*Secrets & Protection* Phrantceena Halres, 2020-12-21 It Starts with You. We are on the verge of a critical movement in this country, one where each individual will start to recognize how easy it is to make a difference in the security of our country. This collective consciousness will change the face of national security. This is why it is important to understand that YOU, as well as every other US citizen, can make a difference. Very few Americans are aware of the fact that 12 million violent crimes are committed per year in the United States, with an estimated one fifth of the population falling victim to these crimes. Aside from that, it is well-known that the threat of terrorism is always prevalent, allusive and in many cases, invisible. We have domestic threats from criminals, as well as foreign threats from terrorists. But how can an individual citizen make a real difference in the protection of America? It can be done and it is easier than you think. Liberty and security do not compete in a zero-sum game. Our freedoms are the very foundation of

our strength and security. But the very definition of security usually requires a few questions that need to be answered before security measures are put in place. Who or what are we trying to protect? Who or what are we trying to protect it from? It stands to reason that, in light of the recent shootings, bombings and other acts of violence, we have a lot more to protect than just ourselves. We have families, neighborhoods, communities, businesses and the nation that all need our attention. That's why it is so important for us to rededicate efforts to our personal and national security to ensure that what transpires in the course of our daily lives is protected. There exist various types of safety. There is personal safety and there is community safety, the latter of which falls under local, state and national security. To begin with personal safety, experts for decades have long studied what makes an individual more likely to be the target of any given crime. As for national security, those aims and targets are more difficult to see, but can also be deterred with the same awareness. I want to help you understand one main foundation of personal and community safety, which exists in all of us. It's that innate feeling we have when we know something isn't right in a situation or an environment. It is the hair that stands up on our neck when we know that danger is imminent. I call this our sixth sense, which is the ability to intrinsically perceive possible threats without consciously knowing where that threat is coming from. Think about it. How many of us have the ability to naturally sense when something feels off, yet these feelings are often dismissed or mocked? Humans are the only animals who sense danger, yet walk right into it. Rather than offend the person who has triggered our fear instinct, we usually choose being polite over being safe. For example, we might politely enter an elevator with a person who, for some unknown reason, has triggered our fear instinct rather than risk appearing rude and waiting for the next elevator. What people do not know is that there is now solid scientific evidence that their sixth sense can save their life. Instinct Science is a rapidly emerging branch of research that studies the connection between subtle feelings and impending danger. Consider that even the U.S. Navy includes the word 6th sense in their combat training briefs, citing that some soldiers use it to feel danger before an enemy attack. This may sound contrary to your conditioned beliefs of practicality and polite well-being, but how many times have you heard crime victims report having a gut instinct or warning prior to the actual incident. The subsequent ignoring of these gut instincts was followed with a crime that could have otherwise been avoided or minimized had these gut instincts or warnings been heeded and respected as possible truths.

**Diving Into the Bitstream** Barry M. Dumas, 2012-11-12 Nationwide, and indeed worldwide, there has been a growing awareness of the importance of access to information. Accordingly, information technology (IT), broadly defined and its role beyond the internal workings of businesses has leapt into the social consciousness. Diving into the Bitstream distinguishes itself by weaving together the concepts and conditions of IT. What distinguishes these trends is their focus on the impacts of IT on societies, and the responsibilities of IT's creators and users. The author pulls together important, often complex issues in the relationships among information, information technologies, and societal constructs. The text explores a synopsis of these issues that are foundations for further consideration.

**Behind the Private Eye** Chris Cooper, 2005 This book is part true-crime novel, and part textbook. It was written specifically about surveillance, as conducted by private investigators. It's virtually an industry bible, and contains an incredible volume of highly detailed how-to techniques, for virtually every area of surveillance. It covers how to get information out of people under pretext, how to follow people on foot or by car. What to expect and even how to think as a PI, in order to get great results. The book covers everything including: Training courses and licensing Job preparation Conduct of surveillance operations Special techniques used by professionals Following on foot, car, bus, train, taxi Working in specialist areas (buildings, apartments, shopping centres etc) While an invaluable resource for any potential recruit to the PI industry, this book is also an excellent resource for experienced PI's as well. **99 Jumpstarts to Research** Peggy Whitley, Susan Williams Goodwin, Catherine C. Olson, 2010-08-16 This book provides research assistance for 99 current and provocative issues students can use to write a brief argumentative paper. In 2030, it is projected that 65 percent of the population will be over 65. The U.S. Government Census Bureau reveals that over an adult's working life, college graduates typically earn close to \$1 million more than high school graduates. About 43 percent of American families spend more than they earn each year. These three factoids represent a tiny fraction of the potential research subjects contained in *99 Jumpstarts to Research: Topic Guides for Finding Information on Current Issues*, Second Edition, a completely revised follow-up to the original edition. Every jumpstart—each focused upon a current, timely issue—contains ideas for narrowing the topic, research keywords, suggested best books and databases, and Internet sites. This book supports both faculty and students in identifying compelling topics, effectively evaluating and selecting resources in today's information-overload world, and deriving enjoyment from the research and writing process.

*Network World*, 1997-01-06 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

*The Rosemary Nelson Inquiry Report* Rosemary Nelson Inquiry, 2011 Rosemary Nelson, a solicitor in Lurgan, Northern Ireland, was murdered by a bomb exploding under her car near her home in March 1999. There were claims the police and government ignored a series of warnings about threats against her: concerns about her safety had been raised over a two-year period before she was killed. She had become a hate figure for hardline loyalists - and reportedly some police officers - because of some of the Republican clients she represented. It was claimed she had been threatened by RUC officers as well as loyalist paramilitaries. The Cory Collusion Inquiry (2004, ISBN 9780102927443) investigated the allegations of collusion between British security forces and paramilitaries in her murder, and concluded that there was enough evidence to warrant a full public inquiry. This Inquiry finds no evidence of any act by or within any of the state agencies (Royal Ulster Constabulary, the Northern Ireland Office or the Security Service) which directly facilitated the murder. Some members of the RUC did publicly abuse and assault her in 1997, and make abusive/threatening remarks about her to her clients, which became publicly known. Combined with intelligence leaks these had the effect of legitimising her as a target. There were omissions by the RUC and NIO which rendered her more at risk and more vulnerable. These omissions meant the state failed to take reasonable and proportionate steps to safeguard the life of Rosemary Nelson. The Inquiry finds no evidence of obstruction into the murder investigation, which was carried out with due diligence.
