The Oxford Handbook of Military Psychology Janice H. Laurence, Michael D. Matthews, 2012-02-24 The critical link between psychology and the military is important to recruiting, training, socializing, assigning, employing, deploying, motivating, rewarding, maintaining, managing, integrating, retaining, transitioning, supporting, counseling, and healing military members. These areas are hardly distinct, and the chapters in *The Oxford Handbook of Military Psychology* have contents that cross these boundaries. Collectively, the topics covered in this volume describe the myriad ways in which modern psychology influences warfare and vice versa. The extensive topics included come from within the areas of clinical, industrial/organizational, experimental, engineering, and social psychology. The contributors are top international experts in military psychology -- some uniformed soldiers, others academics and clinicians, and others civilian employees of the military or other government agencies. They address important areas in which the science and practice of psychology supports military personnel in their varied and complex missions. Among the topics addressed here are suitability for service, leadership, decision making, training, terrorism, socio-cultural competencies, diversity and cohesion, morale, quality-of-life, ethical challenges, and mental health and fitness. The focus is the ways in which psychology promotes the decisive human dimension of military effectiveness. Collectively, the 25 topical chapters of this handbook provide an overview of modern military psychology and its tremendous influence on the military and society as a whole.

Make Me a Story Lisa Miller, 2023-11-22 When teachers and students first learn about digital

stories, they often focus on the bells and whistles: images, music, sound effects, and so on. To Lisa Miller, a good digital story -- like any good story -- is all about the writing. In *Make Me a Story*, Lisa shows how to use digital stories to lead students through all phases of the writing process, from planning to revising and editing. Digital storytelling uses computers and software to marry text with art -- photographs, drawings, paintings, and video -- as well as narration and music. Lisa leads teachers step-by-step through the process of writing a digital story in an accessible (even for the computer neophyte), instructional, and entertaining way. Through the projects outlined in the book, students learn how to write good stories, make art and text work together, and use technology in creative ways. *Make Me a Story* discusses different types of digital stories, shows how to assess digital assignments and motivate reluctant writers, and explains how digital storytelling teaches skills supported by national education and technology standards. Teachers will find specific suggestions for writing exercises and various ways to get students thinking about how best to tell their stories. The accompanying CD includes examples of student stories discussed in the text.
