Information Technology and the World of Work Daphne Gottlieb Taras,James T. Bennett,Anthony M. Townsend,2017-07-12 Information technologies have become both a means and an end, transforming the workplace and how work is performed. This ongoing evolution in the work process has received extensive coverage but relatively little attention has been given to how changing technologies and work practices affect the workers themselves. This volume specifically examines the institutional and social environment of the workplaces that information technologies have created.

Feature Selection and Enhanced Krill Herd Algorithm for Text Document Clustering Laith Mohammad Qasim Abualigah,2018-12-18 This book puts forward a new method for solving the text document (TD) clustering problem, which is established in two main stages: (i) A new feature selection method based on a particle swarm optimization algorithm with a novel weighting scheme is proposed, as well as a detailed dimension reduction technique, in order to obtain a new subset of more informative features with low-dimensional space. This new subset is subsequently used to improve the performance of the text clustering (TC) algorithm and reduce its computation time. The k-mean clustering algorithm is used to evaluate the effectiveness of the obtained subsets. (ii) Four krill herd algorithms (KHAs), namely, the (a) basic KHA, (b) modified KHA, (c) hybrid KHA, and (d) multi-objective hybrid KHA, are proposed to solve the TC problem; each algorithm represents an incremental improvement on its predecessor. For the evaluation process, seven benchmark text datasets are used with different characterizations and complexities. Text document (TD) clustering is a new trend in text mining in which the TDs are separated into several coherent clusters, where all documents in the same cluster are similar. The findings presented here confirm that the proposed methods and algorithms delivered the best results in comparison with other, similar methods to be found in the literature.

Critical Thinking for Managers Radu Atanasiu,2021-05-10 This book discusses critical thinking as a tool for more compassionate leadership, presenting tried and tested methods for managing disagreement, for anticipating and solving problems, and for enhancing empathy. Employing a lighter tone of voice than most management books, it also shows how and when less-than-rational mechanisms such as intuition and heuristics may be efficient decision-making tools in any manager's toolbox. Critical thinking is useful for analyzing incoming information in the context of decision-making and is crucial for structuring outgoing information in the context of persuasion. When trying to convince a client to buy a service, an executive board to fund a project, or a colleague to change a procedure, managers can use the simple step-by-step guides provided here to prepare for successful meetings and effective pitches. Managerial thinking can be steadily improved, using a structured process, especially if we learn to think about our thinking. This book guides current and would-be managers through this process of improving and metathinking, in connection with decision-making and persuasion. Using examples from business, together with research insights from Behavioral Economics and from Management and Organizational Cognition, the author illustrates common pitfalls like hidden assumptions and cognitive biases, and provides easy-to-use solutions for testing hypotheses and resolving dilemmas.

Working in Organisations Andrew Kakabadse,John Bank,2018-12-20 First published in 2004, this volume recognises that, as society changes, so must its organisations; as organisations change, so must their management competencies. The requirement for organisations to be flexible, innovative and adaptable in environments of increasing complexity and uncertainty is also a requirement of any organisation's most essential resource: its people. They not only work for the organisation – they are the organisation. The second edition of this highly successful book provides a comprehensive and thought-provoking examination of the operational and strategic skills, demands and responsibilities of the modern workforce, and in particular its management. Reflected here are the manager's new and changing priorities. Attention is given to the manager's role, the motivation to work and succeed, and teamworking. Also emphasised is the new psychological contract, highlighting reliance on self whilst maintaining sensitivity to diversity concerns. Providing clear and decisive leadership requires the projection of a vision that captures the imagination of others, but inevitably managers face conflict and adversity. Working in Organisations therefore discusses how power and politics can be moulded to positive advantage. The challenges facing organisations go beyond cost and profitability, as political and

environmental challenges have forcefully entered into managerial responsibility. The book asks 'What is the ultimate purpose and contribution of organisations?' and highlights profound governance and ethics concerns. The design of organisations is also explored, and how creating appropriate structures will in turn focus resources to achieve desired ends. This book provides a broad coverage of key issues, ranging from a close examination of the manager's job to a discussion of the corporate and social forces that determine our lives. Written in an easy-to-read style and bursting with case examples, Working in Organisations acts as mentor and guide to those whose quest is for ever greater sustainable accomplishment. Written by a distinguished team of authors, this book will continue to be welcomed as the definitive text on organisational culture and change for academics, researchers and managers around the world.
