Sensational Scientists Barry Shell, 2005 What drives scientists to pursue the challenging career paths they have chosen? Is it fame? Fortune? Prestige? No. It's curiosity and the love of discovery. Meet the 24 fascinating researchers profiled in *Sensational Scientists*, understand how they achieved their career success, and discover how each is inspired by the most simple question: Why? The scientists featured here, including a number of Nobel prize winners, work in a wide range of areas from chemistry, biophysics and genetics to meteorology, anthropology and psychology. Rich with photographs, diagrams, educational experiments kids age 12 and up can do themselves and inspiring discussions on how to embark on a career in science, *Sensational Scientists* is perfect for young scientists who are thrilled to discover something new, and for everyone who has ever wondered how? and why? A revised version of *Great Canadian Scientists*, this book includes five new profiles, while the rest have been thoroughly updated and expanded. Of the 24 scientists included, 22 are Canadian or work in Canada. Ages 12 and up

Stone Speaker A. Buturovic, 2002-05-31 The Poet Mak Dizdar (d.1971) has become a cultural icon in contemporary Bosnia-Herzegovina. Inspired by the lapidary imagery and epitaphs of medieval Bosnian tombstones, his best-

acclaimed collection of poetry, *Stone Sleeper*, reawakens the medieval voices and assigns them a new role in the historical imagination of contemporary Bosnians. In this study, Amila Buturovic looks at *Stone Sleeper*'s recovery of the ancestral world as an effort to refashion the sentiments of collective belonging. In treating the medieval tombstones as sites of collective memory, Dizdar's poetry evokes new possibilities for Bosnians to cast aside national differences based primarily on religion and embrace a pluralistic identity rooted in the sacred landscape of medieval Bosnia.

Religion, Postcolonialism, and Globalization Jennifer Reid, 2014-12-18
Religion, Postcolonialism and Globalization: A Sourcebook shows how the roots of our globalized world run deeper than the 1980s or even the end of WWII, tracing back to 15th century European colonial expansion through which the 'modern world system' came into existence. The Sourcebook is divided into four sections, each with a critical introduction by the editor, a series of readings, and discussion questions based on the readings. Canonical readings in religion, globalization and postcolonialism are paired with lesser-known texts in order to invite critical analysis. Extracts explored include work by Max Weber, Edward Said, David Chidester, and Kant, as well as political documents such as the British Parliament's 1813 Act regarding the East India Company. Sources range from the origins of the common phrase jihad vs. McWorld in the work of Benjamin Barber, to personal essays reflecting religious responses to globalization. Focusing on a history of religions

approach, Religion, Postcolonialism, and Globalization provides an alternative to existing sociological work on religion and globalization. Guidance on useful web resources can be found on the book's webpage.

Narrating Indigenous Modernities Michaela Moura-Koçoğlu, 2011 The Māori of New Zealand, a nation that quietly prides itself on its pioneering egalitarianism, have had to assert their indigenous rights against the demographic, institutional, and cultural dominance of Pākehā and other immigrant minorities – European, Asian, and Polynesian – in a postcolonial society characterized by neocolonial structures of barely acknowledged inequality. While Māori writing reverberates with this struggle, literary identity discourse goes beyond any fallacious dualism of white/brown,

colonizer/colonized, or modern/traditional. In a rapidly altering context of globality, such essentialism fails to account for the diverse expressions of Māori identities negotiated across multiple categories of culture, ethnicity, class, and gender. Narrating Indigenous Modernities recognizes the need to place Māori literature within a broader framework that explores the complex relationship between indigenous culture, globalization, and modernity. This study introduces a transcultural methodology for the analysis of contemporary Māori fiction, where articulations of indigeneity acknowledge cross-cultural blending and the transgression of cultural boundaries. Thus, Narrating Indigenous Modernities charts the proposition that Māori writing has acquired a fresh, transcultural quality, giving voice to both new and recuperated forms of indigeneity, tribal community, and Māoritanga (Maoridom) that generate modern indigeneities which defy any essentialist homogenization of cultural difference. Māori literature becomes, at the same time, both witness to globalized processes of radical modernity and medium for the negotiation and articulation of such structural transformations in Māoritanga.

Mobile Genetic Elements Wolfgang J. Miller, Pierre Capi, 2008-02-05 Leading experts describe in step-by-step detail their most productive transposon-based methods and strategies for studying genome structure, function, and evolution. These readily reproducible techniques cover a wide range, including mutagenesis, transgenesis, gene silencing, and molecular

systematics. Among the highlights are a series of DNA hybridization methods for analyzing the distribution and dynamics of mobile DNA at the hosts' genomic level, techniques for studying LTR retrotransposons in heterologous host systems, and mutagenesis protocols for investigating gene functions in a broad range of organisms. These cutting-edge methods offer investigators powerful genetic tools for dissecting the function of a specific gene, elaborating on the mechanisms leading to genetic change and diversity, and studying the evolutionary impact of mobile DNA on the biology and evolution of organisms.

Air-Mech-Strike David L. Grange, B. G. (R) Huba Wass de Czege, L. T. C. Richard D. Liebert USAR, Charles A. Jarnot, 2002 This book outlines how to reorganize the U.S. Army into a fully 2 and 3-Dimensional maneuver capable, ground force with terrain-agile, armored fighting vehicles sized to rapidly deploy by fixed-wing and rotary-wing aircraft to the scene of world conflicts and strike at the heart of freedom's enemies. The plan to build the Army into Air-Mech-Strike Forces, exploiting emerging information-age technologies, as well as America's supremacy in aircraft and helicopter delivery systems---at

the lowest cost to the taxpayers, is described in detail. These Army warfighting organizations, using existing and some newly purchased equipment, will shape the battlefield to America's advantage, preserving the peace before it is lost; if not, then winning fights that must be fought quickly. The dangerous world we live in moves by the speed of the AIR, and the 21st Century U.S. Army 2D/3D combat team will dominate this medium by Air-Mech-Strike!

Women and Work in Asia and the Pacific Marian Baird, Rae Cooper, Jane Parker, Noelle Donnelly, 2023-02-09 Working women everywhere face discrimination. Inequality and lack of inclusion is reinforced through regulation, policy, behaviors and attitudes. Although there has been progress in some countries, gender equality at work has yet to be achieved by any nation. This in-depth study examines the challenges faced by working women, their families and communities in ten countries throughout Asia and the Pacific: New Zealand, Australia, Japan, China, Cambodia, India, Sri Lanka, Fiji, Pakistan and the Philippines. Informed by the work of senior academics, policy-makers and community group representatives, and with a foreword by Elizabeth Broderick, independent expert for the Working Group on Discrimination Against Women and Girls, United Nations Human Rights Council, working women's experiences are described and analyzed within a framework of four themes: demography, globalization, technological development and sustainability. Drawing on this wide range of qualitative and quantitative

evidence, the authors set out recommendations for coordinated and context-sensitive responses specific to each country to improve the working lives of women and girls.

Using STEM to Investigate Issues in Managing Waste, Grades 5 - 8 Barbara R. Sandall, Ed.D., Abha Singh, 2011-01-03 Connect students in grades 5 and up with science with Using STEM to Investigate Issues in Managing Waste.

STEM—Science, Technology, Engineering, and Mathematics—is an initiative designed to interest students in specific career fields. In this 128-page book, students use science inquiry and integrated activities, solve real-world problems, and explore careers in waste management. The book includes topics such as solid waste, product life cycle, composting, packaging, and landfill construction. It supports National Science Education Standards and NCTM and ITEA standards and aligns with state, national, and Canadian provincial standards.

Thimerosal: Let the Science Speak Robert F. Kennedy, 2015-09-01 Over a decade ago, following a sharp rise in developmental disorders such as autism and ADHD, the mercury-containing preservative Thimerosal was widely believed

to have been eliminated from vaccine supplies in the US and abroad. However, dangerous quantities of Thimerosal continue to be used, posing a significant threat to public health and leading to a crisis of faith in vaccine safety. In this groundbreaking book, Robert F. Kennedy, Jr., and Dr. Mark Hyman examine the research literature on Thimerosal and make a very clear statement about its potentially dangerous effects. In the past, the CDC, FDA, NIH, and AAP, as well as the US Congress, the American Academy of Family Physicians, the US Department of Agriculture, the European Medicines Agency, and the California Environmental Protection Agency have expressed concerns over the use of Thimerosal in vaccines. But despite the many voices calling for action, the media and policy makers have repeatedly failed to adequately address the issue. Now, with Thimerosal: Let the Science Speak, the goals are to educate parents, doctors, and health policy makers; to eliminate this toxic chemical from the world's vaccine supplies; to move toward safer alternatives; and to maintain or increase vaccination rates critical to the United States and developing nations. With safer options available, parents shouldn't have to worry about the devastating effects of vaccinating their children.

New Directions in the Analysis of Multimodal Discourse Terry D. Royce, Wendy Bowcher, 2013-01-11 New Directions in the Analysis of Multimodal Discourse offers a comprehensive international view of multimodal discourse and presents new directions for research and application in this growing field.

With contributions from top scholars around the world, this work opens up the field of multimodal discourse analysis as it covers a wide range of interests such as computational linguistics, education, ideology, and media discourse. The range and scope of the chapters in this book provide groundbreaking insights into exploring and accounting for the various facets of multimodality in a range of texts and contexts. Initial chapters specifically aim to tackle theoretical issues, while subsequent chapters focus on important research areas such as writing and graphology, genre, ideology, computational concordancing, literacy, and cross cultural and cross linguistic issues. In the final chapters, an emphasis is placed on the educational implications of multimodality in first and second language contexts, a particularly new and interesting contribution.

Free as in Freedom [Paperback] Sam Williams, 2002-03-01 Free as in Freedom interweaves biographical snapshots of GNU project founder Richard Stallman with the political, social and economic history of the free software movement. It examines Stallman's unique personality and how that personality has been at turns a driving force and a drawback in terms of the movement's overall success. Free as in Freedom examines one man's 20-year attempt to codify and communicate the ethics of 1970s era hacking culture in such a way that later generations might easily share and build upon the knowledge of their computing forebears. The book documents Stallman's personal evolution from teenage misfit to prescient adult hacker to political leader and

examines how that evolution has shaped the free software movement. Like Alan Greenspan in the financial sector, Richard Stallman has assumed the role of tribal elder within the hacking community, a community that bills itself as anarchic and averse to central leadership or authority. How did this paradox come about? Free as in Freedom provides an answer. It also looks at how the latest twists and turns in the software marketplace have diminished Stallman's leadership role in some areas while augmenting it in others. Finally, Free as in Freedom examines both Stallman and the free software movement from historical viewpoint. Will future generations see Stallman as a genius or crackpot? The answer to that question depends partly on which side of the free software debate the reader currently stands and partly upon the reader's own outlook for the future. 100 years from now, when terms such as computer, operating system and perhaps even software itself seem hopelessly quaint, will Richard Stallman's particular vision of freedom still resonate, or will it have taken its place alongside other utopian concepts on the 'ash-heap of history?'

AsiaPacifiQueer Fran Martin, Peter Jackson, Mark McLelland, Audrey Yue, 2010-10-01 This interdisciplinary collection examines the shaping of local sexual cultures in the Asian Pacific region in order to move beyond definitions and understandings of sexuality that rely on Western assumptions. The diverse studies in AsiaPacifiQueer demonstrate convincingly that in the realm of sexualities, globalization results in creative and cultural

admixture rather than a unilateral imposition of the western values and forms of sexual culture. These essays range across the Pacific Rim and encompass a variety of forms of social, cultural, and personal expression, examining sexuality through music, cinema, the media, shifts in popular rhetoric, comics and magazines, and historical studies. By investigating complex processes of localization, interregional borrowing, and hybridization, the contributors underscore the mutual transformation of gender and sexuality in both Asian Pacific and Western cultures. Contributors are Ronald Baytan, J. Neil C. Garcia, Kam Yip Lo Lucetta, Song Hwee Lim, J. Darren Mackintosh, Claire Maree, Jin-Hyung Park, Teri Silvio, Megan Sinnott, Yik Koon Teh, Carmen Ka Man Tong, James Welker, Heather Worth, and Audrey Yue.
