Embedded Systems: An Integrated Approach LyLa B. Das, Embedded Systems: An Integrated Approach is exclusively designed for the undergraduate courses in electronics and communication engineering as well as computer science engineering. This book is well-structured and covers all the important processors and their applications in a sequential manner. It begins with a highlight on the building blocks of the embedded systems, moves on to discuss the software aspects and new processors and finally concludes with an insightful study of important applications. This book also contains an entire part dedicated to the ARM processor, its software requirements and the programming languages. Relevant case studies and examples supplement the main discussions in the text.

Urban Walls Andrea Mubi Brighenti, Mattias Kärrholm, 2018-09-03 In recent years, an increasing number of separation walls have been built around the world. Walls built in urban areas are particularly striking in that they have exacted a heavy toll in terms of human suffering. As territorialising devices, walls can be protective, but the protection they grant is never straightforward. This collection invites inquiry into the complexities of the social life of walls, observing urban spaces as veritable laboratories of wall-making – places where their consequences become most visible. A study of the relationship between walls and politics, the cultural meaning of walls and their visibility, whether as barriers or as legible – sometimes spectacular – surfaces, and their importance for social processes, Urban Walls shows how walls extend into media spaces, thus drawing a multidimensional geography of separation, connection, control and resistance. As such, the collection will appeal to scholars of sociology, anthropology, geography, architecture and politics with interests in urban studies and social theory.

Into the Fire Shelley Pacholok, In August 2003, one of the largest wildfires in Canadian history struck near Kelowna, British Columbia and the surrounding Okanagan Valley, causing unprecedented damage. As Shelley Pacholok observes in this innovative study, the turbulence and extreme conditions that followed in the wake of this disaster destabilized an important area of social life – that of gender relations. Into the Fire combines insights from gender studies and disaster studies to explore the extent to which notions of “masculinity” and “femininity” are challenged in the wake of crises. Pacholok focuses on how gender relations were simultaneously sustained and disrupted among those who fought the fire, drawing on media representations as well as interviews with firefighters. Into the Fire illuminates how disasters can serve as catalysts for new patterns of gender, even in highly masculine spaces.

Spatial Auditory Human-Computer Interfaces Jaka Sodnik, Sašo Tomažič, 2015-09-03 This book focuses on a special group of auditory interfaces using spatial sound for the representation of information. The addition of information on the location of a selected sound source or a group of sources shows many advantages over a mere single-channel audio. This survey explains the most important limitations of the human hearing system and the perception of spatial sound. It also includes some technical background and basic processing and programming techniques for the creation and reproduction of spatial sounds with different audio equipment. Spatial auditory interfaces have evolved significantly in the last couple of years and can be found in a variety of environments where visual communication is obstructed or completely blocked by other activities, such as walking, driving, flying, operating multimodal virtual displays, etc. An entire chapter of this survey is dedicated to the most important areas of spatial auditory displays: mobile devices and computers, virtual environments, aircrafts and vehicles, visually impaired and blind computers users, and brain-computer interfaces.

Digital Product Management, Technology and Practice: Interdisciplinary Perspectives Strader, Troy J., 2010-09-30 This book covers a wide range of digital product management issues and offers some insight into real-world practice and research findings on the technical, operational, and strategic challenges that face digital product managers and researchers now and in the next several decades--Provided by publisher.

Throughout Inke Arns, Joseph Auner, 2013 Leading media scholars consider the social and cultural changes that come with the contemporary development of ubiquitous computing. Ubiquitous computing and our cultural life promise to become completely interwoven: technical currents feed into our screen culture of digital television, video, home computers, movies, and high-resolution advertising displays. Technology has become at once larger and smaller, mobile and ambient. In Throughout, leading writers on new media--including Jay David Bolter, Mark Hansen, N. Katherine Hayles, and Lev Manovich--take on the crucial challenges that ubiquitous and pervasive computing pose for cultural theory and criticism. The thirty-four contributing researchers consider the visual sense and sensations of living with a ubicomp culture; electronic sounds from the uncanny to the unremarkable; the effects of ubicomp on communication, including mobility, transmateriality, and infinite availability; general trends and concrete specificities of interaction designs; the affectivity in ubicomp experiences, including performances; context awareness; and claims on the real in the use of such terms as augmented reality and mixed reality.

Places of Learning Elizabeth Ellsworth, 2005-02-01 This book takes a close look at places of learning located outside of schools, yet deeply concerned with the experience of the learning self. It explores what it might mean to think of pedagogy not in relation to knowledge as a thing made, but to knowledge in the making.

Revolutionizing Modern Education through Meaningful E-Learning Implementation Khan, Badrul H., 2016-06-27 It is not enough for an instructor to merely present facts to their students; the presentation of information must be made accessible and understandable in the context of the student. As communication technologies become more widely available, traditional educational institutions are no longer the only source of information. What is now necessary is to reconsider what makes for meaningful education and apply those practices to digital natives. Revolutionizing Modern Education through Meaningful E-Learning Implementation evaluates the means by which online education can be improved and systematically integrated more fluidly into traditional learning settings, with special focus on the ethical, pedagogical, and design aspects of building online courses. This publication aims to elucidate the rewards and follies of online education for educators, administrators, programmers, designers, and students of education.

Handbook of Research on Machine Learning Innovations and Trends Hassanien, Aboul Ella, Gaber, Tarek, 2017-04-03 Continuous improvements in technological applications have allowed more opportunities to develop automated systems. This not only leads to higher success in smart data

analysis, but it increases the overall probability of technological progression. The Handbook of Research on Machine Learning Innovations and Trends is a key resource on the latest advances and research regarding the vast range of advanced systems and applications involved in machine intelligence. Highlighting multidisciplinary studies on decision theory, intelligent search, and multi-agent systems, this publication is an ideal reference source for professionals and researchers working in the field of machine learning and its applications.

Virtual Reality Samuel Greengard,2019-09-10 A comprehensive overview of developments in augmented reality, virtual reality, and mixed reality—and how they could affect every part of our lives. After years of hype, extended reality—augmented reality (AR), virtual reality (VR), and mixed reality (MR)—has entered the mainstream. Commercially available, relatively inexpensive VR headsets transport wearers to other realities—fantasy worlds, faraway countries, sporting events—in ways that even the most ultra-high-definition screen cannot. AR glasses receive data in visual and auditory forms that are more useful than any laptop or smartphone can deliver. Immersive MR environments blend physical and virtual reality to create a new reality. In this volume in the MIT Press Essential Knowledge series, technology writer Samuel Greengard offers an accessible overview of developments in extended reality, explaining the technology, considering the social and psychological ramifications, and discussing possible future directions. Greengard describes the history and technological development of augmented and virtual realities, including the latest research in the field, and surveys the various shapes and forms of VR, AR, and MR, including head-mounted displays, mobile systems, and goggles. He examines the way these technologies are shaping and reshaping some professions and industries, and explores how extended reality affects psychology, morality, law, and social constructs. It's not a question of whether extended reality will become a standard part of our world, he argues, but how, when, and where these technologies will take hold. Will extended reality help create a better world? Will it benefit society as a whole? Or will it merely provide financial windfalls for a select few? Greengard's account equips us to ask the right questions about a transformative technology.

Blended Learning: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2016-08-18 Traditional classroom learning environments are quickly becoming a thing of the past as research continues to support the integration of learning outside of a structured school environment. Blended learning, in particular, offers the best of both worlds, combining classroom learning with mobile and web-based learning environments. Blended Learning: Concepts, Methodologies, Tools, and Applications explores emerging trends, case studies, and digital tools for hybrid learning in modern educational settings. Focusing on the latest technological innovations as well as effective pedagogical practice, this critical multi-volume set is a comprehensive resource for instructional designers, educators, administrators, and graduate-level students in the field of education.

One Giant Leap Charles Fishman,2020-09-22 The New York Times bestselling, “meticulously researched and absorbingly written” (The Washington Post) story of the trailblazers and the ordinary Americans on the front lines of the epic Apollo 11 moon mission. President John F. Kennedy astonished the world on May 25, 1961, when he announced to Congress that the United States should land a man on the Moon by 1970. No group was more surprised than the scientists and engineers at NASA, who suddenly had less than a decade to invent space travel. When Kennedy announced that goal, no one knew how to navigate to the Moon. No one knew how to build a rocket big enough to reach the Moon, or how to build a computer small enough (and powerful enough) to fly a spaceship there. No one knew what the surface of the Moon was like, or what astronauts could eat as they flew there. On the day of Kennedy’s historic speech, America had a total of fifteen minutes of spaceflight experience—with just five of those minutes outside the atmosphere. Russian dogs had more time in space than US astronauts. Over the next decade, more than 400,000 scientists, engineers, and factory workers would send twenty-four astronauts to the Moon. Each hour of space flight would require one million hours of work back on Earth to get America to the Moon on July 20, 1969. “A veteran space reporter with a vibrant touch—nearly every sentence has a fact, an insight, a colorful quote or part of a piquant anecdote” (The Wall Street Journal) and in One Giant Leap, Fishman has written the sweeping, definitive behind-the-scenes account of the furious race to complete one of mankind’s greatest achievements. It’s a story filled with surprises—from the item the astronauts almost forgot to take with them (the American flag), to the extraordinary impact Apollo would have back on Earth, and on the way we live today. From the research labs of MIT, where the eccentric and legendary pioneer Charles Draper created the tools to fly the Apollo spaceships, to the factories where dozens of women sewed spacesuits, parachutes, and even computer hardware by hand, Fishman captures the exceptional feats of these ordinary Americans. “It’s been 50 years since Neil Armstrong took that one small step. Fishman explains in dazzling form just how unbelievable it actually was” (Newsweek).

Power from Powerlessness Laura Evans,2011-05-05 Here, Laura Evans looks at the successful policy interventions by a range of Indian tribes to explain how disadvantaged groups can build capacity and exploit niches in the institutional framework of American federalism to obtain unlikely victories.

Benchmarking in the Public and Nonprofit Sectors Patricia Keehley,Neil Abercrombie,2008-04-15 The first edition of Benchmarking in the Public and Nonprofit Sectors offered public officials and administrators at all levels of government a unique and practical guide to identifying best practices and implementing them in their organizations. Based on the most current research, this new edition of the best-selling guide provides an updated, solution-driven methodology for benchmarking in both the public and nonprofit sectors. Unique in its focus solely on benchmarking, the authors take a step-by-step approach to two benchmarking techniques, differentiating between the two and then providing a new approach to solution-driven benchmarking that requires less time and fewer resources. Benchmarking in the Public and Nonprofit Sectors provides new tools, many updated case studies, and additional examples not only from government and nonprofit agencies, but also from the international community. This important resource will help practitioners implement a quick, proven method as they search for solutions to their most pressing problems. Praise for Benchmarking in the Public and Nonprofit Sectors This is an important management tool for government and nonprofit managers to make their agencies more effective, efficient, and responsive to their constituencies. -W. David Patton, director, Center for Public Policy and Administration, University of Utah
