Pro Python System Administration Rytis Sileika, 2014-11-21 *Pro Python System Administration, Second Edition* explains and shows how to apply Python scripting in practice. It will show you how to approach and resolve real-world issues that most system administrators will come across in their careers. This book has been updated using Python 2.7 and Python 3 where appropriate. It also uses various new and relevant open source projects and tools that should now be used in practice. In this updated edition, you will find several projects in the categories of network administration, web server administration, and monitoring and database management. In each project, the author will define the problem, design the solution, and go through the more interesting implementation steps. Each project is accompanied by the source code of a fully working prototype, which you'll be able to use immediately or adapt to your requirements and environment. This book is primarily aimed at experienced system administrators whose day-to-day tasks involve looking after and managing small-to-medium-sized server estates. It will also be beneficial for system administrators who want to learn more about automation and want to apply their Python knowledge to solve various system administration problems. Python developers will also benefit from reading this book, especially if they are involved in developing automation and management tools.

Development and Ethnocide Sita Venkateswar, 2004 This book is an ethnographic account of colonialism in the Andaman Islands, Bay of Bengal, India. It examines the links between colonialism and development under British and Indian administrations, and analyses how the different indigenous groups (the Andamanese, the Onge, the Jarawa and the Sentinelese) have responded differently and been affected in different ways by colonization and the everyday dynamics of colonial administrative practices. It emphasizes particularly the dynamics of power and gender. The book also looks at the present situation of the Jarawa who, until recently, were known as a people that avoided contact with the surrounding society. The book concludes with

a section on current advocacy initiatives being spearheaded by civil society organizations and scholars aimed at securing the Jarawas' right to territory and to choose for themselves which future they want. The book includes an appendix containing the 2003 'Draft Policy on the Jarawas' (by Shri K.B. Saxena, member of the Expert Committee on the Jarawas) as well as an alternative Jarawa policy framework drafted by a group of independent experts and observers, of which the author is a member.
