*Advances in Asset Management and Condition Monitoring* Andrew Ball,Len Gelman,B. K. N. Rao,2020-08-27 This book gathers select contributions from the 32nd International Congress and Exhibition on Condition Monitoring and Diagnostic Engineering Management (COMADEM 2019), held at the University of Huddersfield, UK in September 2019, and jointly organized by the University of Huddersfield and COMADEM International. The aim of the Congress was to promote awareness of the rapidly emerging interdisciplinary areas of condition monitoring and diagnostic engineering management. The contents discuss the latest tools and techniques in the multidisciplinary field of performance monitoring, root cause failure modes analysis, failure diagnosis, prognosis, and proactive management of industrial systems. There is a special focus on digitally enabled asset management and covers several topics such as condition monitoring, maintenance, structural health monitoring, non-destructive testing and other allied areas. Bringing together expert contributions from academia and industry, this book will be a valuable resource for those interested in latest condition monitoring and asset management techniques.

**The Outdoor Citizen** John Judge,2019-12-17 From the president and CEO of the Appalachian Mountain Club comes an astounding comprehensive plan to save our planet, make the outdoors the epicenter of our communities, and commit to an active outdoor lifestyle. In *The Outdoor Citizen*, John Judge coins the term “Outdoor Citizen” as he delivers an urgent call to action and a remarkably persuasive argument for why we must all become citizens of the natural world, reconnecting with life's most essential foundation, nature, and defending it, embracing it, and advocating for it. Judge, an international leader in conservation stewardship, covers such topics as how to turn our cities into Outdoor Cities, with a wide range of green spaces, outdoor recreation activities, eco-friendly transportation, and sustainable food sources; how to globally transition to green energy sources; what environmental policies must be implemented and how to enact them; and how to fund a sustainable economy. At a time when we are facing an unprecedented climate crisis, the continued use of carbon emissions will lead to devastating, irreversible effects on the earth. This unique and riveting volume, brimming with expert advice and case studies, is unparalleled—a game-changer for saving our planet and an entry point into a world of healthier and happier people.

**Working in Parks and Recreation** Carol Hand,2018-12-15 Working outdoors, getting exercise, playing games, and serving your community, all while earning a salary, what could be better? This comprehensive guide to the field of parks and recreation prepares readers for three individual career paths: recreation worker, park maintenance worker, and park ranger. It offers several day-in-the-life stories from these careers, stressing the great variation of jobs available in this career and the range of education, from high school diploma to graduate degrees, required for different jobs. Readers can also learn about education, job-hunting, and advancement, and a few part-time jobs that can help them break into the field.

**Managing Building Deterioration** Syamilah Yacob,Azlan Shah Ali,Cheong Peng Au-Yong,2021-09-20 This book presents the results of a novel investigation into building deterioration and defects in Malaysia's public schools. It sets forth an in-depth theoretical and empirical underpinning the maintenance management of public schools with the view to develop a building deterioration prediction model of building condition based on factors contributing to building defects for school buildings. The approach adopted is mixed method encompassing archived documentation, questionnaire survey and interview of sampled schools in Malaysia. It presents a number of useful tables, graphs and statistical analysis which are useful in understanding the factors contributing to building defects under reference. The prediction model assists the decision making of maintenance management to be more efficient with comprehensive budgeting as well as optimal maintenance and repair work. The book is of relevance to school managers, maintenance management practitioners and academics towards measuring and improving the building condition in schools.

**International Encyclopedia of Hospitality Management 2nd edition** Abraham Pizam,2012-06-25 The International Encyclopedia of Hospitality Management is the definitive reference work for any individual studying or working in the hospitality industry. There are 185 Hospitality Management degrees in the UK alone. This new edition updates and significantly revises twenty five per cent of the entries and has an additional twenty new entries. New online material makes it the most up-to-date and accessible hospitality management encyclopedia on the market. It covers all of the relevant issues in the field of hospitality management from a

sectoral level (lodging, restaurants/food service, time-share, clubs and events) as well as a functional one (accounting and finance, marketing, strategic management, human resources, information technology and facilities management). Its unique, user-friendly structure enables readers to find exactly the information they require at a glance – whether they require broad detail that takes a more cross-sectional view across each subject field or more focused information that looks closely at specific topics and issues within the hospitality industry today.

**Healthcare Technology Management Systems** Luis Vilcahuamán,Rossana Rivas,2017-07-17 Healthcare Technology Management Systems provides a model for implementing an effective healthcare technology management (HTM) system in hospitals and healthcare provider settings, as well as promoting a new analysis of hospital organization for decision-making regarding technology. Despite healthcare complexity and challenges, current models of management and organization of technology in hospitals still has evolved over those established 40-50 years ago, according to totally different circumstances and technologies available now. The current health context based on new technologies demands working with an updated model of management and organization, which requires a re-engineering perspective to achieve appropriate levels of clinical effectiveness, efficiency, safety and quality. Healthcare Technology Management Systems presents best practices for implementing procedures for effective technology management focused on human resources, as well as aspects related to liability, and the appropriate procedures for implementation. Presents a new model for hospital organization for Clinical Engineers and administrators to implement Healthcare Technology Management (HTM) Understand how to implement Healthcare Technology Management (HTM) and Health Technology Assessment (HTA) within all types of organizations, including Human Resource impact, Technology Policy and Regulations, Health Technology Planning (HTP) and Acquisition, as well as Asset and Risk Management Transfer of knowledge from applied research in CE, HTM, HTP and HTA, from award-winning authors who are active in international health organizations such as the World Health Organization (WHO), Pan American Health Organization (PAHO), American College of Clinical Engineering (ACCE) and International Federation for Medical and Biological Engineering (IFMBE)

Inland Waterway Transport Bart Wiegman,Rob Konings,2016-07-01 Inland waterways are a host for a mode of transport that is not as visible to the general public or as used as it once was. It is, however, generally perceived to be very important to our freight transport system today, although a closer look into the inland waterway transport system rebuts this perception and reveals the strengths and opportunities of this mode of transportation. This book gives the reader a thorough understanding of the current role of inland waterway transport as a freight transport system and its conditions. Drawing on case studies from across Europe, this text explores the economic, logistic, and technological and policy issues related to inland waterway transport and the challenges that changes in these areas present to this transport mode. It also explores the strategies for the inland waterway transport sector to secure and then enlarge its role in the future of freight transport. Inland Waterway Transport will be an invaluable source for students and researchers of transport studies. In addition, the book will be useful to policymakers and practitioners involved in its development. It may also appeal to wider readers with an interest in the fascinating business of inland waterway transport.

**Intelligent Transportation Systems (ITS) Concepts for Rural Corridor Management** Micah Henry,2007 The Arizona Department of Transportation's (ADOT's) SPR-570: Rural ITS Progress Study - Arizona 2004 provided 20 key recommendations for improved utilization of the rural Intelligent Transportation Systems (ITS) infrastructure. Two years later, in reviewing the outcomes of the 2004 study and the ongoing rural technology deployments, the Department identified several of the key concerns as still being unresolved. In general, ADOT has been successful in implementing the recommendations of the 2004 statewide review, but five areas of unmet needs or unfulfilled potential remain. These five gap areas are the primary focus of this new research project, to fully implement the potential of all of the recommendations from the 2004 study. The five primary focus areas are: ITS maintenance, weather information systems, highway advisory radio, motorist assist patrols, and information sharing. The research team interviewed the project's stakeholders from Arizona's rural districts to identify recent changes in their ITS deployment, goals, and visions for future deployment, as well as current needs and desires since the previous 2004 study. The investigators also reviewed the current practices and concepts of rural ITS among other transportation agencies throughout the country. This included conducting personal interviews with recognized industry leaders, attending industry conferences, and performing extensive research in literature, products (both off-the-shelf and in-development), and on-line. Based on the interviews and state-of-the-practice research components, the investigators developed a list of ITS concepts that might service the rural needs of the Department. Each of the five focus areas contains several concepts that address needs identified as original project goals, or new topics identified during the field interviews. Each discussion section provides a conceptual approach and application of ITS technology or state-of-the-practice development, a breakdown of benefits and challenges for implementation, implementation recommendations and a breakdown of the engineer's opinion of cost. Each concept has been ranked by the project advisory group based on implementation priority. A potential process owner and potential resources for deployment are also identified.
