Transforming the Rural Nonfarm Economy Steven Haggblade,Peter B. R. Hazell,Thomas Reardon,2007-11-16 Contrary to conventional wisdom that equates rural economies with agriculture, rural residents in developing countries often rely heavily on activities other than farming for their income. Indeed, nonfarm work accounts for between one-third and one-half of rural incomes in the developing world. In recent years, accelerating globalization, increasing competition from large businesses, expanding urban markets for rural goods and services, and greater availability of information and communication technology have combined to expose rural nonfarm businesses to new opportunities as well as new risks. By examining these rapid changes in the rural nonfarm economy, international experts explore how the rural nonfarm economy can contribute to overall economic growth in developing countries and how the poor can participate in this rapidly evolving segment of the economy. The authors review an array of recent studies of the rural nonfarm economy in order to summarize existing empirical evidence, explore policy implications, and identify future research priorities. They examine the varied scale, structure, and composition of the rural nonfarm economy, as well as its relationship with agricultural and urban enterprises. And they address key questions about the role of public intervention in the rural nonfarm economy and how the rural poor can participate in and navigate the rapid transition underway in rural areas. The

contributors offer new insights to specialists in rural development and to others interested in overall economic development.

The Handbook for Working with Difficult Groups Sandy Schuman,2010-03-18 WE'VE ALL EXPERIENCED the challenges associated with working with groups, but The Handbook for Working with Difficult Groups turns the idea of difficult groups on its head. Rather than view groups as inherently difficult, it looks at the factors that make working with groups difficult. Individual chapters focus on challenges such as involving dissenters, building external perspectives, reducing complaining, adapting to cultural differences, incorporating diversity, facilitating inclusion, working virtually, resolving identity-based conflict, transforming unproductive behavior patterns, preventing workplace harassment, and strengthening accountability. The book first provides a framework for thinking systemically about the many and varied ways in which working with a group can be difficult. Building on that framework, the contributors each address three basic issues: How the group is difficult—a description of a real group and the observable phenomena that reflect the group's difficulty. Why the group is difficult—an exploration of the underlying causes of the difficulty. What you can do about it—what you can do as a group facilitator, leader, or member to help the group.

Trade Liberalisation and Regional Disparity in Pakistan Muhammad Shoaib Butt,Jayatilleke S. Bandara,2008-12-04 Pakistan's military, which has directly controlled the country's affairs for more than half of its post-independence history and which often retained real political power even during periods of democratic rule, has played a significant role in trade liberalisation. Regional disparities have increased since the beginning of major trade liberalisation attempts in the 1980s and at present, regional conflicts and the associated regional disparities are extremely high. The authors critically review the country's post-independence political economy of trade liberalisation, the resulting structural change and the story of regional disparities, identifying possible relations with political regimes. Using a regional computable general equilibrium (CGE) model, the effects of trade liberalisation on regional disparities are quantitatively examined, with an emphasis on the key export industries at a national level and on the relative output and employment growth at a regional level. In the first study to distinguish a possible link between trade liberalisation and regional disparities under dissimilar political regimes, such as autocracy and democracy, Butt and Bandara use Pakistan as a case study to draw broader lessons for other developing countries. This book will be of interest to academics, economists, political analysts and policymakers interested in development economics in general and South Asia in particular.

The Business of Music Michael Talbot,2002-05-01 Is business, for music, a regrettable necessity or a spur to creativity? Are there limits to the influence that economic factors can or should exert on the musical imagination and its product? In the eleven essays contained in this book the authors wrestle with these questions from the perspective of their chosen area of research. The range is wide: from 1700 to the present day; from the opera house to the community centre; from composers, performers and pedagogues to managers, publishers and lawyers; from piano miniatures to folk music and pop CDs. If there is a consensus, it is that music serves its own interests best when it harnesses business rather than denying it.

Politics of Precarity Panchali Ray,2019-04-27 Politics of Precarity presents an analysis of contemporary labour politics that emerges with informalization and privatization of crucial social sectors, and in this case one of the few feminized occupations—the nursing sector. Contrary to common understanding, nursing service is not a homogenous sector, but a deeply splintered one based on historically and socially produced structural inequalities and is rigidly cleaved along the lines of 'prestigious' and 'dirty' work. The levels of classification in this sector are reflected in and constituted by material realities, such as wages, terms of employment, extent of skills, and

possession of qualifications. Drawing on three years of fieldwork in hospitals and nursing homes in the city of Kolkata, the book is an ethnographic study that analyses how hierarchies at workplace intersect with social identities to produce a differentiated workforce. The book interrogates the politics of distinction and distancing that produces a feminine workforce divided by class, caste, and sexualities to examine the various contestations among ranks of workers who deploy modernity, morality, and gendered norms as strategies to secure marginal gains at the expense of others.

The Real Cyber War Shawn M. Powers,Michael Jablonski,2015-03-15 Contemporary discussion surrounding the role of the internet in society is dominated by words like: internet freedom, surveillance, cybersecurity, Edward Snowden and, most prolifically, cyber war. Behind the rhetoric of cyber war is an on-going state-centered battle for control of information resources. Shawn Powers and Michael Jablonski conceptualize this real cyber war as the utilization of digital networks for geopolitical purposes, including covert attacks against another state's electronic systems, but also, and more importantly, the variety of ways the internet is used to further a state's economic and military agendas. Moving beyond debates on the democratic value of new and emerging information technologies, The Real Cyber War focuses on political, economic, and geopolitical factors driving internet freedom policies, in particular the U.S. State Department's emerging doctrine in support of a universal freedom to connect. They argue that efforts to create a universal internet built upon Western legal, political, and social preferences is driven by economic and geopolitical motivations rather than the humanitarian and democratic ideals that typically accompany related policy discourse. In fact, the freedom-to-connect movement is intertwined with broader efforts to structure global society in ways that favor American and Western cultures, economies, and governments. Thought-provoking and far-seeing, The Real Cyber War reveals how internet policies and governance have emerged as critical sites of geopolitical contestation, with results certain to shape statecraft, diplomacy, and conflict in the twenty-first century.

Reconciliation in Divided Societies Erin Daly,Jeremy Sarkin,2011-09-07 As nations struggling to heal wounds of civil war and atrocity turn toward the model of reconciliation, Reconciliation in Divided Societies takes a systematic look at the political dimensions of this international phenomenon. . . . The book shows us how this transformation happens so that we can all gain a better understanding of how, and why, reconciliation really works. It is an almost indispensable tool for those who want to engage in reconciliation—from the foreword by Archbishop Emeritus Desmond Tutu As societies emerge from oppression, war, or genocide, their most important task is to create a civil society strong and stable enough to support democratic governance. More and more conflict-torn countries throughout the world are promoting reconciliation as central to their new social order as they move toward peace and stability. Scores of truth and reconciliation commissions are helping bring people together and heal the wounds of deeply divided societies. Since the South African transition, countries as diverse as Timor Leste, Sierra Leone, Fiji, Morocco, and Peru have placed reconciliation at the center of their reconstruction and development programs. Other efforts to promote reconciliation—including trials and governmental programs—are also becoming more prominent in transitional times. But until now there has been no real effort to understand exactly what reconciliation could mean in these different situations. What does true reconciliation entail? How can it be achieved? How can its achievement be assessed? This book digs beneath the surface to answer these questions and explain what the concepts of truth, justice, forgiveness, and reconciliation really involve in societies that are recovering from internecine strife. Looking to the future as much as to the past, Erin Daly and Jeremy Sarkin maintain that reconciliation requires fundamental political and economic reform along with personal healing if it is to be effective in establishing lasting peace and stability. Reconciliation, they argue, is best thought of as a means for transformation. It is the engine that enables victims to become survivors and divided societies to transform themselves into communities where people work together to raise children and live productive, hopeful lives. Reconciliation in Divided Societies shows us how this transformation happens so that we can all gain a better understanding of how and why reconciliation is actually accomplished.

European Visions Janelle Blankenship,Tobias Nagl,2015-07-31 This volume examines the challenges cinemas in small European countries have faced since 1989. It explores how notions of scale and »small cinemas« relate to questions of territory, transnational media flows, and globalization. Employing a variety of approaches from industry analysis to Deleuze & Guattari's concept of the »minor«, contributions address the relationship of small cinemas to Hollywood, the role of history and memory, and the politics of place in post-Socialist cinemas.
