*Applied and Computational Historical Astronomy. Angewandte und computergestützte historische Astronomie.* Gudrun Wolfschmidt, 2021-08-26 'Computational History' derives history from data and nowadays, therefore, relies on the technologies of the digital humanities. 'Computational History of Science' addresses questions of history by evaluating historical data, e.g. for tracing back copying traditions and conclude on transfer and transformation of data and knowledge. The term 'Applied Historical Astronomy', in contrast, tries to address questions of contemporary science by evaluating historical data in comparison with most recent data. This opens new possibilities, e.g. in the search for stellar transients among historical data. In the contribution by Hoffmann & Vogt we will focus on the stellar transients among all the topics mentioned above. Philipp Protte discusses the accuracy of magnitudes and positions in ancient star catalogues, Andreas Schrimpf & Frank Verbunt present an analysis of an early modern star catalogue. Victor Reijs analyses the visibility of celestial objects for naked-eye observers, and Björn Kunzmann showcases some important variable stars in the history of astronomy. Rene Hudec presents astronomical photographic archives as a valuable data source for modern astrophysics. José M. Vaquero discusses the studies on solar observations made during the last four centuries. More technical are the contributions of Georg Zotti on Stellarium and Karsten Markus-Schnabel on data-mining and data-processing technologies. Ido Yavetz & Luca Beisel are developing a digital tool of computational history of science for the simulation of pre-modern astronomical models. Gerd Graßhoff focuses more on the application of computational history with regard to Kepler's *Astronomia Nova* while Tim Karberg presents an analysis of the astronomical orientation of buildings in the North Sudan.

*The Arab Spring* Jason Brownlee, Tarek Masoud, Andrew Reynolds, 2015-02-19 Several years after

the Arab Spring began, democracy remains elusive in the Middle East. The Arab Spring that resides in the popular imagination is one in which a wave of mass mobilization swept the broader Middle East, toppled dictators, and cleared the way for democracy. The reality is that few Arab countries have experienced anything of the sort. While Tunisia made progress towards some type of constitutionally entrenched participatory rule, the other countries that overthrew their rulers Egypt, Yemen, and Libya remain mired in authoritarianism and instability. Elsewhere in the Arab world uprisings were suppressed, subsided or never materialized. The Arab Springs modest harvest cries out for explanation. Why did regime change take place in only four Arab countries and why has democratic change proved so elusive in the countries that made attempts? This book attempts to answer those questions. First, by accounting for the full range of variance: from the absence or failure of uprisings in such places as Algeria and Saudi Arabia at one end to Tunisia's rocky but hopeful transition at the other. Second, by examining the deep historical and structure variables that determined the balance of power between incumbents and opposition. Brownlee, Masoud, and Reynolds find that the success of domestic uprisings depended on the absence of a hereditary executive and a dearth of oil rents. Structural factors also cast a shadow over the transition process. Even when opposition forces toppled dictators, prior levels of socioeconomic development and state strength shaped whether nascent democracy, resurgent authoritarianism, or unbridled civil war would follow.

The Last Sacrifice Robert T. Estorga, 2017-08-08 Factual Crucifixion Story (based on new evidence) What incredible events occurred at the Crucifixion that caused a hardened Centurion to proclaim Jesus Christ as the Son of God, knowing that such failed allegiance to Caesar could cost him his life? And it did. —For 2,000 years, powerful messages delivered at the Crucifixion were deliberately hidden. This book reveals those messages, leaving no doubt as to Christ's true nature and mission.

Fictionalized Background Story (based on historical events) —Some leaders of the doomed Third Reich escaped, sparking a frantic hunt. Fueling the hunt was an alleged claim made by Nazi Admiral Doenitz, of an "...invulnerable fortress, a paradise-like oasis in the middle of eternal ice." Years later, an aging satellite inadvertently detected a cataclysmic event on or near a frozen region of the world, that would have sealed the fate of such a fortress. The event was officially denied. Fiction —As war erupts, former archeologist Zachary "Zac" Gomes is coerced by friends, compelled by an earth-shattering discovery, and finally kidnapped by a secret agency to recover a legendary relic stolen by post-war Nazis. All dedicate themselves in a climactic, must-win battle against an evil the world has (to this day) unwittingly embraced.

*Living in Bonus Time* Alec Hill, 2020-01-07 Cancer confronts us with our mortality. But cancer survivors find ourselves with a second chance for life. We grapple with profound questions: Why am I still here? How did I survive when others didn't? Where is God in all this? And how should I live differently now? Those who experience and survive cancer live in bonus time, a season of grace that can be both disorienting and wonderful. In this honest and hopeful account, two-time survivor Alec Hill helps readers recalibrate expectations, grapple with survivor's guilt, and steward the opportunities for new purpose and growth. As counterintuitive as it may seem, cancer can transform us emotionally and spiritually into better people. We are not the people we were before. Survivors and caregivers can discover how encountering death can bring us to a different kind of life.

**The Business of Transportation** Darren Prokop, 2014-05-12 This is a must-have resource for

anyone interested in the latest information about the complex field of transportation—and how it is transforming today's business environment. This wide-ranging, two-volume work explores the transportation industry in all its many guises. It demonstrates how transportation is vital to most businesses and how it facilitates trade and globalization. It also explains how transportation figures into environmental and supply chain security challenges in the modern world. The contributors get into the nitty-gritty of how the business of transportation works and who the players are. Equally important, they show why those who depend on transportation in their business cannot afford to ignore such details when seeking greater efficiency, growth, profit, and market share.

*Advertising: Using Words as Tools for Selling* Ms Ruta Kalmane, 2010-03-26 Today advertising is merely just a provision of descriptive information about certain goods and services. Advertising has developed over years becoming a manipulative source of information that uses our society's weaknesses as its strengths in order to benefit financially. The book *ADVERTISING: USING WORDS AS TOOLS FOR SELLING* provides an insight into the world of manipulative advertising language, describing how word interaction influences consumer choices and revealing the most popular ways of advertising claim formation using certain language means. Advertisement examples used in this book concentrate on beauty products as women are claimed to be an easy target thanks to their emotionality. The book will be interesting for both, those who trust advertising (it will make you think

twice before buying) and those who already donâ€™t.

**When Baseball Isn't White, Straight and Male** Lisa Doris Alexander, 2012-11-14 This book analyzes how sportswriters have discussed issues of race, ethnicity, nationality, sexual identity, age and class within professional baseball from 1998 to the present. Each chapter looks at the media representations of a specific controversy--the 1998 home-run chase, Alex Rodriguez's historic contract signing, Barry Bonds' home runs, Mike Piazza's I am not gay press conference, Effa Manley's Hall of Fame induction, the celebration of Jackie Robinson's legacy, as well as the various incidents involving performance-enhancing drugs. The author puts it together and reveals what messages are being conveyed by the issues.

**How the Bible Begins** John R. Heapes, 2021-05-24 How the Bible Begins: A Sociological Study uses a Dramaturgical Approach, borrowed from Erving Goffman. This theatrical metaphor has readers imagining society like a play in five acts: Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. The curtain goes up in Genesis to an empty, dark stage that, shortly afterwards, has its first performers appear—Adam, and then Eve. The foundation of this book rests on six fundamental questions which are answered within its pages: who, what, when, where, why, and how. Readers learn how many people populate each biblical book, each book's theme, when events took place, where action happened, what each book's purpose was, and how each book was composed. These books chronicled the passage of travelers who first departed Mesopotamia in search of the promised land, and later they left Egypt after four hundred years of slavery. Guided by God, these people formed a nation out of these epic journeys.

*Marked for Death* Geert Wilders, 2012-05-01 Marked for Death Fanatics, terrorists, and appeasers have tried everything to silence Geert Wilders, Europe's most controversial Member of Parliament—from putting him on trial to putting a price on his head. But Wilders refuses to be silenced—and one result is the book you have in your hands. For years, from his native Netherlands, Wilders has sounded the alarm about the relentless spread of Islam in the West. And he has paid a steep personal price, enduring countless death threats and being forced into a permanent state of hiding. Now, for the first time, Wilders offers a full account of his long battle against the zealots who have already slaughtered his countryman Theo van Gogh—whose killer also threatened to murder

Wilders himself. In *Marked for Death*, Wilders reveals: How—and why—liberal politicians, including Barack Obama, downplay the Islamic threat The systematic suppression of free speech through lawsuits, prosecutions, threats, and violence meted out against Islam's critics The untold story: how Islamic groups are redefining human rights to suppress non-Muslims everywhere The true, bloody history of Islam's spread throughout the world How the West can defend itself against an existential enemy determined to conquer the globe Expelled from Britain, banned from Indonesia, denounced by the UN Secretary General, prosecuted in court for his beliefs, forced into government safe houses, and constantly threatened with death, Geert Wilders is unbowed and unapologetic. *Marked for Death* is a stark warning about a growing threat to our liberties written by a man who has lost his freedom—and would not see the rest of us suffer the same fate.

*Air Power in the Indian Ocean and the Western Pacific* Howard M. Hensel, 2020-06-04 This book examines the security dynamics of the Indian Ocean and the Western Pacific, concentrating upon an analysis and evaluation of the air power capabilities of the various powers active in the two regions. The volume is designed to help improve understanding of the heritage and contemporary challenges confronting the global community in the Indian Ocean and the Western Pacific, as well as to illuminate the policies of the various powers involved in the affairs of these regions, and the military capabilities that are available in support of those policies. The 16 individual chapters examine both the traditional and the non-traditional threats that confront the various Indian Ocean and Western Pacific powers, and assess the roles played by land-based and naval, fixed-wing and rotary-wing, manned and unmanned aircraft, as well as by offensively and defensively capable ballistic and cruise missiles in addressing these challenges. In doing so, the various chapters analyze and evaluate the air power doctrine, capabilities, deployment patterns, and missions of the respective states. In addition, they

assess the future issues, challenges, and responses involving air power as it, acting in concert with other military instruments, seeks to contribute to securing and promoting the interests of the state. This book will be of much interest to students of air power, strategic studies, Asian and Middle Eastern politics, and International Relations.

**Pedagogic Criticism** Ben Knights, 2017-07-01 This book argues that the history of English Studies is embedded in its classroom practice, and its practice in its history. Some of its foundational struggles are still being lived out today. English is characterized as a 'boundary' subject, active in dialogue across a number of imagined borders, especially those between academic and non-specialized readerships. While the subject discipline maintains strong pedagogic principles, many of its principles and values are obscure or even invisible to students and potential students. The book cross-fertilizes the study of English as a subject with the analysis of selected literary texts read as pedagogic parables. It concludes with a call for a return to the subject's pedagogic roots.
