooperation between different international, supranational (EU), and regional organizations is an ongoing process. In this context, the topic Multilateral Cooperation in Tax Law was selected as the general topic for the master's theses of the part-time 2021-23 class of the postgraduate LL.M. programme in International Tax Law at WU (Vienna University of Economics and Business). This volume aims to develop academic insights, provide practical guidance, and enable an in-depth analysis of various aspects of this topic. The book is divided into four parts. The first

part deals with a general overview of the understanding of multilateral cooperation, the background that led to the need for multilateral cooperation and the different stakeholders that play a relevant role in it. While the chapters included in the second part focus on the most important developments on an international level (OECD and UN), the chapters encompassed in the third part analyse the multilateral cooperation initiatives of the EU. Finally, the chapters included in part four deal with selected issues related to multilateral cooperation in tax law, including mutual assistance and exchange of information, dispute resolution mechanisms, and measures in digitalized businesses.

Crash Course in Library Services to People with Disabilities Ann Roberts,Richard J. Smith,2010-03-23 This book helps libraries identify and implement new ways to serve their physically or mentally disabled patients. Authors Ann Roberts and Dr. Richard Smith work at the state level with persons with disabilities. They find that very few librarians feel comfortable with providing services addressed to the needs of the disabled, yet those who do offer services and programs other libraries can adopt and adapt. Crash Course in Library Services to People with Disabilities will help librarians get up to speed in understanding disabled persons and what they can do to make library premises and holdings more accessible to them. It provides basic information on the different types of mental and physical disabilities a librarian might encounter, then offers a range of exemplary policies, services, and programs for people with disabilities—efforts that are in place and working across the country.

Electronic Publishing for Physics and Astronomy Andre Heck,2012-12-06 The ship has left the Miraflores Locks, let loose from the 'mules' run by the crews of the Panama Canal Commission. She has picked up speed while passing under the Bridge of the Americas which links de facto the Northern and Southern parts of the continent, and has headed resolutely towards the Pacific Ocean waters along the rows of boats of all kinds waiting to cross the Canal in the other direction. Through a layer of tropical clouds, the setting Sun is bleakly illuminating the tall white highrises of Panama City on the port side. It took a full day to cautiously move through the whole system of locks and cuts. Back in the stateroom, I open again a working copy of this book and type down this foreword on the pocket computer. The last chapter was received the day before while speeding through the Caribbean Sea and my main work as Editor is now over. It has been a real pleasure and a great honour to be given the opportunity of compiling this book and interacting with the various contributors through the latest technologies while being sometimes in geographically very different places. The quality of the authors, the scope of experiences they cover, the messages they convey make of this book a unique and timely publication. The reader will certainly enjoy as much as I did going through such a variety of well-inspired chapters fromso many different horizons.

Deception Adrian Levy,Catherine Scott-Clark,2010-08-10 The shocking, three-decade story of A. Q. Khan and Pakistan's nuclear program, and the complicity of the United States in the spread of nuclear weaponry. On December 15, 1975, A. Q. Khan—a young Pakistani scientist working in Holland—stole top-secret blueprints for a revolutionary new process to arm a nuclear bomb. His original intention, and that of his government, was purely patriotic—to provide Pakistan a counter to India's recently unveiled nuclear device. However, as Adrian Levy and Catherine Scott-Clark chillingly relate in their masterful investigation of Khan's career over the past thirty years, over time that limited ambition mushroomed into the world's largest clandestine network engaged in selling nuclear secrets—a mercenary and illicit program managed by the Pakistani military and made possible, in large part, by aid money from the United States, Saudi Arabia, and Libya, and by indiscriminate assistance from China. Based on hundreds of interviews in the United States, Pakistan, India, Israel, Europe, and Southeast Asia, Deception is a masterwork of reportage and dramatic storytelling by two of the world's most resourceful investigative journalists. Urgently important, it should stimulate debate and command a reexamination of our national priorities.
