Solidarity in Strategy Lyn Spillman, 2012-07-27 Popular conceptions hold that capitalism is driven almost entirely by the pursuit of profit and self-interest. Challenging that assumption, this major new study of American business associations shows how market and non-market relations are actually profoundly entwined at the heart of capitalism. In *Solidarity in Strategy*, Lyn Spillman draws on rich documentary archives and a comprehensive data set of more than four thousand trade associations from diverse and obscure corners of commercial life to reveal a busy and often surprising arena of American economic activity. From the Intelligent Transportation Society to the American Gem Trade Association, Spillman explains how business associations are more collegial than cutthroat, and how they make capitalist action meaningful not only by developing shared ideas about collective interests but also by articulating a disinterested solidarity that transcends those interests. Deeply grounded in both economic and cultural sociology, *Solidarity in Strategy* provides rich, lively, and often surprising insights into the world of business, and leads us to question some of our most fundamental assumptions about economic life and how cultural context influences economic.

Computer Science & Perl Programming Jon Orwant, 2002-11-04 In its first five years of existence, The Perl Journal ran 247 articles by over 120 authors. Every serious Perl programmer subscribed to it, and every notable Perl guru jumped at the opportunity to write for it. TPJ explained critical topics such as regular expressions, databases, and object-oriented programming, and demonstrated Perl's utility for fields as diverse as astronomy, biology, economics, AI, and games. The magazine gave birth to both the Obfuscated Perl Contest and the Perl Poetry contest, and remains a proud and timeless achievement of Perl during one of its most exciting periods of development. *Computer Science and Perl Programming* is the first volume of *The Best of the Perl Journal*, compiled and re-edited by the original editor and publisher of The Perl Journal, Jon Orwant. In this series, we've taken the very best (and still relevant) articles published in TPJ over its 5 years of publication and immortalized them into three volumes. This volume has 70 articles devoted to hard-core computer science, advanced programming techniques, and the underlying mechanics of Perl. Here's a sample of what you'll find inside: Jeffrey Friedl on Understanding Regexpes Mark Jason Dominus on optimizing your Perl programs with Memoization Damian Conway on Parsing Tim Meadowcroft on integrating Perl with Microsoft Office Larry Wall on the culture of Perl Written by 41 of the most prominent and prolific members of the closely-knit Perl community, this anthology does what no other book can, giving unique insight into the real-life applications and powerful techniques made possible by Perl. Other books tell you how to use Perl, but this book goes far beyond that: it shows you not only how to use

Perl, but what you could use Perl for. This is more than just The Best of the Perl Journal -- in many ways, this is the best of Perl.

The Message on My Arm HERMANELI TORREVILLAS, MD,2014-09-26 This new book sheds light on the existence of Extraterrestrial Beings. Author H. Torrevillas, M.D., invites readers to embark on a fascinating journey to unlock some of life's greatest mysteries. The author shares his many encounters that made him lean towards the study of intuitive feelings as well as psychic phenomena that relate to the mystifying world of the unknown. From the cradle to the grave, our parents, peers, institutions and society form our values and behavior, but this process has been hijacked. This book opens our minds to the fact that, unknown to us, for generations, we have allowed dictators, power brokers and corporate puppeteers to profit from our ignorance and enslavement. From the anvil of compulsory schooling to media and entertainment, we are being kept in bondage to ideas that shape our actions. But the author is optimistic that we can overcome negative forces that control our minds and those of our leaders. He had been in a quandary in his early years regarding paranormal happenings in his life. Rather than ignore them as skeptics are inclined to do, Dr/ Torrevillas regarded them as significant in his life.

The Letter in the Bottle Karen Liebreich, 2015-01-01 On a winter's day in 2002, a bottle shaped like a tear washed up on the Kent coast. It contained a letter written in French, a lock of hair, and a mystery. Only one thing could be known for certain—that the writer of the letter was a mother, grieving for her lost child, Maurice. Moved by the woman's heartache, Karen Liebreich sets out on an epic journey to piece together the mother's story. Her book is the amazing true story of one woman's search for another, and a poignant reflection on love, loss, and motherhood. In this revised edition Liebreich concludes her epic quest, finally meeting the woman who sent the bottle years before, and coming to understand the loss that was at the heart of one mother's impulse to communicate with the unknown.

Sending Your Government a Message Carl Richard Neu,Robert Helms Anderson,Tora K. Bikson,1999 In 1995, RAND published a book exploring the feasibility and societal implications of providing universal access to electronic mail within the United States (Robert H. Anderson et al., Universal Access to E-Mail: Feasibility and Societal Implications). Among the nine policy conclusions and recommendations in that report were these: It is critical that electronic mail be a basic service in a national information infrastructure; it is important to reduce the

increasing gaps in access to basic electronic information services, specifically, access to electronic mail services; there are no fundamental technical barriers to providing universal access to electronic mail services. This book explores the possibility for expanded citizen-government personalized electronic communication. Of particular interest are interactions between government agencies and individual citizens--interactions involving personal information, iterated communications between an individual and a government agency, and the use of a personal electronic mailbox for the individual. It provides an informal survey of current state uses of such communication, supplemented by two case studies of potential use. It also uses 1997 Current Population Survey data to update the electronic access trends in the United States that were highlighted in the 1995 study.

Whose Black Politics? Andra Gillespie, 2010-01-29 Using multiple case studies, this title probes the implications of the emergence of a vanguard of leaders of African American politics.
