iProperty William Barrett, Christopher Price, Thomas

Hunt, 2008-01-07 In today's turbulent global economy, companies establish competitive advantage by creating the most exciting ideas and taking them to market. To sustain this competitive advantage and thrive long term, innovative companies must use intellectual property to protect their valuable ideas. iProperty explores the intellectual property strategies and tactics used by successful companies to protect ideas. It answers the question, If I'm serious about strategically deploying intellectual property in a way that benefits my bottom line, what should I do on Monday morning to make that happen? Too often, books dealing with

strategy remain high-level and vague, while intellectual property books frequently bog the reader down in the intricacies of patent laws and regulations. Avoiding these extremes, iProperty emphasizes the concrete details involved in actual implementation and provides executives, managers and attorneys with practical advice for developing and executing a strategic intellectual property plan that will yield a measurable return on investment.

Mentoring African American Males Dr. William

Ross,2014-09-01 Mentoring African American Males provides important black male research and student performance data to guide the efforts of those who accept the enormous task of standing in the gap to increase black male achievement. Dr. Ross provides guidance for individuals and institutions embracing the important role of developing mentoring programs or serving as a mentor to youth. However, what makes Dr. Ross' work such a critically important book for any individual or institution considering such a role is its insight into the social-cultural framework within which mentoring must occur at every level from elementary school through college. Equally insightful is the structure that such programs must take in response to the socio-cultural constructs of the families, communities, and institutions where they will occur. There are far more quantitative studies than qualitative on the topic of mentoring. This text addresses that discrepancy and provides the results of several qualitative studies on African American males. There is hardly any that offer a mixed method perspective that combine quantitative and qualitative methodological approaches. This text reports on the research results that are qualitative in nature in addition to some that are from a quantitative and mixed method approach.

New Developments in the Biology of Chrysomelidae

Pierre Jolivet,Jorge Santiago-Blay,Michael Schmitt,2021-10-25 This book summarizes what is actually known about the biology of Leaf Beetles. It is the most recent study in the field. As we are well aware, Chrysomelidae, one of the three largest families of beetles,

are of great economic importance since they can be a serious pest to crops or, on the other hand, can be used to destroy imported weeds. This is due to the selectivity of their feeding preferences. In this way, Chrysomelidae are an invaluable tool for studying plant selection mechanisms. The many and varied topics dealt with in this book cover almost all aspects of phylogeny, classification, paleontology, parasitology, biogeography, defenses, population biology, genetics and biological control as well as many other subjects. The most renowned specialists in these fields have been chosen to put together a diverse, state-of-the-art publication. Few beetle families have been studied in such detail as the Chrysomelids. This is not only due to their economic importance, but also to their incredible variety of forms and behaviors. There are no less than 40,000 species currently in existence worldwide, but probably 100,000 species have existed since the Jurassic, when they first came into being with the Cycadoids and other primitive plant families, later to diversify during the Cretaceous with the advent of flowering plants.

Training Methods to Build Human Terrain Mapping Skills Laura A. Zimmerman, 2010 A key to success in counterinsurgency operations involves finding ways to identify the insurgents within the population. Success will likely require that Soldiers develop the cultural and information gathering skills necessary to develop a detailed knowledge of the human terrain in their area of operations. This report documents research conducted to develop Human Terrain Mapping (HTM) skills for Soldiers, where HTM is an overarching concept that refers to methods and tools used to systematically collect and catalog social and ethnographic information. Given the rapidly changing nature of current conflicts, the research effort sought to gather HTM training requirements and tactics, techniques, and procedures (TTP) from members of an intact unit that had worked together performing the HTM functions in a recent deployment. Sixteen Soldiers from a recently deployed brigade were interviewed to identify the TTP they used to accomplish HTM tasks. Based on the interview findings a training product was developed that demonstrates methods and tools for building an understanding of the HTM process, specific information elicitation techniques, and Soldier observation skills.--DTIC.
