Modernity, Metatheory, and the Temporal-Spatial Divide Michael Kimaid, 2015-03-27 This book is about how modernity affects our perceptions of time and space. Its main argument is that geographical space is used to control temporal progress by channeling it to benefit particular political,

economic and social interests, or by halting it altogether. By incorporating the ancient Greek myth of the Titanomachy as a conceptual metaphor to explore the elemental ideas of time and space, the author argues that hegemonic interests have developed spatial hierarchy into a comprehensive system of technocratic monoculture, which interrupts temporal development in order to maintain exclusive power and authority. This spatial stasis is reinforced through the control of historical narratives and geographical settings. While increasingly comprehensive, the author argues that this state of affairs can best be challenged by focusing on the development of unmappable places which presently exist within the socio-spatial matrix of the modern world.

The People Shall Rule Robert Fisher, 2009-10-16 With the election of a community organizer as president of the United States, the time is right to evaluate the current state of community organizing and the effectiveness of ACORN (Association of Community Organizations for Reform Now). Since 2002, ACORN has been dramatically expanding and raising its national profile; it has also been weathering controversy over its voter registration campaigns and an internal financial scandal. The twelve chapters in this volume present the perspectives of insiders like founder Wade Rathke and leading outside practitioners and academics. The result is a thorough detailing of ACORN's founding and its changing strategies, including vivid accounts and analyses of its campaigns on the living wage, voter turnout, predatory lending, redlining, school reform, and community redevelopment, as well as a critical perspective on ACORN's place in the community organizing landscape.

Wolves in Sheep's Clothing Stephen Marshall, 2007-01-01 Faced with the collapse of the American dream at home and the decline of their global empire abroad, American liberals have dumped the 1960s-era radicalism of their youth and become complicit in a complex game of bait-and-switch, selling the world a vision of liberal democracy that is, in reality, a failed system on the verge of social and economic collapse. In the tradition of Tom Wolfe and Hunter S. Thompson, Stephen Marshall, a Sundance Award-winning director and co-founder of Guerrilla News Network, hits the road and travels from the front lines of the Iraq war, through the wasteland of the former Communist

Eastern bloc, into a coke-dusted sex party of Britain's intellectual elite, and into the minds of America's most influential liberal figures. Marshall finds America's most powerful liberals, all part of the same baby boomer generation that has dominated US political life since their voices broke in the 1960s, pushing a new form of "liberal interventionism" that threatens to use force to bring political freedom to oppressed people. But is the democracy they are exporting to the world really what they say it is? Or have liberals buckled under the pressure of America's declining fortunes and taken on the role of good cop to the conservatives' bad? Featuring interviews with Christopher Hitchens, Gore Vidal, David Horowitz, Lewis Lapham, John Avlon, The Economist's John Micklethwait, Guardian Editor-in-Chief Alan Rusbridger, and best-selling authors Thomas Friedman, Paul Berman, and John Perkins.

Arming without Aiming Stephen P. Cohen, Sunil Dasgupta, 2013-01-14 India has long been motivated to modernize its military, and it now has the resources. But so far, the drive to rebuild has lacked a critical component—strategic military planning. India's approach of arming without strategic purpose remains viable, however, as it seeks great-power accommodation of its rise and does not want to appear threatening. What should we anticipate from this effort in the future, and what are the likely ramifications? Stephen Cohen and Sunil Dasgupta answer those crucial questions in a book so timely that it reached number two on the nonfiction bestseller list in India. Two years after the publication of Arming without Aiming, our view is that India's

strategic restraint and its consequent institutional arrangement remain in place. We do not want to predict that India's military-strategic restraint will last forever, but we do expect that the deeper problems in Indian defense policy will continue to slow down military modernization.—from the preface to the paperback edition
