Friction Clark McCauley,Sophia Moskalenko,2011-03-02 *Friction: How Radicalization Happens to Them and Us* identifies the 12 mechanisms of political radicalization that move individuals, groups, and mass publics to increased sympathy and support for political violence. Written by two psychologists who are acknowledged radicalization experts and consultants to the Department of Homeland Security and other government agencies, *Friction* draws on a pattern of terrorism that played out over a century ago in imperial Russia to illustrate the 12 mechanisms of radicalization and illuminate the strikingly similar patterns of group and individual behavior unfolding today. Taken together, the case histories from the past and present eras show how unexceptional people are moved to exceptional violence in the conflict between states and non-state groups. This sweeping, absorbing narrative provides the context, depth, and insight needed to recognize the psychology behind radicalization, with hope for those working towards peace.

Community of the Transfiguration Paul R Dekar, 2008-08-28 In the 1930s, German theologian Dietrich Bonhoeffer anticipated the restoration of the Church after the coming Second World War through a new kind of monasticism, a way of life of uncompromising adherence to the Sermon on the Mount in imitation of Christ. Since then, the renewal of Christian monasticism has become a great spiritual movement. Imbued with a love for God and neighbour, and with a healthy self-love, people are going to monasteries to deepen their relationship with God, to pray, and to find peace. While some monastic institutions are suffering a decline in traditional vocations, many Christians are exploring monastic lifestyles. This book introduces The Community of the Transfiguration in Australia, the story of a new monastic community and an inspiring source of hope for the world at another time of spiritual, social, and ecological crisis.

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

From a perspective of independent researcher and parent of three bilingual children Suzanne Barron-Hauwaert discusses the issues of a growing bilingual or multilingual family. What happens when there are two or more children at different stages of language development? Do all the siblings speak the same languages? Which language(s) do the siblings prefer to speak together? Could one child refuse to speak one language while another child is fluently bilingual? How do the factors of birth order, personality or family size interact in language production? With data from over 100 international families this book investigates the reality of family life with two or more children and languages.

The G and T Defense: George W Bush and Tony Blair: Heroes, Not Villains Mark B Jardine, 2016-09-26 The G and T Defense makes the following controversial yet well-supported claims: - George W Bush and Tony Blair are responsible for saving many more lives in the world than for taking them. - The Afghanistan and Iraq wars of 2001 and 2003 were justified and necessary at the time. The real and obvious war criminals were Osama bin Laden, Mullah Omar, Saddam Hussein and Abu Musab al-Zarqawi. - The hysterical and widespread accusations of lies and dishonesty against Bush and Blair are unjustified. - The casualties and prolonged conflict in Iraq were caused almost entirely by fanatical, fundamentalist extremists, and not by western powers. - The Abu Ghraib scandal was horrific, but needs to be put firmly into context. - Fallujah was no Guernica. Oil was no cause. - The hysterical reaction by much of the Western media to the 2003 Iraq war has led to dangerous self-loathing in the West,

reinforced by moral equivalence. - Bush and Blair are more deserving of the Nobel Prize than Barack Obama.
