Imperfect Oracle Theodore L. Brown,2015-08-26 Science and its offshoot, technology, enter into the very fabric of our society in so many ways that we cannot imagine life without them. We are surrounded by crises and debates over climate change, stem-cell research, AIDS, evolutionary theory and “intelligent design,” the use of DNA in solving crimes, and many other issues. Society is virtually forced to follow our natural tendency, which is to give great weight to the opinions of scientific experts. How is it that these experts have come to acquire such authority, and just how far does their authority reach? Does specialized knowledge entitle scientists to moral authority as well? How does scientific authority actually function in our society, and what are the countervailing social forces (including those deriving from law, politics, and religion) with which it has to contend? Theodore Brown seeks to answer such questions in this magisterial work of synthesis about the role of science in society. In Part I, he elucidates the concept of authority and its relation to autonomy, and then traces the historical growth of scientific authority and its place in contemporary American society. In Part II, he analyzes how scientific authority plays out in relation to other social domains, such as law, religion, government, and the public sphere.

Understanding Youth in the Global Economic Crisis Alan France,2016-03-24 In this innovative book, Alan France looks not at the economic impact of the global economic crisis and great recession of the past decade, but at the effect these forces have had on our very understanding of youth through its associated institutions. Using eight countries as case studies, he undertakes an in-depth sociological analysis of historical and contemporary developments in secondary education, training, work, and welfare policy to show how the ecological landscape of youth has been affected. Mapping the growing influence of neoliberalism as a political strategy in each of the countries, he shows how, after the crisis, the reconfiguration of institutions and practices that are central to the lives of the young is accelerating, bringing new meaning to youth, age, transition, diversity, risk, and inclusion.

The Decline of the Guru P. Altbach,2003-05-01 The academic profession faces new challenges everywhere. The pressures of mass higher education, accountability, fiscal constraints, distance education and the new technologies, and changing attitudes concerning academic work have combined to place unprecedented strains on the professoriate. There is no country that has avoided these challenges, although the changes vary. This book brings together some of the best analysts of the academic profession in a wide ranging comparative analysis of the changing academic workplace. The stress here is on middle income and developing countries, but the issues discussed are relevant everywhere. This book, precisely because of its comparative and international perspective, is useful worldwide. Among the topics considered in the case study chapters are: - The changing demographics of the academic profession, including the role of gender in the professoriate - New developments in academic appointments, including the terms of academic work, evaluation of professors, and the tenure system - External pressures on the academic profession, including demands for accountability, threats to academic freedom, and others - The changing nature of academic work, including patterns of teaching and evaluation of students and increases in teaching responsibilities - The role of research in a changing academic environment - The impact of the new technologies and distance education - Future prospects for the professoriate.

Statelessness in the Caribbean Kristy A. Belton, 2017-08-25 Without citizenship from any country, more than 10 million people worldwide are unable to enjoy the rights, freedoms, and protections that citizens of a state take for granted. They are stateless and formally belong nowhere. The stateless typically face insurmountable obstacles in their ability to be self-determining agents and are vulnerable to a variety of harms, including neglect and exploitation. Through an analysis of statelessness in the Caribbean, Kristy A. Belton argues for the reconceptualization of statelessness as a form of forced displacement. Belton argues that the stateless--those who are displaced in place--suffer similarly to those who are forcibly displaced, but unlike the latter, they are born and reside within the country that denies or deprives them of citizenship. She explains how the peculiar form of displacement experienced by the stateless often occurs under nonconflict and noncrisis conditions and within democratic regimes, all of which serve to make such people's plight less visible and consequently heightens their vulnerability. Statelessness in the Caribbean addresses a number of current issues including belonging, migration and forced displacement, the treatment and inclusion of the ethnic and racial other, the application of international human rights law and doctrine to local contexts, and the ability of individuals to be self-determining agents who create the conditions of their own making. Belton concludes that statelessness needs to be addressed as a matter of global distributive justice. Citizenship is not only a necessary good for an individual in a world carved into states but is also a human right and a status that should not be determined by states alone. In order to resolve their predicament, the stateless must have the right to choose to belong to the communities of their birth.
