Golden Holocaust Robert N. Proctor,2012-02-28

The cigarette is the deadliest artifact in the history of human civilization. It is also one of the most beguiling, thanks to more than a century of manipulation at the hands of tobacco industry chemists. In *Golden Holocaust*, Robert N. Proctor draws on reams of formerly-secret industry documents to explore how the cigarette came to be the most widely-used drug on the planet, with six trillion sticks sold per year. He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco-cancer hazards, even as they ensnare legions of scientists and politicians in a web of denial. Proctor tells heretofore untold stories of fraud and subterfuge, and he makes the strongest case to date for a simple yet ambitious remedy: a ban on the manufacture and sale of cigarettes.

Education and Research for the Future D. N. P.

Murthy,N. W. Page,2023-05-13 This book takes a fresh look at the fundamental character of education, its history, interaction with society, purpose, changing focus over time and interactions with technology. It surveys the role of research in increasing the body of knowledge leading to new technologies that have helped serve the needs of humankind. In our lifetime there have been profound changes to the world we live in; the technologies used, the problems we struggle with, and the education systems intended to prepare this and following generations for the future. Many of

the problems we face now are more complex than in earlier times, requiring broadly based approaches our traditional silo specialisations are ill-prepared to deal with. They involve technologies whose range of positive and negative effects are not well understood. Many of these problems are global in nature and can no longer be treated just as local issues. Our current approach to education does not adequately prepare us to tackle these problems. New approaches to education are needed to prepare us for the changes that are to come. The future of our planet, our civilisation, our community and our economy depend on it. This book proposes changes that will better prepare us for this future.

More Money Than Brains Laura Penny,2011-04-05
One of Canada's funniest and most incisive social critics reveals why in North America, where governments spend so much on schools and colleges, training is valued far more than education and loud-mouth ignoramuses are widely and publicly celebrated. Public education in the United States is in such pitiful shape, the president wants to replace it. Test results from Canadian public schools indicate that Canadian students are at least better at taking tests than their American cousins. On both sides of the border, education is rapidly giving way to job training, and learning how to think for yourself and for the sake of dipping into the vast ocean of human knowledge is going distinctly out of fashion. It gets worse, says Laura Penny, university lecturer and scathingly funny writer. Paradoxically, in the two

nations that have among the best universities, libraries, and research institutions in the world, intellectuals are largely distrusted and yelping ignoramus now clog the arenas of public discourse. A brilliant defence of the humanities and social sciences, *More Money Than Brains* takes a deadly and extremely funny aim at those who would dumb us down.

Real American Ethics Albert Borgmann, 2010-06-15
America is a wonderful and magnificent country that affords its citizens the broadest freedoms and the greatest prosperity in the world. But it also has its share of warts. It is embroiled in a war that many of its citizens consider unjust and even illegal. It continues to ravage the natural environment and ignore poverty both at home and abroad, and its culture is increasingly driven by materialism and consumerism. But America, for better or for worse, is still a nation that we have built. So why then, asks Albert Borgmann in this most timely and urgent work, are we failing to take responsibility for it? In *Real American Ethics*, Borgmann asks us to reevaluate our role in the making of American values. Taking his cue from Winston Churchill—who once observed that we shape our buildings, and then our buildings shape us—Borgmann considers the power of our most enduring institutions and the condition of our present moral makeup to propose inspired new ways in which we, as ordinary citizens, can act to improve our country. This, he shows, includes everything from where we choose to live and what we spend our money on to daunting tasks like the reshaping of our cities—habits and actions that can guide us to more accomplished and virtuous lives. Using prose that is easy and direct throughout, Borgmann's position is grounded neither by conservative nor liberal ideology, but

in his understanding that he is a devoted citizen among many. In an age in which the blame game is the only game in town, this patriotic book is an eloquent reminder of the political strength we all wield when we work together.

Econovation Steve Faktor,2011-10-27 Over the last 20 years, China fed our zombie-like appetite for iPhones, Prada and Snuggles. At the same time, its biggest customer, the US, found itself in debt, under-educated, and covered with recreational tattoos. So now what? Will America wallow in mediocrity like Greece or some C-list celebrity? Or, will our legendary ingenuity save us from Tweeting...and eating our way to irrelevance? Econovation is a bold, witty response to those questions that doesn't rely on miracles or government for answers. It challenges business leaders to think differently about the next decade of the US economy and respond with big, sustainable innovations. Written by Steve Faktor, former Vice President of Growth & Innovation and head of the Chairman's Innovation Fund at American Express, Econovation is a trends book on steroids. It's bursting with practical, thought-provoking ideas no executive, entrepreneur or Fed Chairman can afford to miss. Most importantly, Econovation envisions a very different future. It's one ruled by producerism, not consumerism. It's a future in which real innovators must do more than slide a greasy finger over the screen of an iPad. Econovation uncovers opportunities in unexpected

places. You'll learn how to: Capitalize on a market that will go from making nothing to making everything...for China. Use psychological pricing and some crafty tricks from Google to reduce reliance on tapped-out consumers Sell to consumers whose new identities will be based on what they create, not what they buy, click or super-size Seduce a desperate government to finance your business, then feed you pancakes in the morning Motivate tomorrow's employee with social currency instead of the green, depreciating kind Upgrade your business and your kids with a little help from Mormons and kindergartners with hacksaws Econovation is a fresh perspective on a future we've taken for granted. It empowers readers to think big, dream big, and conquer economic conditions that will paralyze others. With a hefty dose of data, humor, and actionable ideas, Econovation offers insight and amusement in one, convenient place - a rare treat for a business book.

Misguided Notions Garrett Williams, 2011-07-22
America's public schools are in decline and in need of urgent reform. Once the envy of the entire world, the American public school system now struggles to keep pace with other industrialized nations and is falling further behind with each passing decade. This disturbing trend raises two important questions: Why did our schools decline? What must we do to make our schools great again? To answer these questions, *Misguided Notions* goes back to the roots of human civilization and retraces the development of education over the last ten thousand years. Along the way, a wise

reformer offers warnings based on his eyewitness accounts of the collapses of history's greatest civilizations. The evidence is clear: when schools discard tried and proven principles of education and when society abandons its core values, both will collapse. The commonsense solutions offered in *Misguided Notions* combine proven old-school educational principles with the advantages of modern technology. Teachers, principals, school board members, parents, community leaders, and politicians perplexed by the lack of answers to the current dilemma in public education can find enlightenment in *Misguided Notions*.
