**Competing for the Internet Flip Petition**, Jan Janssen, 2017-03-15 The Internet Corporation for Assigned Names and Numbers (ICANN), founded in 1998, is a not-for-profit public-benefit corporation established to ensure a stable and secure global Internet. As the custodian of the Domain Name System (DNS), one of its key responsibilities is the introduction and promotion of competition in Internet-related markets, an aim which ICANN has tried to achieve through the delegation of generic top-level domains (gTLDs). This book investigates how successful ICANN has been in achieving this goal. Over the years, ICANN has been required to decide on a substantial number of complaints from applicants for gTLDs related to capture, arbitrariness, discrimination, and unwarranted restriction of competition. This book is the first detailed study of complaints related to ICANN decisions that have been brought using ICANN's Independent Review Process (IRP). The authors - preeminent expert practitioners in international litigation and arbitration related to Internet governance - take a close look at how ICANN has handled the major issues raised and how ICANN has shaped its own accountability mechanisms. The book also weighs the influence of external accountability on ICANN's decision-making process and considers the implications of third-party decisions (such as IRP decisions) for the ongoing development of the Internet. This authoritative analysis covers: • the regulatory framework governing ICANN and the introduction of new gTLDs in a historic perspective; • ICANN's accountability framework; • all the IRP cases that have been decided to date, with an in-depth analysis of those cases that have become reference decisions in the latest application round; and • the 2016 amendments to ICANN's articles of incorporation and bylaws, concentrating on the problems that remain unresolved. This work is a welcome addition to the debate on how to address the shortcomings in ICANN's accountability in the interests of the global Internet community. The authors make concrete proposals and recommendations, suggesting changes to ICANN's regulatory framework in the light of the lessons learned and with a view to preventing similar problems arising in a next round of gTLD applications. This book has the potential to become the Green Book for fundamental changes to ICANN's accountability framework.

**Business Ethics, Sustainability and CSR Volume 2** Patrick Siegfried, 2015-08-25 These Case Studies were written from students at the EBC-university of applied sciences Düsseldorf. **Maps and the Internet** M.P. Peterson, 2003-10-24 This book examines a new trend affecting cartography and geographic information science. Presenting the work of over 30 authors from 16 different countries, the book provides an overview of current research in the new area of Internet Cartography. Chapters deal with the growth of this form of map distribution, uses in education, privacy issues, and technical aspects from the point of view of the map provider - including Internet protocols such as XML and SVG. Many see the Internet as a revolution for cartography. Previously tied to the medium of paper and expensive large-format color print technology, maps had a limited distribution and use. The Internet made it possible to not only distribute maps to a much larger audience but also to incorporate interaction and animation in the display. Maps have also become timelier with some maps of traffic and weather being updated every few minutes. In addition, it is now possible to access maps from servers throughout the world. Finally, the Internet has made historic maps available for viewing to the public that were previously only available in map libraries with limited access.

*Applying Formal Methods: Testing, Performance, and M/E-Commerce* Manuel Núñez, Zakaaria Maamar, Fernando Pelayo, Key Pousttchi, Fernando Rubio, 2004-09-09 This book constitutes the joint refereed proceedings of the First International Workshop on Theory Building and Formal Methods in Electronic/Mobile Commerce, TheFormEMC, the first European Performance Engineering Workshop, EPEW, and the First International Workshop on Integration of Testing Methodologies, ITM, held jointly in association with FORTE 2004 in Toledo, Spain, in October 2004. The 27 revised full papers presented were carefully reviewed and selected from a total of 62 submissions. The papers are grouped in three topical sections corresponding to the workshop topics.

**Cyber Worship in Multifaith Perspectives** Mohamed Taher, 2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are

involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

**The Multiplicities of Internet Addiction** Nicola F. Johnson, 2016-03-03 Overuse of the internet is often characterized as problematic, disruptive, or addictive, with stories frequently claiming that online use interferes with relationships, or that 'excessive' time in front of computer screens is unhealthy. The Multiplicities of Internet Addiction contests the claim that computers - specifically Internet use - are addictive, arguing that use of the Internet is now a form of everyday leisure engaged in by many people in Western society. Offering an analysis of the nature of addiction alongside a detailed empirical study of home computer use, this book will be of interest not only to sociologists of culture and popular culture, but also to scholars of media, ICT and education.

**How I taught Katy Perry (and others) to program in JavaScript** John Smiley, 2012-11-12 An Introductory text on JavaScript. Javascript is a browser language supported by all major Internet Browsers. The easiest technical book you'll ever read. Open it up and see for yourself. Join Professor Smiley's JavaScriptclass as he teaches essential skills in programming, coding and more. Using a student-instructor conversational format, this book starts at the very beginning with crucial programming fundamentals. You'll quickly learn how to identify customer needs so you can create an application that achieves programming objectives---just like experienced programmers. By identifying clear client goals, you'll learn important programming basics---like how computers view input and execute output based on the information they are given---then use those skills to develop real-world applications. Participate in this one-of-a-kind classroom experience with Katy Perry and other musical stars and see why Professor Smiley is renowned for making learning fun and easy.

**Learn to Program with JavaScript** John Smiley, 2008-06-29 Javascript is a powerful, object-based scripting language; JavaScript programs can be embedded directly in HTML web pages. When combined with the Document Object Model (DOM) defined by a web browser, Javascript allows you to create Dynamic HTML (DHTML) content and interactive client-side web applications. JavaScript syntax is similar to that of other popular programming languages such as C, C++ and Java, which makes it easy to learn for experienced programmers. At the same time, JavaScript is an interpreted scripting

language, providing a flexible, forgiving environment in which new programmers can learn. There's no need to buy a JavaScript compiler or interpreter--- the JavaScript interpreter is shipped as part of your Internet Browser.

Algorithm Design: A Methodological Approach - 150 problems and detailed solutions Patrick Bosc, Marc Guyomard, Laurent Miclet, 2023-01-31 A bestseller in its French edition, this book is original in its construction and its success in the French market demonstrates its appeal. It is based on three principles: (1) An organization of the chapters by families of algorithms: exhaustive search, divide and conquer, etc. On the contrary, there is no chapter devoted only to a systematic exposure of, say, algorithms on strings. Some of these will be found in different chapters. (2) For each family of algorithms, an introduction is given to the mathematical principles and the issues of a rigorous design, with one or two pedagogical examples. (3) For the most part, the book details 150 problems, spanning seven families of algorithms. For each problem, a precise and progressive statement is given. More importantly, a complete solution is detailed, with respect to the design principles that have been presented; often, some classical errors are pointed out. Roughly speaking, two-thirds of the book is devoted to the detailed rational construction of the solutions.

**Historical Representation and the Postcolonial Imaginary** John Hartnett, 2011-01-18 Historical Representation and the Postcolonial Imaginary: Constructing Travellers and Aborigines endeavours to provide an overview of the role which oral history plays in the documentation, representation and subsequent empowerment of neglected and long-marginalised social groups, in this case: the cultural minorities that are the Irish Travellers and the Australian Aborigines. Oral history has proved paramount in enabling such groups to document their pasts, pasts which until recently had been occluded and often-ignored. This work explores the genre that is oral history through the prism that is the construction of the 'Other' in society and with particular reference to two minorities whose histories share a range of similar characteristics. In examining this process, it is possible to trace the transformation of folklore and storytelling into documented historical narrative.

**The Text in the Machine** Toby Burrows, 1999-04-09 The first comprehensive guide to explore the growing field of electronic information, The Text in the Machine: Electronic Texts in the Humanities will help you create and use electronic texts. This book explains the processes involved in developing

computerized books on library Web sites, CD-ROMs, or your own Web site. With the information provided by *The Text in the Machine*, you'll be able to successfully transfer written words to a digitized form and increase access to any kind of information. Keeping the perspectives of scholars, students, librarians, users, and publishers in mind, this book outlines the necessary steps for electronic conversion in a comprehensive manner. *The Text in the Machine* addresses many variables that need to be taken into consideration to help you digitize texts, such as: defining types of markup, markup systems, and their uses identifying characteristics of the written text, such as its linguistic and physical nature, before choosing a markup scheme ensuring accuracy in electronic texts by keying in information up to three times and choosing software that is compatible with the markup systems you are using examining the best file formats for scanning written texts and converting them to digital form explaining the delivery systems available for electronic texts, such as CD-ROMs, the Internet, magnetic tape, and the variety of software that will interpret these interfaces designing the structure of electronic texts with linear presentation, segmented text, or image files to increase readability and accessibility Containing lists of suggested readings and examples of electronic text Web sites, this book provides you with the opportunity to see how other libraries and scholars are creating and publishing digital texts. From *The Text in the Machine*, you'll receive the knowledge to make this medium of information accessible and beneficial to patrons and scholars around the world.

*Modern Blood Banking and Transfusion Practices* Denise Harmening, 2018-11-30 Join the generations of students who have embarked on successful careers with a firm foundation in the theory and practice of blood banking and transfusion practices. Denise Harmening's classic text teaches you not only how to perform must-know tests and tasks, but to understand the scientific principles behind them. You'll begin with a review of the basic concepts of red blood cell and platelet preservation, genetics, immunology, and molecular biology. Then you'll move to the hows and whys of clinical practice. And, you'll be prepared for new advances in the field.

**Seafood Choices** Institute of Medicine, Food and Nutrition Board, Committee on Nutrient Relationships in Seafood: Selections to Balance Benefits and Risks, 2007-04-09 The fragmented information that consumers receive about the nutritional value and health risks associated with fish and shellfish can

result in confusion or misperceptions about these food sources. Consumers are therefore confronted with a dilemma: they are told that seafood is good for them and should be consumed in large amounts, while at the same time the federal government and most states have issued advisories urging caution in the consumption of certain species or seafood from specific waters. *Seafood Choices* carefully explores the decision-making process for selecting seafood by assessing the evidence on availability of specific nutrients (compared to other food sources) to obtain the greatest nutritional benefits. The book prioritizes the potential for adverse health effects from both naturally occurring and introduced toxicants in seafood; assesses evidence on the availability of specific nutrients in seafood compared to other food sources; determines the impact of modifying food choices to reduce intake of toxicants on nutrient intake and nutritional status within the U.S. population; develops a decision path for U.S. consumers to weigh their seafood choices to obtain nutritional benefits balanced against exposure risks; and identifies data gaps and recommendations for future research. The information provided in this book will benefit food technologists, food manufacturers, nutritionists, and those involved in health professions making nutritional recommendations.

**Alexander the Great in Bible Prophecy** Leonides V. Landicho, 2023-06-05 This book aims to offer a biblical perspective on Alexander's story. As John Calvin wrote, "That He presides over all wars, and gives victory to whomsoever he pleases, that none may think that it happens by chance". His conquest of the Achaemenid Persian Empire in just over a decade is impressive, but what were the chances of winning all the battles in this massive campaign? Military schools have analyzed Alexander's biography and military strategies, trying to decipher his winning formula". Is there really a winning formula in war? Historians and writers attribute Alexander's successes to his boldness, adaptability, charisma, and strategic vision. Then, AW Pink wrote, "To say that God is sovereign is to declare that He is "The Governor among nations" (Psalm 22:28), setting up a kingdom, overthrowing empires, and determining the course of dynasties as pleaseth Him best". This book is about ancient history pre-written before the beginning of time.

Groundwater Contamination, Volume II Chester D. Rail, 2000-05-02 Fully updated and expanded into two volumes, the new edition of *Groundwater Contamination* explains in a comprehensive way the sources for groundwater contamination, the regulations governing it, and the technologies for abating it. This volume discusses aquifer management and strategies for stormwater control and groundwater restoration. A number of case histories on site analysis and remediation based on DOE and state documents are included. Among the many new features of this edition are a full discussion of

risk assessment, the preparation of groundwater protection plans, and references linking the text to over 2,300 water-related Web sites.
