GPS and Google Earth for Development: How to Create, Share and Collaborate with Maps on the Net Santiago Arnalich,Julio Urruela,2012-09 This book shows you how to use a GPS and Google Earth to create simple and expressive maps to share on the web like the one shown on the cover. With a reading time of a mere 10 hours you will learn to work with a GPS without making mistakes, to use it with Google Earth including in areas without internet access and to quickly create diverse interactive maps that other people can see and modify over the internet without the need for experts or unnecessary complications. Even though it has been written in the context of Relief and Development work, the same process is valid for whatever other application.

Communication Matters Jeremy Packer,Stephen B. Crofts Wiley,2013-06-17 Communication has often been understood as a realm of immaterial, insubstantial phenomena—images, messages, thoughts, languages, cultures, and ideologies—mediating our embodied experience of the concrete world. Communication Matters challenges this view, assembling leading scholars in the fields of Communication, Rhetoric, and English to focus on the materiality of communication. Building on the work of materialist theorists such as Gilles Deleuze, Michel Foucault, Friedrich Kittler, and Henri Lefebvre, the essays collected here examine the materiality of discourse itself and the constitutive force of communication in the production of the real. Communication Matters presents original work that rethinks communication as material and situates materialist approaches to communication within the broader materiality turn emerging in the humanities and social sciences. This collection will be of interest to researchers and postgraduate students in Media, Communication Studies, and Rhetoric. The book includes images of the digital media installations of Francesca Talenti, Professor, Department of Communication Studies, University of North Carolina at Chapel Hill.

Enhancing Cooperation in Defence Against Terrorism IOS Press,2012-09-14 Terrorism continues to evolve; altered sources of funding, changes in national governments and the ever increasing importance of the internet mean that international cooperation in the development and implementation of strategies to counteract terrorist activity remain an important priority worldwide. This book contains articles arising from the presentations by eleven experts from five countries, delivered at the NATO Centre of Excellence – Defence against Terrorism (COE-DAT) advanced training course (ATC) entitled Enhancing Cooperation in Defence against Terrorism, held in Astana, Kazakhstan, in September 2010. The aim of this ATC was to stimulate discussion and facilitate interoperability between these five countries and NATO in the fight against terrorism.The book opens with an overview of the landscape in which terrorism currently exists, and a reminder that a new approach is needed in the fight against terrorism to replace the Cold War model we have become accustomed to. The remaining articles cover a wide range of issues: countering the ideology of terrorism; legal aspects of combating terrorism and responding to terrorist use of the internet; the links between terrorism and organised crime; energy security; weapons of mass destruction; international humanitarian law; suicide terrorism; the role of the media in terrorism and counterterrorism; and dilemmas in counterterrorism strategy. In addition to the presentations from the ATC, the book includes two articles by Brigitte Nacos of Columbia University: The Importance of Strategic Communication and Public Diplomacy in Combating Terrorism, and Terrorism Media and Censorship.

Understanding Cybercrime International Telecommunication Union,2017-07-11 Cyber attacks are on the rise. The media constantly report about data breaches and increasingly sophisticated cybercrime. Even governments are affected. At the same time, it is obvious that technology alone cannot solve the problem. What can countries do? Which issues can be addressed by policies and legislation? How to draft a good law? The report assists countries in understanding what cybercrime is about, what the challenges are in fighting such crime and supports them in drafting policies and laws.

Advances in Water Resources & Hydraulic Engineering Changkuan Zhang,Hongwu Tang,2010-07-28 Advances in Water Resources and Hydraulic Engineering - Proceedings of 16th IAHR-APD Congress and 3rd Symposium of IAHR-ISHS discusses some serious problems of sustainable development of human society related to water resources, disaster caused by flooding or draught, environment and ecology, and introduces latest research in river engineering and fluvial processes, estuarine and coastal hydraulics, hydraulic structures and hydropower hydraulics, etc. The proceedings covers new research achievements in the Asian-Pacific region in water resources, environmental ecology, river and coastal engineering, which are especially important for developing countries all over the world. This proceedings serves as a reference for researchers in the field of water resources, water quality, water pollution and water ecology. Changkuan Zhang and Hongwu Tang both are professors at Hohai University, China.

Countering Terrorist Financing Mark Pieth,Daniel Thelesklaf,Radha Ivory,2009 Terrorists need money to commit acts of violence and sustain their operations. Measures to combat terrorism therefore aim to prevent terrorists from raising, moving and using funds or other assets. The effectiveness - and the fairness - of these measures were considered at the second 'Giessbach' seminar on counter-terrorist financing (CTF) organised by the Basel Institute on Governance in October 2008. This book contains essays presented at the seminar written by practitioners and academics with extensive experience in the field of CTF. The authors offer a diversity of views on the domestic, regional and international initiatives aimed at detecting terrorist funds in the financial system, preventing terrorists from moving their money via alternative financial channels and facilitating the recovery of terrorist assets. The editors conclude with in-sights into the ongoing challenge of making CTF measures both effective and legally sustainable in the lead-up to Giessbach III in December 2009.

Freedom from Fear, Issue No.7 United Nations Interregional Crime and Justice Research Institute,2010-07-18 This journal aims to contribute to the advancement of

knowledge and awareness of the international community's priority issues in the field of justice, crime prevention and human rights. The Magazine pursues the promotion of innovative dialogue by spreading awareness, creating consensus and a sense of shared responsibility of the problems that affect the global community. As a forum for long-term change, the Magazine endeavors to promote democratic values, civil stability, and aid the international community in developing actions towards greater peace, justice and security for all members of social, civil and political society.

Are You Being Told What to Believe? Ruth Beebe,2010-08 The past fifty years has seen a steady progression from Christianity through various alternate systems of belief, including the theory of evolution, UFOs, aliens, paganism, witchcraft, and belief in the presence of gods and goddesses. TV, movies, books, and even our educational system all seem determined to gain control of our thoughts and beliefs. Are you being told what to think? Are you being told what to believe? How important are our beliefs? Most of us don't really give a lot of thought to how our beliefs impact the world around us, or to what our beliefs really mean to us. Are You Being Told What to Believe? examines popular beliefs and demonstrates not only how all of these things are connected, but how your beliefs are being controlled. You must take charge of your mind, your thoughts, and your beliefs; if you don't, someone else will! Belief sets are almost as unique as the individual. So how important is this? Does it really matter what we believe? And could there be a greater effort underway to control your mind and thoughts? You decide!

Hacking Planet Earth Thomas M. Kostigen,2020-03-24 An exploration of the cutting-edge technology that will enable us to confront the realities of climate change. For decades scientists and environmentalists have sounded the alarm about the effects of global warming. We are now past the tipping point. As floods, storms, and extreme temperatures become our daily reality, Reduce, Reuse, Recycle efforts aren't enough anymore. In Hacking Planet Earth, New York Times bestselling author Thomas Kostigen takes readers to the frontlines of geoengineering projects that scientists, entrepreneurs, engineers, and other visionaries around the world are developing to solve the problems associated with climate change. From giant parasols hovering above the Earth to shield us from an unforgiving sun, to lasers shooting up into clouds to coax out much-needed water, Kostigen introduces readers to this inspiring work and the people who are spearheading it. These futurist, far- thinking, world-changing ideas will save us, and Hacking Planet Earth offers readers their new vision for the future.

Earth and the Moon Terry Allan Hicks,2010 With its age-appropriate text, helpful charts, colorful design, and vivid illustrations and photography, this series is perfect for students working on reports and projects or for the budding astronomer fascinated by what exists beyond our planet.

A Trip to the Center of the Earth Janey Levy,2014-12-15 If we could take a trip to the center of the Earth, what would we find? In this amazing book readers can do just that with the help of a special ship that can handle the extreme heat and pressure deep beneath Earth's crust. Digging through a few miles of the crust is just the start of the nearly 4,000-mile journey to Earth's core. Readers might be surprised to find that not all of the trip is through solid rock, as the intense heat does strange and amazing things to the material that makes up our planet.

End Time Rewind: An Exploration In Bible Prophecy And The Fate Of The World Steven Sabatino, Remember when End Time Rewind warned you not to fall for the Doomsday-Rapture theories of Dispensational Premillennialism and their Zionist partners? Well, now that we've survived John Hagee's Four Blood Moons, Jonathan Cahn's Super Shemitah, and the menacing tentacles of the now defunct European Union and Islamic State (the supposed Beast Kingdoms of Revelation 17), the Futurist's next false claim centers around the 70-year anniversary of Israel's founding. Is the Jewish State really the prophetic clock by which God aligns world events and the return of Christ? Many Doomsday-Rapture forecasts have been put forth in the name of Futurism since the 2nd-century AD, none of which have come to fruition. This is disconcerting, because failed predictions and false expectations promoted by our Christian counterparts diminishes the credibility of the Bible and scars the reputation and integrity of the Prophetic Office of Jesus Christ. The age-old, tried-and-true Orthodox (aka Partial or Classical) Preterist approach maintains that the majority of Bible prophecies were already fulfilled by the end of the first century AD, and included Jesus' appearing in an Old Testament-styled, non-physical manifestation with power and great glory. All that remains to be accomplished in the future is for Jesus Christ to physically return to raise the dead (which is when the rapture also occurs), preside over the final judgment, and create a new heaven and earth devoid of sin and death where the new and holy Jerusalem from heaven descends (as per Revelation 20:7 - Revelation 22:5).

Earth's Lowest Places Bailey O'Connell,2014-12-15 Earth's landscape can be vastly different from region to region, and it's always changing! The shifting plates on which the planet's crust sits cause some areas to rise, while others sink. The Dead Sea in the Middle East is the lowest dry place on Earth, about 1,300 feet (396 m) below sea level. In the ocean, Challenger Deep is home to some creepy marine life, much different than anything we see near the surface. These interesting places and others are featured in this book, which interweaves intriguing science and social studies subject matter with many fun facts.
