Healthcare Technology Management - A Systematic Approach Francis Hegarty, John Amoores, Paul Blackett, Justin McCarthy, Richard Scott, 2017-01-06 Healthcare Technology Management: A Systematic Approach offers a comprehensive description of a method for providing safe and cost effective healthcare technology management (HTM). The approach is directed to enhancing the value (benefit in relation to cost) of the medical equipment assets of healthcare organizations to best support patients, clinicians and other care providers, as well as financial stakeholders. The authors propose a management model based on interlinked strategic and operational quality cycles which, when fully realized, delivers a comprehensive and transparent methodology for implementing a HTM programme throughout a healthcare organization. The approach proposes that HTM extends beyond managing the technology in isolation to include advancing patient care through supporting the application of the technology. The book shows how to cost effectively manage medical equipment through its full life cycle, from acquisition through operational use to disposal, and to advance care, adding value to the medical equipment assets for the benefit of patients and stakeholders. This book will be of interest to practicing clinical engineers and to students and lecturers, and includes self-directed learning questions and case studies. Clinicians, Chief Executive Officers, Directors of Finance and other hospital managers with responsibility for the governance of medical equipment will also find this book of interest and value. Return of the Bison Roger Di Silvestro, 2023-09-01 Offers a hopeful view of threatened species, grounded in history and science Addresses current conservation trends: wildlife corridors, prairie restoration, cultural restoration for the American Indian community Return of the Bison is the story of how this symbol of the American West was once almost lost to history and of the continuing journey to bring bison back from the brink. Author and naturalist Roger Di Silvestro explores the complex history of the bison's decimation and how a rising awareness of their possible extinction formed the roots of many modern wildlife conservation approaches. Weaving in natural history and fascinating historical context featuring personalities such as Teddy Roosevelt, George Bird Grinnell, and William T. Hornaday, Di Silvestro traces the decades it took to begin to save the bison, often with little hope and plagued by discouraging setbacks. Di Silvestro explores the key role in the story of America's Indigenous people, whose fate was intertwined with the bison's and whose conservation work is important not only for the animal's recovery but also for their own cultural renewal. Di Silvestro also examines the plight of European bison and the latest challenges facing the species in the US: Are the bison doomed to be treated like cattle, fenced and contained? Or will they be listed as an endangered species, requiring us to treat them like the wild animals they are?

The HRD Almanac Dr Vidhya Srinivasan,2016-12-26 The thinking on Human Resource Development (HRD) practices has been evidenced for the last one and a half decades. However the pace and volume of change has forced HR managers to meet complex challenges like globalization, a diverse workforce and informed expectations for training learning and development. Both organizations and employees benefit from HRD interventions because an organization's success critically depends on the levels of employee skills and motivation. The HRD Almanac looks at 4 broad focus areas of HR practices, that are Strategy centric, Organizational alignment related, Employee Empowerment focused, and the Learning Training and Development angle. The author weaves together 25 detailed chapters spanning the gamut of the HRD function. The writing is aligned on a uniform pattern providing answers to the What, consisting of Definitions and Descriptions of the theme, Why, Consisting of Concept Clarifications, Where, the role of the Human Resources department and How, an authentication of data obtained through a pilot study on HR practitioners across industry sectors.
