Metal Sustainability Reed M. Izatt,2016-07-29 The sustainable use of natural resources is an important global challenge, and improved metal sustainability is a crucial goal for the 21st century in order to conserve the supply of critical metals and mitigate the environmental and health issues resulting from unrecovered metals. Metal Sustainability: Global Challenges, Consequences and Prospects discusses important topics and challenges associated with sustainability in metal life cycles, from mining ore to beneficiation processes, to product manufacture, to recovery from end-of-life materials, to environmental and health concerns resulting from generated waste. The broad perspective presented highlights the global interdependence of the many stages of metal life cycles. Economic issues are emphasized and relevant environmental, health, political, industrial and societal issues are discussed. The importance of applying green chemistry principles to metal sustainability is emphasized. Topics covered include: • Recycling and sustainable utilization of precious and specialty metals • Formal and informal recycling from electronic and other high-tech wastes • Global management of electronic wastes • Metal reuse and recycling in developing countries • Effects of toxic and other metal releases on the environment and human health • Effect on bacteria of toxic metal release • Selective recovery of platinum group metals and rare earth metals • Metal sustainability from a manufacturing perspective • Economic perspectives on sustainability, mineral development, and metal life cycles • Closing the Loop – Minerals Industry Issues The aim of this book is to improve awareness of the increasingly important role metals play in our high-tech society, the need to conserve our metal supply throughout the metal life cycle, the importance of improved metal recycling, and the effects that unhindered metal loss can have on the environment and on human health.

International Register of Ornamental Plant Cultivars: Woody Plants Laurence C. Hatch,Mark Summers,2017-02-19 This is the November 2017 register of all new ornamental or landscape tree, shrub, conifer, and vine cultivar submitted or registered in the Open Registration Of Cultivars (OROC)(pronounded OH-rock) from 2013 to late 2017. OROC was formed to remedy the lack of an worldwide catalog of new cultivars because existing patent, trademark, and ICRA agencies barely account for 5% of the available new material. By reason, patented plants are only those likely to be very popular or from larger firms who can pay the free, not collector's items, most university items, nor smaller nurseries.

The Law of Interactions Between International Organizations Henner Gött,2021-02-02 The book analyses how international law addresses interactions between international organizations. In labour governance, these interactions are ubiquitous. They offer each organization an opportunity to promote its model of labour governance, yet simultaneously expose it to adverse influence from others. The book captures this ambivalence and examines the capacity of international law to mitigate it. Based on detailed case studies of mutual influence between the International Labour Organization, the World Bank, and the Council of Europe, the book offers an in-depth analysis of the pertinent law and its key challenges, both at institutional and inter-organizational level. The author envisions a law of inter-organizational interactions as a normative framework structuring interactions and enhancing the effectiveness and legitimacy of multi-institutional governance.

Care Work and Care Jobs for the Future of Decent Work Laura Addati,International Labour Office,2018 The report analyses the ways in which unpaid care work is recognised and organised, the extent and quality of care jobs and their impact on the well-being of individuals and society. A key focus of this report is the persistent gender inequalities in households and the labour market, which are inextricably linked with care work. These gender inequalities must be overcome to make care work decent and to ensure a future of decent work for both women and men. The report contains a wealth of original data drawn from over 90 countries and details transformative policy measures in five main areas: care, macroeconomics, labour, social protection and migration. It also presents projections on the potential for decent care job creation offered by remedying current care work deficits and meeting the related targets of the Sustainable Development Goals.

ANOTHER JESUS, a Different Spirit, a Different Gospel Steven H. Propp,2011-12-13 It's the Christmas season—“the most wonderful time of the year” for most people in River City, California. But for Jehovah's Witnesses Lawrence and Brad, it's a time for them to try to explain “the truth” about this holiday season to the people of the community. Their earnest efforts may earn them ridicule, disagreement, or a door slammed rudely in their faces, but they persist—and are sometimes able to find a mind and heart receptive to their urgent message about Jehovah's coming Kingdom. Whereas for Elders Skousen and Marshall—two Latter-day Saint (Mormon) missionaries—the season is another opportunity to share their Church's distinctive interpretation of the Christian gospel; but their efforts are often rebuffed, as well. In the course of their work, these two pairs of men engage in dialogue with traditional Christians, as well as members of the Church of Christ; the Community of Christ (RLDS); Seventh-day Adventists; and “Oneness” Pentecostals—not to mention skeptics, atheists, and the increasing numbers of people who lack any particular religious beliefs. But when a local church brings in a researcher to give a series of lectures on “Cults”—and specifically targeting the Jehovah's Witnesses and Mormons—a confrontation is ensured, where theological and biblical concepts collide in a public forum. Who, if anyone, really has “the Truth”? Can one still discover the “true meaning of Christmas” in the midst of passionate disagreements over the validity of the holiday season? Are objections raised about the secularization and rampant commercialism of the modern celebration valid? Spend a holiday season (or any other season) with some interesting and intellectually-stimulating characters, as they explore these and other challenging questions. (Readers of the author's earlier novel, A Multicultural Christmas, will be pleased to see a brief reappearance of two characters from that book.)

Trafficking Justice Lauren A. McCarthy,2015-11-16 In response to a growing human trafficking problem and domestic and international pressure, human trafficking and the use of slave labor were first criminalized in Russia in 2003. In Trafficking Justice, Lauren A. McCarthy explains why Russian police, prosecutors, and judges have largely ignored this new weapon in their legal arsenal, despite the fact that the law was intended to make it easier to pursue trafficking cases.Using a combination of interview data, participant observation, and an original dataset of more than 5,500 Russian news media articles on human trafficking cases, McCarthy explores how trafficking cases make their way through the criminal justice system, covering multiple forms of the crime—sexual, labor, and child trafficking—over the period 2003–2013. She argues that to understand how law enforcement agencies have dealt with trafficking, it is critical to understand how their institutional machinery—the incentives, culture, and structure of their organizations—channels decision-making on human trafficking cases toward a familiar set of routines and practices and away from using the new law. As a result, law enforcement often chooses to charge and prosecute traffickers with related crimes, such as kidnapping or recruitment into prostitution, rather than under the 2003 trafficking law because these other charges are more familiar and easier to bring to a successful resolution. In other words, after ten years of practice, Russian law enforcement has settled on a policy of prosecuting traffickers, not trafficking.

How to Achieve Inclusive Growth Valerie Cerra,Barry Eichengreen,Asmaa El-Ganainy,Martin Schindler,2021-12-23 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Rising inequality and widespread poverty, social unrest and polarization, gender and ethnic disparities, declining social mobility, economic fragility, unbalanced growth due to technology and globalization, and existential danger from climate change are urgent global concerns of our day. These issues are intertwined. They therefore require a holistic framework to examine their interplay and bring the various strands together. Leading academic economists have partnered with experts from several international institutions to explain the sources and scale of these challenges. They gather a wide array of empirical evidence and country experiences to lay out practical policy solutions and to devise a comprehensive and unified plan of action for combatting these economic and social disparities. This authoritative book is accessible to policy makers, students, and the general public interested in how to craft a brighter future by building a sustainable, green, and inclusive society in the years ahead.

Connectives in the History of English Ursula Lenker,Anneli Meurman-Solin,2007-07-13 Clausal connection is one of the key building blocks of language and thus a field where a wide range of syntactic, semantic, pragmatic and cognitive phenomena meet. The availability of large databases as well as considerable advances in corpus-linguistic methods have strengthened the interest in the history of features linking clauses or larger chunks of text. The papers in this volume combine a thorough corpus-based analysis of the history of individual connectives, their co-occurrence patterns, and patterns of variation and change from both intra- and inter-systemic perspectives with a variety of methodological tools, ranging from sophisticated methods of grammatical analysis to pragmatics, text linguistics and discourse analysis. Drawing on quantitatively and qualitatively improved data, the studies reconstruct the history of a wide range of connectives in English from various new theoretical perspectives.
