Beginning XML with DOM and Ajax Sas Jacobs,2006-11-30 This book gives the most up-to-date picture of the topic—XML support in the most modern web browsers, creating XML-driven applications using the most versions of web standards and server-side languages, including CSS 2.1/3, DOM, XSLT and XPath 2, PHP 5, ASP.NET 2, and many more. The book shows that you can give the reader all they need to know to hit the ground running, without making them trawl through hundreds of pages of syntax. The book also provides an introduction to Ajax-style programming, which is an essential topic for modern web developers to understand. XML is core to Ajax, so an understanding of it is essential when learning how to program Ajax functionality. This book therefore provides a great stepping stone for readers wishing to take this path.

Competing for the Internet Flip Petillion,Jan Janssen,2017-03-15 The Internet Corporation for Assigned Names and Numbers (ICANN), founded in 1998, is a not-for-profit public-benefit corporation established to ensure a stable and secure global Internet. As the custodian of the Domain Name System (DNS), one of its key responsibilities is the introduction and promotion of competition in Internet-related markets, an aim which ICANN has tried to achieve through the delegation of generic top-level domains (gTLDs). This book investigates how successful ICANN has been in achieving this goal. Over the years, ICANN has been required to decide on a substantial number of complaints from applicants for gTLDs related to capture, arbitrariness, discrimination, and unwarranted restriction of competition. This book is the first detailed study of complaints related to ICANN decisions that have been brought using ICANN's Independent

Review Process (IRP). The authors - preeminent expert practitioners in international litigation and arbitration related to Internet governance - take a close look at how ICANN has handled the major issues raised and how ICANN has shaped its own accountability mechanisms. The book also weighs the influence of external accountability on ICANN's decision-making process and considers the implications of third-party decisions (such as IRP decisions) for the ongoing development of the Internet. This authoritative analysis covers: • the regulatory framework governing ICANN and the introduction of new gTLDs in a historic perspective; • ICANN's accountability framework; • all the IRP cases that have been decided to date, with an in-depth analysis of those cases that have become reference decisions in the latest application round; and • the 2016 amendments to ICANN's articles of incorporation and bylaws, concentrating on the problems that remain unresolved. This work is a welcome addition to the debate on how to address the shortcomings in ICANN's accountability in the interests of the global Internet community. The authors make concrete proposals and recommendations, suggesting changes to ICANN's regulatory framework in the light of the lessons learned and with a view to preventing similar problems arising in a next round of gTLD applications. This book has the potential to become the Green Book for fundamental changes to ICANN's accountability framework.

Crisis, Recovery, and the Role of Accounting Firms in the Pacific Basin David L. McKee,Don E. Garner,Yosra AbuAmara McKee,2002-04-30 The authors bring the disciplines of accounting and economics to bear on an examination of the critical role played by the major accounting firms in the ongoing economic recovery of Pacific Rim nations from the Asian financial crisis of the late 1990s. Accounting firms, through their service offerings, are having an impact not only on economic indicators, but also on longer-term growth prospects and development patterns in the newly industrialized nations of Southeast Asia (Hong Kong, Singapore, South Korea, and Taiwan), emerging nations (Malaysia, Thailand, the Philippines, and Indonesia) and selected Pacific island nations (including Papua New Guinea, Fiji, and Vanuatu). For practitioners in the private and public sectors and their academic colleagues. Demonstrating the full extent of the influence of global accounting firms on Pacific economies, the authors provide an overview of domestic accounting institutions for each grouping of nations in order to lend valuable context to the discussion of the role of international services firms in each individual jurisdiction. For those whose work or academic accounting services in Southeast Asia, or the role in the region of the World Bank, the International Monetary Fund, and various regional development banks and United Nations agencies.

Health Information on the Internet Rowena Cullen,2005-11-30 The accessibility of health information on the Internet has revolutionized access to clinical information for health practitioners and patients. This access to information has the potential to make a major contribution to health care. However, the effective use of this accessibility depends on an understanding of all the issues involved, from the underlying technologies and economic pressures, to questions of how best to manage quality and privacy, how people seek and use information, and what the barriers to its use are. Cullen's book also examines the extent of health information on the Internet, the providers of websites and their content, and outlines the nature of the paradigm shift affecting knowledge in the health sector.

Cyberpath to Development in Asia Sandhya Rao,Bruce C. Klopfenstein,2001-12-30 Many Asian countries are achieving remarkable success in closing what researchers call the digital divide between developing and developed nations, while others continue to struggle. This collection of essays sheds light on the various ways in which the Internet has been seen in Asia. As we continue to debate new paradigms of research and development in the digital era, where innovations and convergences are the norm, this book fills an urgent need, revealing how the technological revolution has spread, and is spreading, throughout diverse nations. Chapters on the United States and Japan offer a sort of yardstick by which to measure and compare the diffusion and the impact of the Internet in other Asian countries, including China, Korea, Taiwan, and Singapore. Appealing to readers interested in the development of the Asian region, technological innovation, and international communication, Cyberpath to Development in Asia offers an acute study of how a global phenomenon continues to manifest itself in a crucial part of the globe.

Outlook on the common agricultural policy of the European Union Christian Manthe,2003-08-06 Inhaltsangabe:Introduction: The focus of the thesis is the Direct Payments Systems of the Common Agricultural Policy of the European Union as introduced as part of the MacSharry reform and extended under the Agenda 2000. The objective is to analyse the current system and the proposals made by the Commission in January 2003 regarding a decoupling of these payments. The Common Agricultural Policy was one of the first policies developed in the European Union, and one of those regulated in the greatest detail. Among the European Union's policies, the CAP is regarded as one of the most important policy areas. This is justified not only because of its share of the EU budget, the vast number of people and the extent of the territory directly affected, but also because of its symbolic significance and the extent of sovereignty transferred from the national to the European level. The significance of the CAP, nowadays, is also portrayed by the fact that it is directly related to the Single Market and the EMU, two key areas in achieving the European integration. The objective of the CAP was to support the agricultural sector in the Member States. The second chapter of this thesis will provide general legal background information on the institutions of the EU and the functioning of the decision-making processes with regards to the agricultural sector. The history of the CAP, it s functioning, the reasons for its creation and some general information will be outlined in chapter 3. Special emphasis will be on the common market organisations, the second pillar of the CAP, the rural development policy and the system of Direct Payments. The history will also cover the Agenda 2000, the Mid-term review and especially the latest reform proposals of the EU in January 2003. The proposals with regard to the Direct Payments, such as the decoupling and the

modulation, will be subject to a closer analysis in chapter 7. The chapter 4 covers the EU enlargement and gives an overview of the new challenges arising by that for the EU. Even though the consequences of the enlargement are significant in some areas of the CAP, this thesis will not provide a closer analysis of all the dimensions. The topic of the EU enlargement itself is too extensive to be covered by a single chapter. The focus of this thesis is on the Direct Payment system of the CAP and thus the consequences of EU enlargement will only be portrayed on this background. Chapter 6 provides a short evaluation of [...]

Learn to Program with JavaScript John Smiley,2008-06-29 Javascript is a powerful, object-based scripting language;JavaScript programs can be embedded directly in HTML web pages. When combined with the Document Object Model (DOM) defined by a web browser, Javascript allows you to create Dynamic HTML (DHTML) content and interactive client-side web applications. JavaScript syntax is similar to that of other popular programming languages such as C, C++ and Java, which makes it easy to learn for experienced programmers. At the same time, JavaScript is an interpreted scripting language, providing a flexible, forgiving environment in which new programmers can learn. There's no need to buy a JavaScript compiler or interpreter---the JavaScript interpreter is shipped as part of your Internet Browser.

Algorithm Design: A Methodological Approach - 150 problems and detailed solutions Patrick Bosc,Marc Guyomard,Laurent Miclet,2023-01-31 A bestseller in its French edition, this book is original in its construction and its success in the French market demonstrates its appeal. It is based on three principles: (1)

An organization of the chapters by families of algorithms: exhaustive search, divide and conquer, etc. On the contrary, there is no chapter devoted only to a systematic exposure of, say, algorithms on strings. Some of these will be found in different chapters. (2) For each family of algorithms, an introduction is given to the mathematical principles and the issues of a rigorous design, with one or two pedagogical examples. (3) For the most part, the book details 150 problems, spanning seven families of algorithms. For each problem, a precise and progressive statement is given. More importantly, a complete solution is detailed, with respect to the design principles that have been presented; often, some classical errors are pointed out. Roughly speaking, two-thirds of the book is devoted to the detailed rational construction of the solutions.

Bin Laden's Plan David Malone,2005 Since the 9/11 attack, Al Qaeda has chosen to not attack the vulnerable American homeland in order to cement the transfer of war guilt to the United States. This strategic decision was a product of the marriage between Osama bin Laden's terrorist group and an American neo-conservative group, The Project for the New American Century, both of whose leaders had been attempting, covertly and separately, to provoke a unilateral American invasion of Iraq since the end of the Cold War as a first step to world domination. In pursuit of this shared objective, Bin Laden christened the marriage with an October surprise that facilitated the closely contested millennial election of the hawkish American group's foremost representatives, the Bush Administration. After nine months of Bush's presidency, Al Qaeda and an immaculately impregnated American administration gave birth to the march

to war against Iraq when Bin Laden intentionally unleashed the Bush Administration's crusade in the Middle East on 9/11. The American occupation of Iraq would prove to be the greatest boon to Bin Laden's most vital war objective, the global recruitment coup of transferring guilt for the war to the United States. Al Qaeda supported President Bush's reelection in 2004 with another October surprise so that his administration would complete the global vilification of America that is intended to be the foundation of Bin Laden's messianic bid for world domination by nuclear terrorism.
