EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility Inge Graef,2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition. Nonetheless, concerns are increasingly raised about the market dominance of a few key players. Because these companies hold the power to drive rivals out of business, regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs. This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines, social networks, and e-commerce platforms – commonly referred to as the 'gatekeepers' of the Internet. The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a 'refusal to deal' and lead to competition law liability under the so-called 'essential facilities doctrine', according to which firms need access to shared knowledge in order to be able to compete. A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals. Building on the refusal to deal concept, and using a multidisciplinary approach, the analysis covers such issues and topics as the following: – data portability; – interoperability; – data as a competitive advantage or entry barrier in digital markets; – market definition and dominance with respect to data; – disruptive versus sustaining innovation; – role of intellectual property regimes; – economic trade-off in essential facilities cases; – relationship of competition enforcement with data protection law and – data-related competition concerns in merger cases. The author draws on a wealth of relevant material, including EU and US decision-making practice, case law, and policy documents, as well as economic and empirical literature on the link between competition and innovation. The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data. In addition, it makes suggestions as to how data protection interests can be integrated into competition policy. An invaluable contribution to ongoing academic and policy discussions about how data-related competition concerns should be addressed under

competition law, the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms. It will be of immeasurable value to the many jurists, business persons, and academics concerned with this very timely subject.

Evaluation of the Updated Site–Specific Risk Assessment for the National Bio– and Agro–Defense Facility in Manhattan, Kansas National Research Council,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Board on Life Sciences,Committee on the Evaluation of the Updated Site-Specific Risk Assessment for the National Bio- and Agro-Defense Facility in Manhattan, Kansas,2012-09-24 Safeguarding U.S. agriculture from foreign animal diseases and protecting our food system require cutting-edge research and diagnostic capabilities. The Department of Homeland Security (DHS) and the U.S. Department of Agriculture (USDA) have embarked on an important mission to replace the aging Plum Island Animal Disease Center (PIADC) with a new facility, the National Bio- and Agro-Defense Facility (NBAF). When operational, this new facility would be the world's fourth biosafety level-4 laboratory capable of large animal research. It would serve as a critical world reference laboratory for identifying emerging and unknown disease threats, and would thus be a critical asset in securing the future health, wealth, and security of the nation. DHS selected Manhattan, Kansas, as the site for the new NBAF after an extensive site-selection process that involved an environmental impact statement. The Government Accountability Office (GAO) raised concerns about DHS's analysis of the potential spread of foot-and-mouth disease virus (FMDv), one of the most serious foreign animal disease threats. Congress directed DHS to conduct a site-specific risk assessment (SSRA) for the NBAF, instructed the National Research Council (NRC) to independently evaluate the SSRA, and prohibited obligation of NBAF construction funds until the NRC review was complete. Congress mandated that DHS revise its SSRA to address shortcomings of the 2010 SSRA, directed the NRC to evaluate the updated SSRA (uSSRA), and again prohibited obligation of construction funds until the completion of the second review. The scope for both of these SSRA reports addressed accidental release of pathogens from the NBAF in Manhattan, Kansas and excluded terrorist acts and malicious threats from its risk assessments. Evaluation of the Updated Site-Specific Risk Assessment for the National Bio- and Agro-Defense Facility in Manhattan, Kansas is the evaluation of the final uSSRA.

Displays! Susan P. Phillips,2014-01-10 Just about any librarian needs new ideas for dynamic, topical library displays. This new second volume

offers ideas on a wide range of subjects including women of note, news-worthy events, Mother Nature, great moments in time, prominent figures in history, global cultures and more. Each display topic includes a comprehensive background discussion along with detailed assembly instructions, an explanation of the genesis of the idea and suggestions on ways to adapt these designs to fit into larger spaces. The author includes everyday items, prized collectibles and authentic antiques in each of the 45 displays featured.

Toxic Loopholes Craig Collins,2010-03-08 The EPA was established to enforce the environmental laws Congress enacted during the 1970s. Yet today lethal toxins still permeate our environment, causing widespread illness and even death. Toxic Loopholes investigates these laws, and the agency charged with their enforcement, to explain why they have failed to arrest the nation's rising environmental crime wave and clean up the country's land, air and water. This book illustrates how weak laws, legal loopholes and regulatory negligence harm everyday people struggling to clean up their communities. It demonstrates that our current system of environmental protection pacifies the public with a false sense of security, dampens environmental activism, and erects legal barricades and bureaucratic barriers to shield powerful polluters from the wrath of their victims. After examining the corrosive economic and political forces undermining environmental law making and enforcement, the final chapters assess the potential for real improvement and the possibility of building cooperative international agreements to confront the rising tide of ecological perils threatening the entire planet.

Strategic Terror Beau Grosscup,2013-07-18 Presenting a global history of aerial bombardment, this book shows how certain European powers initiated aerial bombardment of civilians after World War I, and how it was an instrument of choice in World War II. Beau Grosscup shows that such methods, used initially as a means of terrorizing native populations in Africa and the Middle East, have become the primary form of terrorism in more recent decades. While such 'strategic terror' is not classed as 'terrorism' in the West, this reflects an unwillingness to confront the human costs and immorality of aerial bombardment. Grosscup argues that if terrorism is to be diminished, the role of aerial bombing in sustaining global violence must be recognized.

Women, Writing and Religion in England and Beyond, 650–1100 Diane Watt,2019-12-12 Women's literary histories usually start in the later Middle Ages, but recent scholarship has shown that actually women were at the heart of the emergence of the English literary tradition. Women, Writing and Religion in England and Beyond, 650–1100 focuses on the period before the so-called 'Barking Renaissance' of women's writing in the 12th century. By examining the surviving evidence of women's authorship, as well as the evidence of women's engagement with literary culture more widely, Diane Watt argues that early women's writing was often lost, suppressed, or deliberately destroyed. In particular she considers the different forms of male 'overwriting', to which she ascribes the multiple connotations of 'destruction', 'preservation', 'control' and 'suppression'. She uses the term to describe the complex relationship between male authors and their female subjects to capture the ways in which texts can attempt to control and circumscribe female autonomy. Written by one of the leading experts in medieval women's writing, Women, Writing and Religion in England and Beyond, 650–1100 examines women's literary engagement in monasteries such as Ely, Whitby, Barking and Wilton Abbey, as well as letters and hagiographies from the 8th and 9th centuries. Diane Watt provides a much-needed look at women's writing in the early medieval period that is crucial to understanding women's literary history more broadly.

The Unfinished Atomic Bomb David Lowe,Cassandra Atherton,Alyson Miller,2017-12-26 In its diversity of perspectives, The Unfinished Atomic Bomb: Shadows and Reflections is testament to the ways in which contemplations of the A-bomb are endlessly shifting, rarely fixed on the same point or perspective. The compilation of this book is significant in this regard, offering Japanese, American, Australian, and European perspectives. In doing so, the essays here represent a complex series of interpretations of the bombing of Hiroshima, and its implications both for history, and for the present day. From Kuznick's extensive biographical account of the Hiroshima bomb pilot, Paul Tibbets, and contentious questions about the moral and strategic efficacy of dropping the A-bomb and how that has resonated through time, to Jacobs' reflections on the different ways in which Hiroshima and its memorialization are experienced today, each chapter considers how this moment in time emerges, persistently, in public and cultural consciousness. The discussions here are often difficult, sometimes controversial, and at times oppositional, reflecting the characteristics of A-bomb scholarship more broadly. The aim is to explore the various ways in which Hiroshima is remembered, but also to consider the ongoing legacy and impact of atomic warfare, the reverberations of which remain powerfully felt.

The Unfinished Exhibition Susanna Gold,2016-12-08 The Centennial decade was an era of ambivalence, the United States still unresolved about the incomprehensible damage it had wrought over four years of Civil War, and why. Philadelphia's 1876 Centennial Exhibition -- a spectacular international event celebrating one hundred years of American strength, unity, and freedom -- took place in the immediate wake of this trauma of war and the failures of Reconstruction as a means to restore power and patriotism in the nation's struggle to rebuild itself. The Unfinished Exhibition, the first comprehensive examination of American art at the Centennial, explains the critical role of visual culture in negotiating memories of the nation's past that conflicted with the optimism that Exhibition officials promoted. Supporting novel iconographical interpretations with myriad primary source material, author Susanna W. Gold demonstrates how the art galleries and the audiences who visited them addressed the lingering traumas of battle, the uneasy re-unification of North and South, and the persisting racial tensions in the post-Emancipation era. This careful consideration of the visual record exposes

the complexities of the war's impact on Americans and clarifies how the Centennial art exhibition affected a nation still finding its direction at a critical moment in its history.

Building an EBusiness Elizabeth Eisner Reding,2001 This is an e-commerce book that moves beyond a survey atmosphere to provide hands on experience. It is designed specifically for those who want to develop web skills and business plans for use in starting an e-business. This book integrates and fills the gap between How to Design Web Pages and business and marketing courses. It is not a how-to book dealing with the conversion of existing businesses to the electronic arena; it focuses on entrepreneurs who want to begin an e-business but lack basic knowledge of the Internet and in developing business and marketing plans. Building an e-Business is aimed at those interested in starting an e-business, it makes use of the Web, and assumes little or no Internet knowledge.

Open Target Clark Kent Ervin,2015-08-04 Based on his first-hand experiences and observations of how the Department of Homeland Security is failing to make America safe, Ervin shows the real threats we face--from nuclear attack to homegrown terrorism. Pushed out by the White House for refusing to sugarcoat its failures, Ervin candidly discusses the circumstances of his departure. He takes the reader inside the decision-making councils of this newest department of the U.S. government, and shows how his team's prescriptions for urgent change were ignored--leaving the US vulnerable to another terrorist attack.
