Enyo Peter Hulsman, 2018-04-03 “A savage, gloomy murder tale that captivates with graceful prose and relentless protagonists.” – Kirkus Reviews When retired FBI agent Karen McIntyre is hired to look into a string of grisly murders, a trail of sinister secrets leads her down the twisted trenches of a world shunned by society. From the torrid streets of Honduras to the sleepy backyards of small-town Appalachia fragments of a brutal reality come to light, and the picture of a killer emerges. But the closer Karen comes to the truth, the more the lines separating criminal from victim start to blur. Caught on the crossroads of murder and retribution, a collision becomes inevitable.

Walter Harper, Alaska Native Son Mary F. Ehrlander, 2017 Walter Harper, Alaska Native Son illuminates the life of the remarkable Irish-Athabascan man who was the first person to summit Mount Denali, North America's tallest mountain. Born in 1893, Walter Harper was the youngest child of Jenny Albert and the legendary gold prospector Arthur Harper. His parents separated shortly after his birth, and his mother raised Walter in the Athabascan tradition, speaking her Koyukon-Athabascan language. When Walter was seventeen years old, Episcopal archdeacon Hudson Stuck hired the skilled and charismatic youth as his riverboat pilot and winter trail guide. During the following years, as the two traveled among Interior Alaska's Episcopal missions, they developed a father-son-like bond and summited Denali together in 1913. Walter's strong Athabascan identity allowed him to remain grounded in his birth culture as his Western education expanded and he became a leader and a bridge between Alaska Native peoples and Westerners in the Alaska territory. He planned to become a medical missionary in Interior Alaska, but his life was cut short at the age of twenty-five, in the Princess Sophia disaster of 1918 near Skagway, Alaska. Harper exemplified resilience during an era when rapid socioeconomic and cultural change was wreaking havoc in Alaska Native villages. Today he stands equally as an exemplar of Athabascan manhood and healthy acculturation to Western lifeways whose life will resonate with today's readers.

The New Humanitarians Chris E. Stout Ph.D., 2008-11-30 From Braille Without Borders and Unite for Sight, to Geekcorps and PeaceWorks, humanitarian groups are working worldwide largely in undeveloped countries to better the lives of the residents. Whether they are empowering people with schools for the blind, prosthetic limbs, the devices to understand and use technology, or the information to work for civil peace, the men and women of these agencies offer tremendous talent to their causes, great dedication and, sometimes, even risk their lives to complete their missions. Working in war or civil war zones, humanitarians with nonprofits, non-governmental agencies, and university-connected centers and foundations have been injured, kidnapped, or killed. Now terrorist events and war crimes are more and more often bringing these self-sacrificing workers into the national spotlight by media headlines. Their work is, doubtless, remarkable. And so too are the stories of how they developed - including the defining moments when their founders felt they could no longer stand by and do nothing. In this set of books, founders and top officials from humanitarian organizations established in the last 50 years spotlight how and why they began their organizations, what their greatest victories and challenges have been, and how they run the organizations, down to where they get their funding and how they spend it to grow the group and its efforts. Led by Chris E. Stout, named Humanitarian of the Year by the American Psychological Association, the contributors here come from across training disciplines including psychology, medicine, technology, science, politics, social work, and business. Stout, who has worked in Latin American terrorist zones, in Vietnam, and along the Amazon in Ecuador with Flying Doctors of America, has chosen to feature a sample of humanitarian groups across four primary areas - medicine, environment, education, and social justice. He also concentrates on what he calls guerilla humanitarians - those who step into unsafe or unhealthy conditions despite the dangers. There is also a concentration on those that have been very successful with on-the-ground-guerilla-innovations without a lot of bureaucracy or baloney. Above all, They are rebels with a cause whose actions speak louder than mere words, Stout explains. They have all felt a moral duty to serve as vectors of change. In addition to being psychologically insightful, these volumes hold invaluable practical information.

Paradigm Freeze Harvey Lazar,Pierre-Gerlier Forest,John N. Lavis,John Church,2013-10-24 Why has health care reform proved a stumbling block for provincial governments across Canada? What efforts have been made to improve a struggling system, and how have they succeeded or failed? In Paradigm Freeze, experts in the field answer these fundamental questions by examining and comparing six essential policy issues - regionalization, needs-based funding, alternative payment plans, privatization, waiting lists, and prescription drug coverage - in five provinces. Noting hundreds of recommendations from dozens of reports commissioned by provincial governments over the last quarter century - the great majority to little or no avail - the book focuses on careful diagnosis, rather than unplanned treatment, of the problem. Paradigm Freeze is based on thirty case studies of policy reform in Alberta, Saskatchewan, Ontario, Quebec, and Newfoundland and Labrador. The contributors assess the nature and extent of healthcare reform in Canada since the beginning of the 1990s. They account for the generally limited extent of reform that has occurred, and identify the factors associated with the relatively few cases of large reform. An insightful new perspective on a problem that has plagued Canadian governments for decades, Paradigm Freeze is an important addition to the field of health policy. Contributors include John Church (University of Alberta), Michael Ducie (Alberta Health and Wellness), Pierre-Gerlier Forest (Pierre Elliott Trudeau Foundation), Stephen Tomblin (Memorial University), Jeff Braun Jackson (Ontario Professional Firefighters Association, Burlington, ON), Marie-Pascale Pomey (Université de Montréal), John N. Lavis (McMaster University), Harvey Lazar (Queen's University), Elisabeth Martin (Université Laval),Tom McIntosh (University of Regina), Dianna Pasic (McMaster University), Neale Smith (University of British Columbia), and Michael G. Freeze-Drying/Lyophilization of Pharmaceutical and Biological Products Louis Rey,2016-04-19 Freeze-drying, or lyophilization, is a well established technology used in the preservation of numerous pharmaceutical and biological products. via the direct sublimation of ice. In recent years, this process has met with many changes, as have the regulatio

Deep Freeze Philipp Bagus,David Howden,2011-04-01 It was a modern thriving economy one day, and then, suddenly, the food disappeared from the shelves, the banks closed, and the ships stopped arriving. Iceland in 2008 experienced an unprecedented economic meltdown that struck fear in the hearts of people all over the world. If it could happen here, it could happen anywhere. The economic crisis led to a political crisis, with resignations galore. The whining and wailing about the disaster continues to this day, with most commentators blaming deregulation and the free market. In Deep Freeze, economists Philipp Bagus and David Howden demonstrate that the real cause of the calamity was bad central bank policy. Rates were way too low, banks were too big to fail, housing was implicitly guaranteed, and banks were borrowing short term from abroad to finance long term bonds. The authors discuss the implications of this maturity mismatching and zero in on the central bank policies that encouraged unsound practices. They demonstrate the cause and effect without a shadow of a doubt, using vast amounts of data and a detailed sector-by-sector look at the economy of Iceland. What they find is another instance of the Austrian Theory of the Business Cycle, working itself out in a way that is customized for a time and place. Toby Baxendale writes the introduction to this story that reads like a great novel. It serves as a reminder that central banking policies aren't just about monetary arcana. They affect our lives in profound and sometimes catastrophic ways. The Iceland Freeze is one of the great historical cases that makes Mises's point. Let it always serve as a reminder of what happens when the laws of the market are papered over by politicians and central bankers. This account is likely to remain the definitive one for many years.

Yes, You Can! And Freeze and Dry It, Too Daniel Gasteiger,2011-04-10 Preserving food is hot! The local food movement gains even more popularity as consumers return to vegetable gardening to grow their own food. They increasingly have become interested in the techniques for "putting up" their bounty. Driven by the recession; the need for healthier, chemical-free food,and taste, people everywhere are preserving the abundance of fruits, vegetables, and herbs harvested from their garden (or someone else's). You don't even have to grow your own to preserve freshness; non-gardeners too are learning to preserve with locally grown produce bought from local markets. Targeted at anyone who wants to capture the flavor of freshness, whether it's from making tomato sauce, drying herbs, or preserving jams and jellies.
