The Tank in Action Captain D. G. Browne, 2018-05-23 This a valuable, accurate, and rare contemporary account by an officer who won the Military Cross serving with the 7th Bn. Tank Co. It contains detailed accounts of a large number of tank actions, including, from personal experience, the Cockcroft, Cambrai, Bourlon Wood, 1918 battles. Cyril Falls wrote of this book in his bibliography War Books: ...his best chapters are those of an eyewitness. He is at times severely critical & perhaps even unjust, though he has obviously tried not to be. For the reader who contemplates tackling one book only on tanks in the War this is probably the best, for Captain Browne is a lucid & entertaining writer. T./Lt. Douglas Gordon Browne, 7th Bn., Tank Co. Awarded the Military Cross, London Gazette 1st February 1919. For conspicuous gallantry and devotion to duty. He showed great ability and skill as company reconnaissance officer in operations on 27th September, 1918, near Inchy-en-Artois, and on 30th September at Sancourt. In the first case the success of the operation was mainly due to his reconnaissance of the Canal du Nord and of the route up to it. He led the Tanks right up to the front line, and set each one off in the right direction at zero hour. In the second case there was no time to make reconnaissance of the ground up to the starting point, but he led the Tanks on an extremely dark night up to the jumping off point under shell fire.

Open Data White Paper Great Britain. Cabinet Office, 2012-06-28 This White Paper sets out clearly how the UK will continue to unlock and seize the benefits of data sharing in the future in a responsible way. Firstly by ensuring equality in access to data; secondly in building greater trust in public data; and thirdly by ensuring that public services are more personalised and efficient by being smarter with the data public bodies hold. The UK is currently co-chairing the Open Government Partnership of 55 governments whose theme is 'Transparency drives prosperity' with the belief that opening up data will empower citizens, foster innovation and reform public services. It is also, therefore, about how others participate. About businesses and organisations becoming more transparent themselves and pushing data into the public domain and individuals taking that data and using it to make better decisions or press for different types of services.
