Intelligent Transportation Systems Robert Gordon,2015-11-02 Intelligent Transportation Systems: Functional Design for Economical and Efficient Traffic Management provides practical guidance on the efficient use of resources in the design of ITS. The author explains how functional design alternatives can meet project objectives and requirements with optimal cost effectiveness and clarifies how transportation planning and traffic diversion principles relate to functional ITS device selections and equipment locations. Methodologies for translating objectives to functional device types, determining device deployment densities and determining the best placement of CCTV cameras and message signs are provided, as are models for evaluating the benefits of design alternatives based on traffic conditions. Readers will learn how to reduce recurrent congestion, improve incident clearance time in non-recurrent congestion, provide real-time incident information to motorists, and leverage transportation management center data for lane control through important new active transportation and demand management (ATDM) methods. Finally, the author examines exciting developments in connected vehicle technologies, exploring their potential to greatly improve safety, mobility and energy efficiency. Steelpan Ambassadors Andrew R. Martin,2017-06-16 Maybe you won't like steel band. It's possible. But it's been said that the Pied Piper had a steel band helping him on his famous visit to Hamelin. When the US Navy distributed this press release, anxieties and tensions of the impending Cold War felt palpable. As President Eisenhower cast his gaze towards Russia, the American people cast their ears to the Atlantic South, infatuated with the international currents of Caribbean music. Today, steelbands have become a global phenomenon; yet, in 1957 the

exotic sound and the unique image of the US Navy Steel Band was one-of-a-kind. Could calypso doom rock n roll? Band founder Admiral Daniel V. Gallery thought so and envisioned his steelband knocking rock n roll and Elvis Presley into the ash can. From 1957 until their disbandment in 1999, the US Navy Steel Band performed over 20,000 concerts worldwide. In 1973, the band officially moved headquarters from Puerto Rico to New Orleans and found the city and annual Mardi Gras tradition an apt musical and cultural fit. The band brought a significant piece of Caribbean artistic capital--calypso and steelband music--to the American mainstream. Its impact on the growth and development of steelpan music in America is enormous. Steelpan Ambassadors uncovers the lost history of the US Navy Steel Band and provides an in-depth study of its role in the development of the US military's public relations, its promotion of goodwill, its recruitment efforts after the Korean and Vietnam Wars, its musical and technological innovations, and its percussive propulsion of the American fascination with Latin and Caribbean music over the past century.

Technology and the Global Adolescent Judith L. Gibbons,Katelyn E. Poelker,2020-04-16 Around the world, adolescents use technology for education, to further their identity and socio-emotional development, to access health information, engage in civic activities, and for entertainment. For many, technological advances, especially social media, have drastically influenced how they communicate with family, friends, and romantic partners. Challenges of technology use include the digital divide, internet addiction, and exposure to cyberbullying. The diversity of adolescents' cultural context results in heterogeneous bidirectional influences of

technology and teenagers with respect to education and close relationships. Researchers, parents, and policy makers must consider the role of culture in the complex interactions of teenagers with technology.
