Monsters and the Monstrous, 2007-01-01 Emerging from depths comes a series of papers dealing with one of the most significant creations that reflects on and critiques human existence. Both a warning and a demonstration, the monster as myth and metaphor provides an articulation of human imagination that toys with the permissible and impermissible. Monsters from zombies to cuddly cartoon characters, emerging from sewers, from pages of literature, propaganda posters, movies and heavy metal, all are covered in this challenging, scholarly collection. This volume the third in the series presents a marvellous collection of studies on the metaphor of the monster in literature, cinema, music, culture, philosophy, history and politics. Both historical reflection and concerns of our time are addressed with clarity and written in an accessible manner providing appeal for the scholar and lay reader alike. This eclectic collection will be of interest to academics and students working in a range of disciplines, such as cultural studies, film studies, political theory, philosophy and literature studies.

Wrong Way Damien Cahill, Phillip Toner, 2018-09-03 Since the 1980s, waves of neoliberal 'economic reform' have transformed Australia. Privatisation, deregulation, marketisation and the contracting out of government services: for three decades now, there has been widespread agreement among policymakers on the desirability of these strategies. But the benefits of economic reform are increasingly being questioned. Alongside growing voter disenchantment, new voices of dissent argue that instead of efficiency and improved services, economic reform has led to unaccountable oligopolies, increased prices, reduced productivity and degradation of the public good. In *Wrong Way*, Australia's leading economists and public intellectuals do a cost-benefit analysis of economic reform across key areas. Have these reforms been worthwhile for the Australian community and its economy? Have they given us a better society, as promised? 'Has privatisation led to more productivity-enhancing competition? Has deregulation increased economic welfare in energy, finance, health, education and labour markets? Does the lived experience of Australians measure up to the promise of economic reform? The authors answer these questions with conclusions that are both compelling and disturbing.'—Emeritus professor Roy Green, University of Technology Sydney

Debates for the Digital Age [2 volumes] Danielle Sarver Coombs,Simon Collister,2015-11-23 By evaluating the Internet's impact on key cultural issues of the day, this book provides a comprehensive overview of the seismic technological and cultural shifts the Internet has created in contemporary society. Books about Internet culture usually focus on the people, places, sites, and memes that constitute the cutting-edge at the time the book is written. That approach, alas, renders such volumes quickly obsolete. This provocative work, on the other hand, focuses on overarching themes that will remain relevant for the long term. The insights it shares will highlight the tremendous impact of the Internet on modern civilization—and individual lives—well after specific players and sites have fallen out of favor. Content is presented in two volumes. The first emphasizes the positive impact of Internet culture—for example, 24-hour access to information, music, books, merchandise, employment opportunities, and even romance. The second discusses the Internet's darker consequences, such as a demand for instant news that often pushes journalists to prioritize being first over being right, online scams, and invasions of privacy that can affect anyone who banks, shops, pays bills, or posts online. Readers of the set will clearly understand how the Internet has revolutionized communications and redefined human interaction, coming away with a unique appreciation of the realities of today's digital world—for better and for worse.

Women Suicide Bombers V. G. Julie Rajan,2011-08-26 This book offers an evaluation of female suicide bombers through postcolonial, Third World, feminist, and human-rights framework, drawing on case studies from conflicts in Palestine, Sri Lanka, and Chechnya, among others. Women Suicide Bombers explores why cultural, media and political reports from various geographies present different information about and portraits of the same women suicide bombers. The majority of Western media and sovereign states engaged in wars against groups deploying bombings tend to focus on women bombers' abnormal mental conditions; their physicality—for example, their painted fingernails or their beautiful eyes; their sexualities; and the various ways in which they have been victimized by their backward Third World cultures, especially by Islam. In contrast, propaganda produced by rebel groups deploying women bombers, cultures supporting those campaigns, and governments of those nations at war with sovereign states and Western nations tend to project women bombers as mythical heroes, in ways that supersedes the martyrdom operations of male bombers. Many of the books published on this phenomenon have revealed interesting ways to read women bombers' subjectivities, but do not explore the phenomenon of women bombers both inside and outside of their militant activities, or against the patriarchal, Orientalist, and Western feminist cultural and theoretical frameworks that label female bombers primarily as victims of backward cultures. In contrast, this book offers a corrective lens to the existing discourse, and encourages a more balanced evaluation of women bombers in contemporary conflict. This book will be of interest to students of terrorism, gender studies and security studies in general.
