What We Owe Each Other Minouche Shafik,2022-08-23 From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, What We Owe Each Other provides practical solutions to current challenges and demonstrates how we can build a better society—together.

The Great Demographic Reversal Charles Goodhart,Manoj Pradhan,2020-08-08 This original and panoramic book proposes that the underlying forces of demography and globalisation will shortly reverse three multi-decade global trends – it will raise inflation and interest rates, but lead to a pullback in inequality. “Whatever the future holds”, the authors argue, “it will be nothing like the past”. Deflationary headwinds over the last three decades have been primarily due to an enormous surge in the world’s available labour supply, owing to very favourable demographic trends and the entry of China and Eastern Europe into the world’s trading system. This book demonstrates how these demographic trends are on the point of reversing sharply, coinciding with a retreat from globalisation. The result? Ageing can be expected to raise inflation and interest rates, bringing a slew of problems for an over-indebted worldeconomy, but is also anticipated to increase the share of labour, so

that inequality falls. Covering many social and political factors, as well as those that are more purely macroeconomic, the authors address topics including ageing, dementia, inequality, populism, retirement and debt finance, among others. This book will be of interest and understandable to anyone with an interest on where the world's economy may be going.

Green Gone Wrong Heather Rogers,2013-01-16 Faced with climate change, many counsel going green, encouraging us to buy organic food or a clean car, for example. But can we rely on consumerism to provide a solution to the very problems it has helped cause? Heather Rogers travels from Paraguay to Indonesia, via the Hudson Valley, Detroit, and Germany's Black Forest, to investigate green capitalism, and argues for solutions that are not mere palliatives or distractions, but ways of engaging with how we live and the kind of world we want to live in. A new afterword considers various ways in which national development might be freed from its dependence on economic growth, allowing for a decent standard of living without exhausting the planet's resources.

Child protection Siobhan E. Laird,2013-03-06 As they intervene in families to reduce the risk of harm to children, child protection social workers around the world are confronting increasingly high levels of hostility and aggression from some parents. Investigations into the deaths of children known to social services have accused social workers of failing to use their professional authority to challenge parents. This much needed book analyses public inquiries and serious case reviews to reveal the dynamics of hostility and aggression which contribute to the failure to protect children. These can occur within the office environment and between social workers and parents or their partners.. The book details applied theories of aggression in conjunction with the skills required for dealing with anger, conflict and aggression. A set of tools and reflective exercises assists the application of theory to day-to-day child protection practice. This indispensable and practical text is ideal for social work students, practitioners, trainers and academics specialising in child protection.

The Financialisation of Power Sarah Bracking,2016-05-05 The financial crash of 2008 led people all over the world to ask how far financiers are in control of our lives. To what extent does what they do with our money affect our everyday lives? This book asks whether the crisis, and subsequent use of public subsidies to help the international economy recover, was a unique event, or a symptom of a wider malaise where financiers have effectively usurped the power of governments and are running the political economy themselves. The Financialisation of Power in Africa argues that growth is not always a good thing. The development of more derivatives and faster financial exchanges are draining businesses of investment capital rather than serving to supply it; applying financial logic does not save nature or

protect biodiversity and other species. This book outlines the concept of financialisation and how it has been used in various ways to explain the post-2008 crisis and global political economy. There is a particular focus on these issues in reference to Africa, which has a particular dependence on international money. It takes the perspective of the modern state, exploring how the political economy of development actually works in relation to African governance. This book is of interest to students of international development and political economy and is a key source for policy makers interested in African studies and economic development.

International Perspectives on Competence in the Workplace Christine R. Velde,2009-10-08 As the world’s economy develops into a more dynamic, fast-moving, and unpredictable entity, it is crucial that the workers who create wealth have the ability to assess and respond to new and unforeseen challenges. In other words, the future will require a more competent workforce. What, though, does this mean in practice? In this, the fully revised second edition of Christine Velde’s book, a variety of researchers from around the world provide a truly international perspective on the issue. They help to redefine the term competence. Rather than responding to challenges using a pre-existing set of skills, they see competence as having the ability to assess new situations, and then adapt one’s response accordingly, particularly in collaboration with others. Providing the reader with insightful perspectives about competence in different situations and contexts, the book’s sections explore the concept of competence in industry and vocational education, in schools and colleges, in small businesses and companies, and in universities. The interpretation, experience and teaching of competence in the workplace is boiled down to five essential components that in themselves represent an argument for a more holistic conception of competence. Velde herself concludes the book by synthesizing and reflecting on the contents. This book provides the reader with insightful perspectives on competence, and the characteristics of learning environments in different workplace contexts. Drawing on phenomenographic insights allows it to present a more enlightened view of competence, at the same time as opening up an international dialogue about the meaning and interpretation of competence in the workplace. Useful not only to educators and researchers, this volume will also assist leaders and managers in a variety of contexts to develop more meaningful workplaces.
