**Faith Versus Fact** Jerry A. Coyne,2015-05-19 The New York Times bestselling author explains why any attempt to make religion compatible with science is doomed to fail. What we read in the news today is full of subjectivity, half-truths, and blatant falsehoods; and thus it is more necessary now than ever to safeguard the truth with facts. In his provocative new book, evolutionary biologist Jerry A. Coyne aims to do exactly that in the arena of religion. In clear, dispassionate detail he explains why the toolkit of science, based on reason and empirical study, is reliable, while that of religion—including faith, dogma, and revelation—leads to incorrect, untestable, or conflicting conclusions. Coyne is responding to a national climate in which over half of Americans don't believe in evolution (and congressmen deny global warming), and warns that religious prejudices and strictures in politics, education, medicine, and social policy are on the rise. Extending the bestselling works of Richard Dawkins, Daniel Dennett, and Christopher Hitchens, he demolishes the claims of religion to provide verifiable “truth” by subjecting those claims to the same tests we use to establish truth in science. Coyne irrefutably demonstrates the grave harm—to individuals and to our planet—in mistaking faith for fact in making the most important decisions about the world we live in.

**Understanding Hard to Maintain Behaviour Change** Ron Borland,2014-02-03 The book presents an integrative theory of hard-to-maintain behaviours, that includes hard-to-reduce or eliminate behaviours like smoking and other drug use, overconsumption of food or unsafe sex, and hard-to-sustain behaviours like exercise and sun-safe behaviours. Most of the examples come from the author's work on tobacco smoking, but it is relevant to anyone who is concerned to understand why some forms of desirable behaviour are so hard to achieve, and to those trying to help people change. It also has important implications for public health campaigns and for the development of policies to nudge behaviour in desirable ways. The book provides readers with frameworks to: - Determine whether a “hard to maintain” behaviour is a result of the skills needed to perform it, its reinforcement history, the way the person thinks about it, the context, or some combination of these. - Better integrate cognitive and behavioural change strategies, including emergent strategies related to mindfulness and acceptance, plus novel ways of retraining operational processes. - Understand the different nature of challenges for behaviours where multiple attempts are typically required before the desired behaviour pattern is sustained. - Better understand the role of feelings and emotions as influences on behaviour. - Understand the limits of environmental factors to determine change. - Understand the limits of self-control and will-power.

**Achieving Airport-compatible Land Uses and Minimizing Hazardous Obstructions in Navigable Airspace** Jocelyn Waite,2012 This report discusses airport compatible land use requirements, the legal issues related to achieving airport compatible land use, and legal issues particular to eliminating hazardous obstructions to airspace. The report concludes by reviewing the major legal issues of concern in achieving airport-compatible land use. While general legal principles relevant to airport land use are well established, they are often applied on a case by case basis, particularly in the context of regulatory takings and inverse condemnation. This ad hoc analysis introduces, if not an element of unpredictability, at least some variation in the law by jurisdiction. The need for greater predictability highlights the significance of including airport zoning as part of comprehensive land use planning. This report should be helpful to airport administrators, attorneys, board members, financial officers, community members in the vicinity of airports, realtors, and city and county zoning officials.
