The Lifeboat Strategy Mark Nestmann, 2011-03-15 On every front, 24 hours a day, you and your wealth face threats of an intensity that would have been unimaginable only a few short years ago. A sinister marriage of law and technology has made the pervasive and continuous surveillance that George Orwell warned of a reality. Identity thieves, greedy lawyers and the government have been quick to exploit this fast-evolving global surveillance network: - Data thieves can hijack your PC with easy-to-use hacking tools that even a 10-year old can master. After stealing your log-on passwords, they can drain your bank accounts. - If someone has a grudge against you, he can learn whether you're worth suing with a few clicks of a mouse. Hundreds of Web sites offer asset-tracking services to find your real estate ownership records, bank account balances, and much more. - Secret government data mining programs monitor your personal and financial activities 24 hours a day for suspicious transactions. One oversight--becoming friends on Facebook with a suspected terrorist, withdrawing too much cash, unknowingly renting property to someone with a criminal background, etc.--and you could find yourself under arrest and your assets frozen. . Fortunately, you CAN fight back. You can secure your PC to make it virtually invulnerable to hackers. You can legally create international lifeboats of wealth and privacy that are practically invulnerable to snooping. You can understand what the government regards as suspicious ... and avoid raising your profile unnecessarily. The Lifeboat Strategy (2011) shows you exactly what you need to do to counter today's threats to wealth and privacy. It documents today's unprecedented threats to wealth and privacy and reveals hundreds of completely legal strategies to deal with them: private investments, opportunities, and strategies inside--and outside--the United States. And, it's written in language you can understand and put to work to protect yourself and your family. Special bonus report accompanying The Lifeboat Strategy (2011): How to Find Your Own Safe Haven Offshore. In this report, you you'll learn: - The 11 countries best suited for wealth preservation - Which countries offer the most to prospective immigrants? - How to legally purchase a second passport--and why you might want to. - In the current economic crisis, which asset havens will survive--or not? As the U.S. dollar collapses and the world moves into fiscal chaos, planning your own escape from America has never been more important. And this free special bonus report shows you, step-by-step, how to proceed.

The Network Security Test Lab Michael Gregg, 2015-08-10 The ultimate hands-on guide to IT security and proactive defense. The Network

Security Test Lab is a hands-on, step-by-step guide to ultimate IT security implementation. Covering the full complement of malware, viruses, and other attack technologies, this essential guide walks you through the security assessment and penetration testing process, and provides the set-up guidance you need to build your own security-testing lab. You'll look inside the actual attacks to decode their methods, and learn how to run attacks in an isolated sandbox to better understand how attacker target systems, and how to build the defenses that stop them. You'll be introduced to tools like Wireshark, Networkminer, Nmap, Metasploit, and more as you discover techniques for defending against network attacks, social networking bugs, malware, and the most prevalent malicious traffic. You also get access to open source tools, demo software, and a bootable version of Linux to facilitate hands-on learning and help you implement your new skills. Security technology continues to evolve, and yet not a week goes by without news of a new security breach or a new exploit being released. The Network Security Test Lab is the ultimate guide when you are on the front lines of defense, providing the most up-to-date methods of thwarting would-be attackers. Get acquainted with your hardware, gear, and test platform. Learn how attackers penetrate existing security systems. Detect malicious activity and build effective defenses. Investigate and analyze attacks to inform defense strategy. The Network Security Test Lab is your complete, essential guide.

Go H*ck Yourself Bryson Payne,2022-01-18 Learn firsthand just how easy a cyberattack can be. Go Hack Yourself is an eye-opening, hands-on introduction to the world of hacking, from an award-winning cybersecurity coach. As you perform common attacks against yourself, you'll be shocked by how easy they are to carry out—and realize just how vulnerable most people really are. You'll be guided through setting up a virtual hacking lab so you can safely try out attacks without putting yourself or others at risk. Then step-by-step instructions will walk you through executing every major type of attack, including physical access hacks, Google hacking and reconnaissance, social engineering and phishing, malware, password cracking, web hacking, and phone hacking. You'll even hack a virtual car! You'll experience each hack from the point of view of both the attacker and the target. Most importantly, every hack is grounded in real-life examples and paired with practical cyber defense tips, so you'll understand how to guard against the hacks you perform. You'll learn: How to practice hacking within a safe, virtual environment How to use popular hacking tools the way real hackers do, like Kali Linux, Metasploit, and John the Ripper How to infect devices with malware, steal and crack passwords, phish for sensitive information, and more How to use hacking skills for good, such as to access files on an old laptop when you can't remember the password Valuable strategies for protecting yourself from cyber attacks You can't truly understand cyber threats or defend against them until you've experienced them firsthand. By hacking yourself before the bad guys do, you'll gain the knowledge you need to keep you and your loved ones safe.

Firewalls Don't Stop Dragons Carey Parker,2018-08-24 Rely on this practical, end-to-end guide on cyber safety and online security written expressly for a non-technical audience. You will have just what you need to protect yourself—step by step, without judgment, and with as little jargon as possible. Just how secure is your computer right now? You probably don't really know. Computers and the Internet have revolutionized the modern world, but if you're like most people, you have no clue how these things work and don't know the real threats. Protecting your computer is like defending a medieval castle. While moats, walls, drawbridges, and castle guards can be effective, you'd go broke trying to build something dragon-proof. This book is not about protecting yourself from a targeted attack by the NSA; it's about armoring yourself against common hackers and mass surveillance. There are dozens of no-brainer things we all should be doing to protect our computers and safeguard our data—just like wearing a seat belt, installing smoke alarms, and putting on sunscreen. Author Carey Parker has structured this book to give you maximum benefit with minimum effort. If you just want to know what to do, every chapter has a complete checklist with step-by-step instructions and pictures. The book contains

more than 150 tips to make you and your family safer. It includes: Added steps for Windows 10 (Spring 2018) and Mac OS X High Sierra Expanded coverage on mobile device safety Expanded coverage on safety for kids online More than 150 tips with complete step-by-step instructions and pictures What You'll Learn Solve your password problems once and for all Browse the web safely and with confidence Block online tracking and dangerous ads Choose the right antivirus software for you Send files and messages securely Set up secure home networking Conduct secure shopping and banking online Lock down social media accounts Create automated backups of all your devices Manage your home computers Use your smartphone and tablet safely Safeguard your kids online And more! Who This Book Is For Those who use computers and mobile devices, but don't really know (or frankly care) how they work. This book is for people who just want to know what they need to do to protect themselves—step by step, without judgment, and with as little jargon as possible.
