The Future of the Internet Jonathan Zittrain, 2009-05-28 In *The Future of the Internet: And How to Stop It* Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.

Just Say No to Microsoft Tony Bove, 2005 Just Say No to Microsoft begins by tracing Microsoft's rise from tiny software startup to monopolistic juggernaut and explains how the company's practices over the years have discouraged innovation, stunted competition, and helped foster an environment ripe for viruses, bugs, and hackers. Readers learn how they can dump Microsoft products--even the Windows operating system--and continue to be productive. The book also shows how to work successfully and seamlessly with computers and people who are still hooked on Microsoft software. Includes full explanations of alternate operating systems, such as Linux and Mac, and outlines various software applications that can replace the familiar Microsoft products.

Crossing the Thinnest Line Lauren Leader-Chivee, 2016-09-20 FROM THE VERY

FOUNDING OF OUR NATION, diversity has been one of our greatest strengths but also the greatest source of conflict. In less than a generation, America will become minority-majority, and the world economy, already interconnected, will be even more globalized. The stakes for how we handle this evolution couldn't be higher. Will diversity be a source of growth, prosperity, and progress-or perpetual division and strife? America has the potential to realize huge gains economically and socially by more fully capitalizing on diversity, but significant challenges remain and it's a problem that all Americans should be focused on solving. Despite tremendous progress, women and minorities still face barriers to accessing the full promise of the American dream. It doesn't have to be this way. Many of the solutions are right in front of us, and many exceptional, committed Americans are doing their part to make a difference. In the twenty-first century, nations will prosper only insofar as they embrace and celebrate the individuals, organizations, and collective efforts to advance every kind of diversity. Lauren Leader-Chivée believes America must lead the way. In *CROSSING THE THINNEST LINE*, she explores the state of our diverse union and shares important stories of progress and potential, highlighting those who are crossing dividing lines of race, gender, culture, and political party to build a more united and prosperous nation. Her revelations will transform the discussion and set the agenda for America's progress on these critical issues. A work of originality and ambition, *CROSSING THE THINNEST LINE* changes our understanding of diversity and offers

lessons to change our lives and our country.

Cases in Marketing Management Kenneth E. Clow, Donald Baack, 2011-03-28 This comprehensive collection of 38 cases selected from Ivey Publishing helps students understand the complex issues that marketing professionals deal with on a regular basis. The cases were chosen to help students apply conceptual, strategic thinking to issues in marketing management, as well as provide them with more practical operational ideas and methods. Cases were chosen from

around the world, from small and large corporations, and include household names such as Twitter, Best Buy, Ruth's Chris, and Kraft Foods. The majority of the cases are very recent (from 2009 or later). Each chapter begins with an introductory review of the topic area prior to the set of cases, and questions are included after each case to help students to think critically about the material. Cases in Marketing Management is edited by Kenneth E. Clow and Donald Baack, and follows the structure and goals of their textbook Marketing Management: A Customer-Oriented Approach. It can also be used as a stand-alone text, or as a supplement to any other marketing management textbook, for instructors who want to more clearly connect theory and practice to actual cases.
