Changing Welfare Services Michael J Austin, Marvin D Feit, 2013-10-18 Contains field-tested techniques to enhance the effectiveness of your local social services! *Changing Welfare Services: Case Studies of Local Welfare Reform Programs* describes promising programs and practices that have emerged in the United States since the enactment of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. Using case studies, this reference provides important lessons that will help social service directors and staff to develop strategies that will improve local welfare-to-work services. This casebook focuses on the agencies rather than the welfare population, emphasizing the guiding values of these agencies and the lessons they learned. *Changing Welfare Services* explores new approaches to service delivery, with emphasis on removing barriers to work force participation and promoting self-sufficiency through support services. The case studies involve programs focused on working with the community by developing partnerships with local organizations to provide better services. This text emphasizes the organizational changes—such as the development of new training programs, merging employment and social service agencies, and restructuring agency programs to foster collaboration between child welfare services and welfare-to-work programs—that were successful strategies used to implement welfare reform. In *Changing Welfare Services*, you will learn about: the Connections Shuttle and the Guaranteed Ride Home Program—transportation services for welfare-to-work participants the Exempt Provider Training Program— trains Temporary Assistance to Needy Families (TANF) participants and others to launch and improve their own high-quality child care businesses co-location of support services—situating mental health and substance abuse services near the social services agency so TANF participants can make a single visit for all necessary services the Family Loan Program—helps low-income families deal with large or unexpected one-time expenses the JobKeeper Hotline—provides round-the-clock counseling, crisis intervention, and referral services to help participants stay employed and much more! *Changing Welfare Services* shows how these agencies discovered new ways to serve the needs of low-income residents and offers you a variety of inventive techniques for improving your own agency's support for welfare recipients. Enhanced with tables, figures, and appendixes, this practitioner-oriented casebook is a much-needed complement to the many quantitative studies of the welfare population. This book is a valuable resource for state and local human service administrators and staff, policymakers, and university faculty and students of public policy.

Nuclear Theory Degree Zero: Essays Against the Nuclear Android John Kinsella, Drew Milne, 2021-05-13 Nuclear Theory Degree Zero: Essays Against the Nuclear Android investigates the threat conveyed and maintained by the nuclear cycle: mining, research, health, power generation and weaponry. Central to this polyvalent 'report' on the infiltration of our lives and control over them exerted by the industrial-military complex, are critiques of the creation, storage and use of atomic weapons, the exploitation of Australian Aboriginal people and their lands through British atomic testing in the 1950s, and an exposé of a language of denial in the world of nuclear mining/energy/military usages. 'Nuclear' is also parenthetically investigated in its function as extended metaphor and question for poetry and poetics. Key is a consideration of the use of the language of the 'atomic' in cultural spaces, and in 'the arts'. Indigenous land-rights claims in the face of uranium mining, the semantics of waste and of the glib usage by nuclear power companies of the fact of global warming to suit their own corrosive agendas. The triumphalism of scientific and cultural discourse around 'nuclear' and the threats by nuclear fission are by association brought into question. The nuclear cycle throws the whole future of human beings into doubt, and this book seeks to assemble new resources of resistance through creative and critical mediums, including poetry and poetics. The chapters in this book were originally published as a special issue of *Angelaki*.

Museums and Maori Conal McCarthy, 2016-06-16 This groundbreaking book explores the revolution in New Zealand museums that is influencing the care and exhibition of indigenous objects worldwide. Drawing on practical examples and research in all kinds of institutions, Conal McCarthy explores the history of relations between museums and indigenous peoples, innovative exhibition practices, community engagement, and curation. He lifts the lid on current practice, showing how museum professionals deal with the indigenous objects in their care, engage with tribal communities, and meet the needs of visitors. The first critical study of its kind, *Museums and Maori* is an indispensable resource for professionals working with indigenous objects, indigenous communities and cultural centers, and for researchers and students in museology and indigenous studies programs.

Eurasia Rising Georgeta Pourchot, 2008-07-30 Although the score of countries comprising Russia's near abroad (the former non-Russian Soviet republics) and far abroad (the former non-Russian Warsaw Pact states) are behaving with variably increasing independence in their domestic and foreign policies, Russia continues to regard them as remaining within the same core-periphery sphere of influence formerly exerted by the Soviet Union within the same geographic space. Russia misinterprets bids by these countries to adopt liberalizing structural reforms and to join Euro-Atlantic organizations as foreign-inspired and inimical to Russia's security. Whether Russia can learn to recognize that such bids are in fact natural developments of national self-interest will determine whether healthy and mutually beneficial bilateral relations can develop between Russia and the states of her near and far abroad in the 21st century. No previous study of the dynamics of post-Soviet assertive sovereignty has as broad a geographic scope as *Eurasia Rising*, which considers the whole of Post-Soviet Space: DT Belarus, Moldova, Ukraine DT_ Estonia, Latvia, Lithuania DT Armenia, Azerbaijan, Georgia DT Kazakhstan, Kyrgyzstan, Tajikistan,

The Routledge Handbook to Regional Development in Central and Eastern Europe Gábor Lux,Gyula Horváth,2017-07-06
Twenty-five years into transformation, Central and Eastern European regions have undergone substantial socio-economic restructuring, integrating into European and global networks and producing new patterns of regional differentiation and development. Yet post-socialist modernisation has not been without its contradictions, manifesting in increasing social and territorial inequalities. Recent studies also suggest there are apparent limits to post-socialist growth models, accompanying a new set of challenges within an increasingly uncertain world. Aiming to deliver a new synthesis of regional development issues at the crossroads between ‘post-socialism’ and ‘post-transition’, this book identifies the main driving forces of spatial restructuring in Central and Eastern Europe, and charts the different regional development paths which take shape against the backdrop of post-crisis Europe. A comparative approach is used to highlight common development challenges and the underlying patterns of socio-economic differentiation alike. The issues investigated within the Handbook extend to a discussion of the varied economic consequences of transition, the social structures and institutional systems which underpin development processes, and the broadly understood sustainability of Central and Eastern Europe’s current development model. This book will be of interest to academics and policymakers working in the fields of regional studies, economic geography, development studies and policy.

Internal and External Causes of Language Change Nikolaos Lavidas,Alexander Bergs,Elly van Gelderen,Ioanna Sitaridou,2023-11-26 This volume collects ten studies that propose modern methodologies of analyzing and explaining language change in the case of various morpho-phonological and morpho-syntactic characteristics. The studies were first presented in the fourth, fifth and sixth workshops at the “Language Variation and Change in Ancient and Medieval Europe” summer schools, organized on the island of Naxos, Cyclades, Greece and online between 2019 and 2021. The book is divided into two parts that both focus on modern tools and methodologies of analyzing and accounting for language change. The first part focuses on common directions of change in Indo-European languages and beyond, and the second part emphasizes explanations that reveal the role of language contact. The volume promotes a dialogue between approaches to language change having their starting point in structural and typological aspects of the history of languages on the one hand, and approaches concentrating on external factors on the other. Through this dialogue, the volume enriches knowledge on the contrast or complementarity of internally- and externally-motivated causes of language change.

Leading Rogue State Judith R. Blau,David L. Brunsma,Alberto Moncada,Catherine Zimmer,2015-12-03 Most Americans would be surprised to learn that their government has declined to join most other nations in UN treaties addressing inadequate housing, poverty, children's rights, health care, racial discrimination, and migrant workers. Yet this book documents how the U.S. has, for decades, declined to ratify widely accepted treaties on these and many other basic human rights. Providing the first comprehensive topical survey, the contributors build a case and specific agendas for the nation to change course and join the world community as a protector of human rights.

The Province of Burma Alleyne Ireland,1907 Alleyne Ireland (1871-1951) was a Fellow of the Royal Geographic Society in London who, in 1901, was appointed by the University of Chicago to head a commission to study colonial administration in the Far East. Ireland's first major project, published in 1907, was this exhaustive, two-volume study of Burma, at the time under British rule as a province of the Indian Empire. Volume one contains a general description of Burma, a history of Britain's acquisition of the colony, and chapters on the people, government, general administration, civil service, police administration, judicial administration, prison administration, and educational system. Volume two is devoted to economic and administrative affairs, including financial administration, the land revenue system, public works, trade and shipping, and the administration of forests, towns, villages, and harbors. Twenty-one appendices provide additional detail, including economic and demographic statistics, the texts of treaties, agreements, and reports, a bibliography, and a glossary of Indian and Burmese words. At the end of volume one is a large foldout map of Burma by Edinburgh mapmakers John Bartholomew & Co.
