Venture Capital and the Corporate Governance of Chinese Listed Companies Lin Zhang, 2011-10-20 State-controlled listed companies have always dominated Chinese stock markets. As a result of the rampant scandals related to them, there have been voluminous academic efforts to explore their corporate governance, underpinned by agency costs. However, these studies have yet to examine the phenomenon from the perspective of venture capital and adaptive efficiency. During the last ten years, despite China's remarkable progress in the development of its venture capital market, its domestic venture capital has been marginalized by American competitors. Given the different performance between them, the author contends that the corporate governance system of Chinese state-controlled listed companies has hampered the performance of the institutional factors which are responsible for the prosperity of American venture capital in Chinese venture capital markets. With the practice of American venture capital as the mirror, he empirically demonstrates that Chinese domestic venture capital lacks the four factors related to the success of their American counterparts: large and independent funding, application of incentive mechanisms, efficient exit channels, and a high risk tolerance level. More importantly, these defects as a whole are closely linked to the corporate governance of state-controlled listed companies. Considering the potential negative consequences on economic and social development, the author identifies policy reforms underway to harmonize agency costs and adaptive efficiency.

Quest for Space: The Indian Connect, 2014-02-15 Human endeavours in space over the past six decades have reached a stage that just about every facet of human life today has some complement of space capability contributing to it, encompassing the entire spectrum from telecommunications, navigation, weather forecasting, remote sensing, broadcasting and disaster management. Space exploration actually owes its origins to matters military, with civil applications coming about as a by-product. Capability building in space thereafter has witnessed frenzied progress, in the spheres of both the military and the civil/commercial. With an ever increasing number of countries joining the space bandwagon, space is getting congested and competitive. International legislation on space, though well meaning, is largely viewed to be inadequate to address the concerns of equitable access to space and more alarmingly, is reticent on the issue of militarisation and weaponisation. The Indian presence in the global space order is rather significant. Ranking sixth globally in terms of space budget and technological capability, India is capable of going beyond its calling. Its multi-dimensional space programme spans almost the entire spectrum from space launch to satellite construction and their employment in a large array of development-centric applications, and in recent years, in missions beyond the Earth. The Mangalyaan mission to Mars currently underway symbolises India's indigenous technological prowess and is a harbinger of its capability of cementing its status as a responsible space player at the global level. India, thus, stands today, technologically robust and self-reliant - well poised in the global space order to look beyond its domestic charter and address the concerns of the international global community. Space legislation, situational awareness and international cooperation in space security are some of the geostrategic options analysed in this book, which could facilitate Indian positioning in the global space order.

Persistent Object Systems: Design, Implementation, and Use Graham N.C. Kirby, Alan Dearle, Dag I.K. Sjoberg, 2003-06-30 The Ninth International Workshop on Persistent Object Systems (POS 9) took place at the SAS Radisson Hotel in Lillehammer, Norway, from 6th to 8th September 2000. Previous workshops in the series have been held in Scotland (1 and 2), Australia (3), the USA (4), Italy (5), France (6), and the USA (7 and 8). In keeping with those workshops, POS 9 was short but intensive, fitting 28 papers and panel sessions, a boat 1 excursion, and some memorable meals into two and a half days. The participants' concentration was no doubt helped by the Northern European weather that prevailed for most of the workshop. Continuing a trend experienced over the previous few workshops, POS 9 had difficulty attracting a high number of papers. Of

course it is hard to tell whether this is a problem with the field of persistent systems itself, or merely a consequence of the increasing number of workshops, conferences, and journals competing for submissions. In his Epilogue to the proceedings, Ron Morrison makes some interesting suggestions for possible improvements to future POS workshops. Out of a total of 26 submitted papers, 19 were accepted for presentation at the 2 workshop. Breaking down by region, 6 1/2 came from the USA , 1 from Africa, 3 1/2 from Australia, and 8 from Europe. In a new development for POS, an equal number of papers came from England and from Scotland.

Television Studies After TV Graeme Turner,Jinna Tay,2009-03-27 Television studies must now address a complex environment where change has been vigorous but uneven, and where local and national conditions vary significantly. Globalizing media industries, deregulatory policy regimes, the multiplication, convergence and trade in media formats, the emergence of new content production industries outside the US/UK umbrella, and the fragmentation of media audiences are all changing the nature of television today: its content, its industrial structure and how it is consumed. Television Studies after TV leads the way in developing new ways of understanding television in the post-broadcast era. With contributions from leading international scholars, it considers the full range of convergent media now implicated in understanding television, and also focuses on large non-Anglophone markets - such as Asia and Latin America — in order to accurately reflect the wide variety of structures, forms and content which now organise television around the world.

Milestones & Guideposts of Massachusetts and Southeastern New Hampshire Mary E. Gage,James E. Gage,2014-02-03 Across Massachusetts, roadsides are dotted with small stone markers giving the mileage to major cities. These ancient road signs called milestones aided travelers during the 1700's and 1800's as our road signs today do with their mileage and destination information. Although, these old milestones no longer serve a useful purpose in our modern age of highways, they continue to fascinate us. This fascination has led to the preservation by local communities of at least 129 milestones in Massachusetts and a number of milestones in New Hampshire. Milestones were for the most part commissioned by private citizens and made by local or itinerant stone carvers. With the exception of the turnpike milestones, no two milestones are alike. There are differences in the type of stone chosen, the wording, and the lettering styles of individual carvers. These differences give the milestones personality and character. This sense of character is one of the endearing aspects of these humble road signs that continues to draw us to them. Although some of the milestones like those around Boston and those along the famous Upper Post Road are well known, many are not. The authors have spent a number of years combing through old books and newspapers and traveling through the state in search of these local historical treasures. This book draws together all of their research in an effort to provide a comprehensive inventory of Massachusetts milestones. In addition, it includes milestones the authors have found in their travels through southeastern New Hampshire.

The Impact of International Achievement Studies on National Education Policymaking Alexander W. Wiseman, 2010-12-13 Discusses the uses of international achievement study results as a tool for national progress as well as an obstacle. It also discusses what the future of international achievement studies holds.

Of War and Men Ralph LaRossa, 2011-07-15 Fathers in the 1950s tend to be portrayed as wise and genial pipe-smokers or distant, emotionless patriarchs. To uncover the real story of fatherhood during the 1950s, LaRossa takes the long view, revealing the myriad ways that World War II and its aftermath shaped men.

A History of Ambition in 50 Hoaxes (History in 50) Gale Eaton, 2016-09-06 What do the Trojan Horse, Piltdown Man, Keely Motor Company, and Ponzi Scheme have in common? They were all famous hoaxes, carefully designed and bolstered with false evidence. The con artists in this book pursued a variety of ambitions—making money, winning wars, mocking authority, finding fame, trading an ordinary life for a glamorous one—but they all chose the lowest, fastest road to get there. Every hoax is a curtain, and behind it is a deceiver operating levers and smoke machines to make us see what is not there and miss what is. As P.T. Barnum knew, you can short-circuit critical thinking in any century by telling people what they want to hear. Most scams operate on a personal scale, but some have shaped the balance of world power, inspired explorers to sail uncharted seas, derailed scientific progress, or caused terrible massacres. A HISTORY OF AMBITION IN 50 HOAXES guides us through a rogue's gallery of hustlers, liars, swindlers, imposters, scammers, pretenders, and cheats. In Gale Eaton's wide-ranging synthesis, the history of deception is a colorful tour, with surprising insights behind every curtain. Fountas & Pinnell Level Z+

Logical Data Modeling Alan Chmura, J. Mark Heumann, 2004-09-29 Logical Data Modeling offers business managers, analysts, and students a clear, basic systematic guide to defining business information structures in relational database terms. The approach, based on Clive Finkelstein's business-side Information Engineering, is hands-on, practical, and explicit in terminology and reasoning. Filled with illustrations, examples, and exercises, Logical Data Modeling makes its subject accessible to readers with only a limited knowledge of database systems. The book covers all essential topics thoroughly but succinctly: entities, associations, attributes, keys and inheritance, valid and invalid structures, and normalization. It also emphasizes communication with business and database specialists, documentation, and the use of Visible Systems' Visible Advantage enterprise modeling tool. The application of design patterns to logical data modeling provides practitioners with a practical tool for fast development. At the end, a chapter covers the issues that arise when the logical data model is translated into the design for a physical database.

Winning the Long War Ilan Berman, 2009-06-16 Winning the Long War is a trenchant examination of the past seven years of the Global War on Terror, the future battlegrounds that will confront the United States in the struggle against radical Islam in the years ahead, and how America can reclaim the initiative in what has become the defining struggle of the twenty-first century. Middle East expert Ilan Berman offers new thinking on counterterrorism strategy and provides the new administration with ways to close the gaps in current American counterterrorism strategy. While there are many books about fighting terrorism, none offer Berman's approach of integrating diplomatic, legal, economic, military, and theoretical strategies into a comprehensive national security action plan. Using cutting edge analysis of current terrorism trends, Winning the Long War identifies three central failings that triggered the West's retreat and radical Islam's simultaneous advance: the failure to properly define the enemy, the inability to dominate the battlefields, and the inability to calibrate counterterrorism strategies. Demonstrating the need for more creative

thinking about the nature of the conflicts in which the West now finds itself, this book lays out the steps that must be taken to win the long war.

Global Ethics Mervyn Frost, 2008-09-26 This provocative and original book challenges the commonplace that contemporary international interactions are best understood as struggles for power. Eschewing jargon and theoretical abstraction, Mervyn Frost argues that global politics and global civil society must be understood in ethical terms. International actors are always faced with the ethical question: So, what ought we to do in circumstances like these? Illustrating the centrality of ethics to our understanding of global politics and global civil society with detailed case studies, Frost shows how international actors constitute one another in global social practices that are underpinned by specific ethical commitments. Case Studies examined include: The War on Iraq The 'Global War on Terror' Iran Human Rights Globalization and Migration The use of Private Military Companies. Global Ethics forces readers to confront their own necessary ethical engagement as citizens and rights holders in global society. Failure to understand international relations in ethical terms will lead to misguided action. This book should be read by all scholars and students of international relations as well as the general reader seeking an accessible account of the importance of ethical decisions in world affairs.

The New Arab Public Sphere Muhammad I. Ayish, Muḥammad 'Iṣām 'Āyish, 2008-02-20 The introduction of satellite television and Web-based communications in traditional societies are often taken as manifestations of a new more democratic public sphere. In the book this Western intellectual tradition is taken to task for failing to grasp the real dynamics of an Arab public sphere that has yet to be realized. The author argues that we could not conceive of the Arab public sphere outside the boundaries of sustainable egalitarian and participatory political developments in Arabian societies. Ayish harnesses the notion of 'Islamocracy' or Islamic democracy to put forward a new public sphere perspective that draws on both Islamic moral values and contemporary political practices. According to the author, this synthesist approach holds a great promise both for inter-Arab World communications as well as for dialogue with other cultures based on mutual recognition and peaceful coexistence. Muhammad I. Ayish is Professor and Dean of the College of Communication at the University of Sharjah in the United Arab Emirates. He holds a Ph.D. in international communication (University of Minnesota, Twin-Cities). Ayish has published two books and over 50 articles in both Arabic and English on issues ranging from political communication to media convergence to war coverage to women representation.

The Decline of America David D. Schein, 2018-02-13 The Decline of America offers a carefully documented analysis of the last seventeen U.S. presidents. These men, eight Democrats and nine Republicans, have shaped the last 100 years, not only for America, but for the world. Each president is profiled with unsparing scrutiny so we can see where it's all gone wrong. David Schein follows these critiques by proposing ways to improve America's outlook for the next 100 years—before it's too late.
