Artificial War Andrew Ilachinski,2004 Military conflicts, particularly land combat, possess the characteristics of complex adaptive systems: combat forces are composed of a large number of nonlinearly interacting parts and are organized in a dynamic command-and-control network; local action, which often appears disordered, self-organizes into long-range order; military conflicts, by their nature, proceed far from equilibrium; military forces adapt to a changing combat environment; and there is no master 'voice' that dictates the actions of every soldier (i.e., battlefield action is decentralized). Nonetheless, most modern 'state of the art' military simulations ignore the self-organizing properties of combat. This book summarizes the results of a multiyear research effort aimed at exploring the applicability of complex adaptive systems theory to the study of warfare, and introduces a sophisticated multiagent-based simulation of combat called EINSTEIN. EINSTEIN, whose bottom-up, generative approach to modeling combat stands in stark contrast to the top-down or reductionist philosophy that still underlies most conventional military models, is designed to illustrate how many aspects of land combat may be understood as self-organized, emergent phenomena. Used worldwide by the military operations research community, EINSTEIN has pioneered the simulation of combat on a small to medium scale by using autonomous agents to model individual behaviors and personalities rather than hardware.

Violence and War in Culture and the Media Athina Karatzogianni,2013-06-17 This edited volume examines theoretical and empirical issues relating to violence and war and its implications for media, culture and society. Over the last two decades there has been a proliferation of books, films and art on the subject of violence and war. However, this is the first volume that offers a varied analysis which has wider implications for several disciplines, thus providing the reader with a text that is both multi-faceted and accessible. This book introduces the current debates surrounding this topic through five particular lenses: the historical involves an examination of historical patterns of the communication of violence and war through a variety sources the cultural utilises the cultural studies perspective to engage with issues of violence, visibility and spectatorship the sociological focuses on how terrorism, violence and war are remembered and negotiated in the public sphere the political offers an exploration into the politics of assigning blame for war, the influence of psychology on media actors, and new media political communication issues in relation to the state and the media the gender-studies perspective provides an analysis of violence and war from a gender studies viewpoint. *Violence and War in Culture and the Media* will be of much interest to students of war and conflict studies, media and communications studies, sociology, security studies and political science.

Biblical Studies on the Internet Roland H. Worth,2002-01-01 With this handbook of currently available internet resources (for use online or to be downloaded to one's personal computer), the users can locate the exact spot on the internet to find the materials they want. And they will save countless hours of frustration and work. Over 3,300 websites provide information on a range of topics: English language Bible translations that can be used online or downloaded, sites to listen to hymns on the Internet, Bible translations into 57 non-English languages, non-English commentaries, dictionaries, and other resource materials, Hebrew, Greek, and other ancient language texts and resource materials, numerous commentaries on any one single biblical book or on the entire scriptural canon, supplemental materials dealing with everything from devotional studies to issues of fundamental biblical interpretation, and pseudo-authoritative writings related to the two testaments. Multiple sites are given for each resource cited whenever possible.

Getting Started with OpenVMS System Management David Miller,2003-05-08 Getting Started with OpenVMS System Management gives new VMS system managers a jumpstart in managing this powerful and reliable operating system. Dave Miller describes the essentials of what an OpenVMS System Manager will have to manage. He defines areas of OpenVMS System Management and describes why each is important and how it fits into the larger management task. Even though some OpenVMS management concepts are unique (for instance quotas), many concepts (such as account creation) have counterparts in UNIX and Windows NT. So, wherever possible, Miller points out to his readers the parallel to other systems. The book is intended as a precursor to Baldwin's OpenVMS System Management Guide and various OpenVMS documents. Thus it refers the reader to other books for the detailed management steps. Getting Started with OpenVMS System Management is a great introduction to the material Steve Hoffman and Dave Miller are revising for the OpenVMS System Management Guide, 2E. · Permits experienced system managers to begin managing OpenVMS more quickly · Dovetails with other Digital Press publications for easier reference by the OpenVMS manager · Points you in the right direction for the complete documentation on each issue · BONUS FEATURE! Includes excerpts from five key DP OpenVMS books

Framing the Global Economic Downturn Paul 't Hart,Karen Tindall,2009-09-01 The global economic downturn that followed the collapse of major US financial institutions is no doubt the most significant crisis of our times. Its effects on corporate and governmental balance sheets have been devastating, as have been its impacts on the employment and well being of tens of millions of citizens. It continues to pose major challenges to national policymakers and institutions around the world. Managing public uncertainty and anxiety is vital in coping with financial crises. This requires not just prompt action but, most of all, persuasive communication by government leaders. At the same time, the very occurrence of such crises raises acute questions about the effectiveness and robustness of current government policies and institutions. With the stakes being so high, defining and interpreting what is going on, how and why it happened, and what ought to be done now become key questions in the political and policy struggles that crises invariably unleash. In this volume, we study how heads of government, finance ministers and national bank governors in eight countries as well as the EU engage in such 'framing contests', and how their attempts to interpret the cascading events of the economic downturn were publicly received. Using systematic content analysis of speeches and media coverage, this volume offers a unique comparative assessment of public leadership in times of crisis.

Harmonious World and China's New Foreign Policy Sujian Guo,Jean-Marc F. Blanchard,2010-06-22 Harmonious World and China's New Foreign Policy consists of essays by China specialists on the Chinese government's characterization of foreign policy as a harmonious world. The essays deal with such topics as harmonious world and China's new diplomacy, China's multilateral diplomacy after the Cold War, China's changing image of and engagement with the world order, China's energy security diplomacy, and China's trade diplomacy. These insightful contributions will help students in this academic field understand the new concepts and programs adopted by the Chinese new leadership and their important implications for China's new foreign policy behavior in the years to

come.

Global Children's Literature in the College Classroom Sara Austin, Tanja Nathanael, 2023-06-15 This volume of critical essays explores global children's literary traditions and not just how non-US-centered children's literature is taught within college courses, but how it can be used to frame undergraduate pedagogy outside of the classroom.

Special Edition Using Microsoft FrontPage 2002 Neil Randall, Dennis Jones, 2001 For courses covering FrontPage. Special Edition Using Microsoft FrontPage 2002 is an all-in-one guide to designing, creating, and publishing Web applications using FrontPage 2002. It places a greater emphasis on the expansion of FrontPage and Office integration, which is a major issue for FrontPage. This book teaches students FrontPage 2002 and its features, as well as Web server setup and administration. It teaches students how to add interactivity to Web sites with Active Server Pages, and scripting languages, such as JavaScript. It also covers more advanced topics, such as how to integrate Web sites with databases; and how to incorporate Dynamic HTML, XML, and Java in your sites.

A Companion to Modern and Contemporary Latin American and Latina/o Art Alejandro Anreus, Robin Adèle Greeley, Megan A. Sullivan, 2021-11-09 In-depth scholarship on the central artists, movements, and themes of Latin American art, from the Mexican revolution to the present A Companion to Modern and Contemporary Latin American and Latinx Art consists of over 30 never-before-published essays on the crucial historical and theoretical issues that have framed our understanding of art in Latin America. This book has a uniquely inclusive focus that includes both Spanish-speaking Caribbean and contemporary Latinx art in the United States. Influential critics of the 20th century are also covered, with an emphasis on their effect on the development of artistic movements. By providing in-depth explorations of central artists and issues, alongside cross-references to illustrations in major textbooks, this volume provides an excellent complement to wider surveys of Latin American and Latinx art. Readers will engage with the latest scholarship on each of five distinct historical periods, plus broader theoretical and historical trends that continue to influence how we understand Latinx, Indigenous, and Latin American art today. The book's areas of focus include: The development of avant-garde art in the urban centers of Latin America from 1910-1945 The rise of abstraction during the Cold War and the internationalization of Latin American art from 1945-1959 The influence of the political upheavals of the 1960s on art and art theory in Latin America The rise of conceptual art as a response to dictatorship and social violence in the 1970s and 1980s The contemporary era of neoliberalism and globalization in Latin American and Latino Art, 1990-2010 With its comprehensive approach and informative structure, A Companion to Modern and Contemporary Latin American and Latinx Art is an excellent resource for advanced students in Latin American culture and art. It is also a valuable reference for aspiring scholars in the field.

Biennials, Triennials, and Documenta Anthony Gardner, Charles Green, 2016-05-23 This innovative new history examines in-depth how the growing popularity of large-scale international survey exhibitions, or 'biennials', has influenced global contemporary art since the 1950s. Provides a comprehensive global history of biennialization from the rise of the European star-curator in the 1970s to the emergence of mega-exhibitions in Asia in the 1990s Introduces a global array of case studies to illustrate the trajectory of biennials and their growing influence on artistic expression, from the Biennale de la Méditerranée in Alexandria, Egypt in 1955, the second Havana Biennial of 1986, New York's Whitney Biennial in 1993, and the 2002 Documenta11 in Kassel, to the Gwangju Biennale of 2014 Explores the evolving curatorial approaches to biennials, including analysis of the roles of sponsors, philanthropists and biennial directors and their re-shaping of the contemporary art scene Uses the history of biennials as a means of illustrating and inciting further discussions of globalization in contemporary art

Two Decades of Re-Emerging Russia: Challenges and Prospects Mr Sanjay Deshpande, 2015-04-15 Russia has been re-emerging as a major political and economic power during the last decade. The leadership of Russia claims that the objectives of transition from the former one-party socialist system to a plural multiparty democratic system and centralised planning to market economy are largely achieved. Russia is politically stable and has demonstrated how new political institutions, multiparty system are functioning under three presidents. In the initial years after the disintegration of the Soviet Union, the Russian economy passed through different phases such as crisis, boom and recovery. Russia has largely succeeded in managing its political and economic relations with "Near Abroad" which have witnessed considerable complexities over the last two decades. Russia has demonstrated that its bilateral ties with India in the political and defence sectors have been consistently cordial and close. However, trade and economic relations need to be strengthened. Notwithstanding its major achievements, Russia has been facing several problems, both in its domestic front and in its foreign relations. Some of the major problems on the domestic front are: over centralisation of power, nexus between state authorities, oligarchs and the bureaucracy, growing menace of corruption, surging political reactions by political parties and some former powerful leaders on various political issues, growing social discontent, issues between different ethnic groups, widening economic disparities among various sections of society and regions. On the external front, Russia has conflicts of interest with some former Soviet republics such as Georgia, Moldova, Ukraine and the Baltic states. Russia's relations with the US and NATO have been highly critical on political and security related issues. There is a need for an objective and critical evaluation of how Russia has managed its domestic and foreign affairs after the collapse of the Soviet Union. What were the successes and failures of Russia in its policies and performance with regard to the social, political and economic developments in the country? This book is an attempt to assess those developments.

Generational Shockwaves and the Implications for Higher Education Donald E. Heller, Madeleine d'Ambrosio, 2009-01-01 This is a fascinating book. Higher Education Review The Baby Boom generation did much to drive the transformation of American higher education that occurred in the 1960s. That extraordinary impact has invited many to think about how succeeding generations have challenged and will continue to challenge the assumptions and practices of educational institutions. This volume explores the significance of this generational perspective through observations from a variety of practitioners and observers of higher education. With stances ranging from unbridled enthusiasm to measured skepticism about the significance of generational change, these authors are sure to provide new insights to any thoughtful reader. Michael S. McPherson, President, The Spencer Foundation, US Our industry is extremely people intensive, so that understanding generational differences may be more important for us than for other industries. This book carefully portrays these generational differences and explores their implications for higher education. Catharine Bond Hill, President, Vassar College, US *Generational Shockwaves* is a must read for all of us in higher education who spend so much of our time working to enhance the educational and social success of our students as well as the scholarly and teaching success of our faculty. After reviewing this volume, no one can continue to support what too many in higher education still practice a one size fits all approach to the challenges we confront. Herman A. Berliner, Provost and Senior Vice President for Academic Affairs, Hofstra University, US This volume offers a sort of cultural seismography of higher education in the early 21st century. This is the most comprehensive and thoughtful treatment I have seen of an inexorable and tectonic trend that will challenge the status quo in profound and unprecedented ways. David W. Leslie, Chancellor Professor of Education Emeritus, The College of William & Mary, US This volume, part of the TIAA-CREF Institute Series on Higher Education, is based on a national conference convened by the Institute in November 2007. The generational issues that were the focus of the conference raise both risks and opportunities with the potential to profoundly affect our cultural environment, both inside and outside academe. Baby Boomers, in their roles as students, parents, professors and administrators, transformed the American higher education system. As Boomers near retirement, Generation X and the Millennials are building on those contributions and making their own impacts. This volume sheds light on a current front-burner issue in higher education: managing the melding of generations, each with its unique needs and approaches to teaching and learning. The result of discussions among presidents, provosts, and other senior-level leaders from the higher education community, as well as the scholarship of leading academics, this lucid and engaging volume addresses intergenerational shifts and their wide-ranging implications for higher education including relevant risks and opportunities for consideration by campus leaders. The type of institution represented in these discussions ranges from small teaching-focused institutions to community colleges and large comprehensive research institutions. The authors offer senior leadership a deeper understanding of these generational challenges and opportunities and provide them with new and actionable information to enhance decision-making and inform strategic planning. They offer scholars new research questions to examine and provide insights to enhance effective reporting on higher education issues. Higher education presidents, chancellors, provosts, CFOs, faculty, researchers and policymakers will find this volume to be of significant value.

Youth, Class and Everyday Struggles Steven Threadgold, 2017-09-13 The concept of everyday struggles can enliven our understanding of the lives of young people and how social class is made and remade. This book invokes a Bourdieusian spirit to think about the ways young people are pushed and pulled by the normative demands directed at them from an early age, whilst they reflexively understand that allegedly available incentives for making the 'right' choices and working hard – financial and familial security, social status and job satisfaction – are a declining prospect. In *Youth, Class and Everyday Struggles*, the figures of those classed as 'hipsters' and 'bogans' are used to analyse how representation works to form a symbolic and moral economy that produces and polices fuzzy class boundaries. Further to this, the practices of young people around DIY cultures are analysed to illustrate struggles to create a satisfying and meaningful existence while negotiating between study, work and creative passions. By thinking through different modalities of struggles, which revolve around meaning making and identity, creativity and authenticity, Threadgold brings Bourdieu's sociological practice together with theories of affect, emotion, morals and values to broaden our understanding of how young people make choices, adapt, strategise, succeed, fail and make do. *Youth, Class and Everyday Struggles* will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, of fields including: Youth Studies, Class and Inequality, Work and Careers, Subcultures, Media and Creative Industries, Social Theory and Bourdieusian Theory.
