Understanding Digital Technologies and Young Children

Susanne Garvis,Narelle Lemon,2015-09-08 Understanding Digital Technologies and Young Children explores the possibilities digital

technology brings to enhance the learning and developmental needs of young children. Globally, the role of technology is an increasingly important part of everyday life. In many early childhood education frameworks and curricula around the world, there is an expectation that children are developing skills to become effective communicators and are using digital technology to investigate their ideas and represent their thinking. This means that educators throughout the world are expected to actively enhance children's learning in ways that provide learning experiences with technology that are balanced and purposeful to allow the transformation of traditional authentic learning experiences. Digital technologies can be used to explore, manipulate, discover, play and interact with real and imaginative worlds to allow active meaning making. With a wide range of expert contributors, this book provides a comprehensive examination of the current research on technology and young children and the importance of engagement for learning. This approach encourages the reader to rethink the possibilities and potential of digital technologies for learning in the early years, especially in the years before formal schooling when children might be attending early childhood settings. This will be a valuable reference for anyone looking for an international perspective on

digital technology and young children, and is particularly aimed at current and future teachers.

The Unveiling Origin of Mecca Mohammed Alal

Khan,2021-09-12 The Unveiling Origin of Mecca provides insights into the history of Kaaba (Ka'ba) in Mecca. The Ka'ba is the first house built on earth. It is one of the few and perhaps the only Islamic History books that looks at modern archaeological evidence and the Holy Quran and the history of the Quran to explore the proper location of the Ka'ba. The author notes that in the Holy Quran, Mecca, sometimes also called Becca, which words are synonymous, and signify "a place of great intercourse," is undoubtedly one of the most ancient cities in the world. Some authors imagine it to be the Mesa, or Mesha, of the Scripture and that it deduced its name from one of Ishmael's sons. It stands in a stony and barren valley, surrounded by mountains under the exact

parallel with the Macoraba of Ptolemy, and about 40 Arabian miles from the sea 'Al Kolzom. There is a magnificent temple in the city, like the Colosseum at Rome. However, it is not made of such large stones but burnt bricks and round in the same manner. It has ninety or one hundred doors around it and is arched...upon entering the temple you descend ten or twelve steps of marble, and here and there about the said entrance there stand men who sell jewels and nothing else. Researching ancient Islam and the origin of Mecca, the author asserts that the Ka'ba is currently misplaced, contradicting the Holy Quran and Arabian geography. Although there are many Islamic scholars and Quran research Institutes throughout the world, sadly, none of them have yet verified the exact places, mountains surrounding Ka'ba, and its sacred area according to the Holy Quran.

Create a Magnificent Now! Alex Ledgister, PhD,2014-09-30

Create a Magnificent NOW! is the first book about the law of attraction that presents a failsafe solution for achieving optimal health, wealth, and self-fulfillment. Coach Alex reveals what he believes is the real secret behind powerful manifestation. By embracing this secret and making it the cornerstone of the LOA process, Coach Alex believes that anyone can manifest whatever one desires -- as long as the end result will never harm anyone else. This book removes the fairy dust from the LOA and its practices of meditation, visualization, and manifestation. Coach Alex points out that magic is nothing more than physical laws scientifically explained. By citing numerous laboratory studies

based on the work of some of the world's most trusted scientists, he provides measurable validation of the efficacy of the LOA through the new science of neuroplasticity. These studies also explain exactly why the LOA works. For the first time in the history of modern man, through actual demonstrations of the law of attraction, neuroplasticity builds a bridge between science and metaphysics. Skeptics who scorned the law of attraction as a New Age fad will think twice after studying the findings of these prestigious scientists. These studies confirm what ancient mystics and spiritual teachers have always known: unquestionably the LOA has the ability to improve the quality of any person's life. Create a Magnificent NOW is a book about the law of attraction written by a professional life coach who personally used this universal law to jumpstart his own life; in the process, discovering a secret failsafe method for successful manifestation.
