The Gig Economy Brian Dolber,Michelle Rodino-Colocino,Chenjerai Kumanyika,Todd Wolfson,2021-05-30 This edited collection examines the gig economy in the age of convergence from a critical political economic perspective. Contributions explore how media, technology, and labor are converging to create new modes of production, as well as new modes of resistance. From rideshare drivers in Los Angeles to domestic workers in Delhi, from sex work to podcasting, this book draws together research that examines the gig economy's exploitation of workers and their resistance. Employing critical theoretical perspectives and methodologies in a variety of national contexts, contributors consider the roles that media, policy, culture, and history, as well as gender, race, and ethnicity play in forging working conditions in the 'gig economy'. Contributors examine the complex and historical relationships between media and gig work integral to capitalism with the aim of exposing and, ultimately, ending exploitation. This book will appeal to students and scholars examining questions of technology, media, and labor across media and communication studies, information studies, and labor studies as well as activists, journalists, and policymakers.

The Ozarks Milton D. Rafferty,2001-01-01 The Ozark Mountains reach into Missouri, Arkansas, Oklahoma, and Kansas, forming a region with great natural beauty and a distinctive cultural and historical landscape. This comprehensive volume, a fully updated edition of a beloved classic, reaches into history, anthropology, economics, and geography to explore the complex relationships between the Ozarks' people and land through times of profound change. Drawing on more than thirty years of research, field observations, and interviews, Rafferty examines this subject matter through a range of topics: the settlement patterns and material cultures of Native Americans, French, Scotch-Irish, Germans, Italians, African Americans, Hispanics, and Asians in the region; population growth; the guerrilla warfare and battles of the Civil War; the cultural transformations wrought by railroads, roads, mass media, and modern communication systems; the discovery, development, and decline of the great mining districts; the various forms of agriculture and the felling of the region's vast forests; and the built landscape, from log cabins to Victorian mansions to strip malls. This new edition also explores the new and potent forces which have reshaped the region over the last twenty years: tourism and the growing service industry, suburbanization, rapid population growth and retirement living, and agribusiness. Lavishly illustrated with historic and contemporary photographs, maps, and charts.--Publisher's description.

Sharing Cities Shaping Cities Giuseppe Salvia,Eugenio Morello,Andrea Arcidiacono,2019-05-28 The sharing economy and collaborative consumption are attracting a great deal of interest due to their business, legal and civic implications. The consequences of the spreading of practices of sharing in urban environments and under daily dynamics are underexplored. This Special Issue aims to address if and how sharing shapes cities, the way that spaces are designed and lived in if social interactions are escalated, and the ways that habits and routines take place in post-individualistic society. In particular, the following key questions are of primary interest: Urban fabric: How is ‘sharing’ shaping cities? Does it represent a paradigm shift with tangible and physical reverberations on urban form? How are shared mobility, work, inhabiting reconfiguring the urban and social fabric? Social practices: Are new lifestyles and practices related to sharing changing the use and design of spaces? To what extent is sharing triggering a production and consumption paradigm shift to be reflected in urban arrangements and infrastructures? Sustainability: Does sharing increase the intensity of use of space and assets, or, rather, does it increase them to meet the expectations of convenience for urban lifestyles? To what extent are these phenomena fostering more economically-, socially-, and environmentally-sustainable practices and cities? Policy: How can policy makers and municipalities interact with these bottom-up and phenomena and grassroots innovation to create more sustainable cities? Scholars responded to the above questions from the fields of urban studies, urban planning and design, sociology, geography, theoretically-grounded and informed by the results of fieldwork activities.
