Googling Security Greg Conti, 2008-10-10 What Does Google Know about You? And Who Are They Telling? When you use Google's "free" services, you pay, big time—with personal information about yourself. Google is making a fortune on what it knows about you...and you may be shocked by just how much Google does know. Googling Security is the first book to reveal how Google's vast information stockpiles could be used against you or your business—and what you can do to protect yourself. Unlike other books on Google hacking, this book covers information you disclose when using all of Google's top applications, not just what savvy users can retrieve via Google's search results. West Point computer science professor Greg Conti reveals the privacy implications of Gmail, Google Maps, Google Talk, Google Groups, Google Alerts, Google's new mobile applications, and more. Drawing on his own advanced security research, Conti shows how Google's databases can be used by others with bad intent, even if Google succeeds in its pledge of "don't be evil." Uncover the trail of informational "bread crumbs" you leave when you use Google search How Gmail could be used to track your personal network of friends, family, and acquaintances How Google's map and location tools could disclose the locations of your home, employer, family and friends, travel plans, and intentions How the information stockpiles of Google and other online companies may be spilled, lost, taken, shared, or subpoenaed and later used for identity theft or even blackmail How the Google AdSense and DoubleClick advertising services

could track you around the Web How to systematically reduce the personal information you expose or give away This book is a wake-up call and a “how-to” self-defense manual: an indispensable resource for everyone, from private citizens to security professionals, who relies on Google. Elections during emergencies and crises Toby S. James, Alistair Clark, Erik Asplund, 2023-05-08 Elections often have to be held in emergency situations. The Covid-19 pandemic was one of the most serious emergency situations that the world has seen. The

rapid spread of the virus presented a huge humanitarian threat—but also an unparalleled challenge to electoral stakeholders globally seeking to protect electoral integrity during times of uncertainty. This volume identifies how the pandemic affected electoral integrity, what measures were put in place to protect elections and what worked in defending them. It brings together a comprehensive set of 26 country case studies to explore how elections were affected on the ground, what measures were put in place and what worked. These case studies are of elections which took place in the eye of the storm when practitioners and policymakers were operating under uncertainty and without the benefit of hindsight. To learn lessons in a more systematic way, this volume also provides a thematic analysis of electoral integrity during the pandemic using crossnational studies. This provides the big picture for policymakers, practitioners and academics looking back at the crisis. The volume therefore seeks to contribute towards the future development of policy and practice. However, it does so by using academic research methods and concepts which enable greater confidence in the policy lessons, as well as contributing directly to the scholarship on democracy, democratization and elections. The volume includes 11 areas of recommendation based on the evidence collected in this volume to protect electoral integrity in any future emergency situation.

Dark Mission Richard C. Hoagland, Mike Bara, 2009-09-01 The New York Times bestseller about the strange history of NASA and its cover-ups regarding its origins and extraterrestrial architecture found on the moon and Mars is even more interesting in its new edition. Authors Richard C. Hoagland and Mike Bara include a new chapter about the discoveries made by ex-Nazi scientist and NASA stalwart Wernher von Braun regarding what he termed alternate gravitational solutions, or the rewriting of Newtonian physics into hyperdimensional spheres.

Electronic Resumes & Online Networking Rebecca Smith, 2000 The ways in which job hunters can market their resumes and advertise their talents have grown immensely with the advent of the Internet. This second edition of *Electronic Resumes and Online Networking* shows how to become Internet savvy to gather information, find the right job, and submit a resume online.

Cyber Worship in Multifaith Perspectives Mohamed Taher, 2006 *Cyber Worship in Multifaith Perspectives*, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja,

cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

Muslim Women in War and Crisis Faegheh

Shirazi, 2010-05-01 Representing diverse cultural viewpoints, Muslim Women in War and Crisis collects an array of original essays that highlight the experiences and perspectives of Muslim women—their dreams and nightmares and their daily struggles—in times of tremendous social upheaval. Analyzing both how Muslim women have been represented and how they represent themselves, the authors draw on primary sources ranging from poetry and diaries to news reports and visual media. Topics include: Peacebrokers in Indonesia Exploitation in the Islamic Republic of Iran Chechen women rebels Fundamentalism in Afghanistan, from refugee camps to Kabul Memoirs of Bengali Muslim women The 7/7 London bombings, British Muslim women, and the media Also exploring such images in the United States,

Spain, the former Yugoslavia, Tunisia, Algeria, Lebanon, and Iraq, this collection offers a chorus of multidimensional voices that counter Islamophobia and destructive clichés. Encompassing the symbolic national and religious identities of Muslim women, this study goes beyond those facets to examine the realities of day-to-day existence in societies that seek scapegoats and do little to defend the victims of hate crimes. Enhancing their scholarly perspectives, many of the contributors (including the editor) have lived through the strife they analyze. This project taps into their firsthand experiences of war and deadly political oppression.
