*Experimenting with Emerging Media Platforms* Dan Pacheco, 2023-06-01 Experimenting with Emerging Media Platforms teaches students in media tracks – journalism, advertising, film, and public relations – how to independently

field test and evaluate emerging technologies that could impact how media is produced, consumed, and monetized in the future. Through focused assignments, this book provides pointers on how to familiarize oneself with current technology, including extended reality (XR, VR, AR, and MR), open-source coding, photogrammetry, aerial imagery using drones, automation, and artificial intelligence. Readers are invited to create and test their own hypotheses and work outside of their comfort zones to reach conclusions on how a technology could enhance storytelling for a particular audience. Through experimentation guided by workbook exercises, case studies from students and media practitioners, practical tips, and reminders about ethical decision-making, students will learn how to work like explorers and civic hackers to enact change in the media landscape. Readers are invited to share their final field test results online through the book's companion website and social media channels, where the author will post links to further reading, coding templates for simple projects, and short video tutorials.
