Bridge Collapse Frequencies versus Failure Probabilities Dirk Proske,2018-02-22 This monograph provides a comparative study between failure probabilities and collapse frequencies in structural bridge engineering. The author presents techniques to resolve and extend the limitations of both parameters, taking also into account the time dependency of both parameters. The book includes available data and case studies and thus presents patterns to identify potential weaknesses and challenges in bridge maintenance. The target audience primarily comprises practicing engineers in the field of bridge engineering, but the book may also be beneficial for academic researchers alike.

Oxford Desk Reference: Acute Medicine Richard Leach,Kevin Moore,Derek Bell,2016-06-02 In this era of evidence-based medicine, one of the biggest challenges confronting acute medicine clinicians is keeping abreast with the rapidly changing recommendations that guide clinical practice. Oxford Desk Reference: Acute Medicine allows easy access to evidence-based materials on commonly encountered acute medical problems to ensure the optimum management of the acutely unwell patient. Collating all the research-based guidelines and protocols in one easily accessible place and presenting it in a uniform style, this practical book is hugely advantageous for a busy clinician as it is not always easy to access research-based guidelines and protocols when needed in the clinic. The book is designed so that each subject forms a self-contained topic in its own right. This makes the information simple to find, read, and absorb, so that the book can be consulted in the clinic or ward setting for information on the optimum management of a particular condition. Edited by three experts in acute medicine, this book should never be far from the acute medicine clinician's side.

Visual Informatics: Bridging Research and Practice Halimah Badioze Zaman,Peter Robinson,Maria Petrou,Patrick Olivier,Heiko Schröder,2009-11-14 Visual informatics is a field of interest not just among the information technology and computer science community, but also other related fields such as engineering,

me- cal and health informatics and education starting in the early 1990s. Recently, the field is gaining more attention from researchers and industry. It has become a mul- disciplinary and trans-disciplinary field related to research areas such as computer vision, visualization, information visualization, real-time image processing, medical image processing, image information retrieval, virtual reality, augmented reality, - pressive visual mathematics, 3D graphics, multimedia-fusion, visual data mining, visual ontology, as well as services and visual culture. Various efforts has been - vested in different research, but operationally, many of these systems are not pro- nent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated. It is for this reason that the Visual Informatics Research Group from Universiti - bangsaan Malaysia (UKM) decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world, namely, Asia, Europe, Oceania, and USA. This first International Visual Informatics Conference (IVIC 2009) was conducted collaboratively, by the visual informatics research community from the various public and private institutions of higher learning in Malaysia, and hosted by UKM.

Student Assessment Debra J. Dirksen,2013-11-01 When playing video games, players are able to press the reset button when something goes wrong and realize they are missing an essential skill needed to win the game. In education, we can use formative assessment as a means for the student to press the virtual reset button. Educators can ensure that students gain the skills needed to be successful learners in their classroom. In this book, the author provides strategies and techniques, such as the use of graphic organizers, quick writes, and journaling, to be used as formative assessments. Specific information about each tool and recommendations for data analysis and implementation are provided, helping teachers to implement formative assessment effectively and efficiently and allow their students to "preset the reset button" and master the skills they need to be successful in the classroom.

Pathophysiology and Care Protocols for Nursing Management, An Issue of Nursing Clinics Lynn C. Parsons,2016-01-07 Nursing is an evolving profession that requires continued knowledge updates in formulating a foundation for practice. In order to promote patient safety and satisfaction, it is imperative that

nurses monitor publications and increase their knowledge base. Each patient is different; each care management situation requires an individualized plan of care. These require the nurse to develop a personal framework for practice that continually develops from this information. This mandates an evolving knowledge base which this edition will supply for nurses who work to deliver care that is research based and protocol driven. This issue of Nursing Clinics will be both timely and relevant as it will combine two clearly important topics for nurses in care management, pathophysiological updates as well as research based protocols that are important to continuity of validated evidence based care delivery. This will give nurses across organizations the opportunity to see care from a perspective of patient wholeness and not truncate care in order to address total components. With care reimbursement dependent on outcomes, it is important for the nurse to see care as a continuum and not finite. This issue will give nurses this perspective.

Business Ethics K. Praveen Parboteeah,John B. Cullen,2013-04-12 Business Ethics provides a thorough review and analysis of business ethics issues using several learning tools: Strategic Stakeholder Management as the Theme: All chapters use a strategic stakeholder approach as a unifying theme. The text is thus the first text that adopts this approach. Most business ethics scholars and practitioners agree that successful ethical companies are the ones that can strategically balance the needs of their various stakeholders. By adopting this approach, students will be able to see how the various aspects of business ethics are connected. Theory-based and Application-based: All chapters have important applicable theories integrated with discussion of how such theories apply in practice. Unlike other texts that are either too theoretical or too practical, this text provides the appropriate blend of theory and practice to provide deeper insights into the concepts covered in the chapter. Global Perspective: Unless most other texts, this text provides a global perspective on business ethics. Most chapters include material pertaining to ethics in global contexts. Included are cases about companies in a wide range of countries including Japan, U.K., China and India among many others. Cases: The text contains over 30 real world global cases. Each chapter ends with a short two page case as well as a longer case that varies in length. Each has discussions questions at the end. Finally each of the four parts ends with a Comprehensive Case; proven teaching cases from The Ivey School and other sources.

A Clinical Guide to Organisational Health Cecilia Dean,2015-06-18 Is your organisation healthy enough to survive and operate effectively? Popular organisational health checks generally focus on a company's financial status and its ability to compete in the market. In the human body, healthy functioning of all the organs comes before addressing competitive fitness, and this should also be the case with organisations. This book accepts the similarity between the functioning of living organisms and organisations as proposed by functionalists. This allows the adoption of a holistic diagnostic model, as used by medical practitioners, in order to determine an overall perspective of the state of health of an organisation. The model explores and diagnoses the functional categories of Survival, Protection, Operations, Information, Language and Strategy (SPOILS), before combining the health prognosis with fitness programmes. A single case study, based on an actual business, demonstrates the usage of the diagnostic model throughout the book and forms a link bringing the functions together.
