The Enigmatic Netherworld Books of the Solar-Osirian Unity John Coleman Darnell,2004 In Egypt, from the Old to the New Kingdom, enigmatic texts were created on the basis of non-standardized lists of characters and phonetic signs, the exact principles of which are still unclear to this day. For the first time, this study examines in detail the three most comprehensive known inscription texts from the New Kingdom, which were discovered in the tombs of Tutenchamun, Ramses VI and Ramses IX. Darnell shows that these three texts have a theological, iconographic and formal connection, and calls them collectively the Book of the Solar-Osirian Unity. Differentiated and lively, he presents the content and theological peculiarities of these texts that deal with the afterlife with each other and in relation to other enigmatic texts of the new as well as the Middle and Old Kingdom.

The United States and Iran Sasan Fayazmanesh,2008-03-31 When and why did the United States policy of containment of Iran come about? How did it evolve? Where is it going? Much has been said about the US policy of dual containment, particularly as it pertains to Iraq. However, there has been little in-depth analysis of this policy when it comes to Iran. Sasan Fayazmanesh explores this often neglected subject by analyzing the history of this policy. The analysis includes the role that the Carter and Reagan Administrations played in the Iran-Iraq war, the numerous sanctions imposed on Iran by the Clinton Administration and the aggressive and confrontational policy toward Iran adopted by the George W. Bush Administration after the events of September 11, 2001. This topical read synthesises a range of primary sources, including firsthand reports, newspaper articles and electronic media, and presents a coherent analysis of the ebbs and flows in the US thinking on Iran and Iraq.
