Color for Architects (Architecture Brief) Juan Serra Lluch,2019-05-14 As far back as the earliest Greek temples, color has been an integral part of architecture but also one of its least understood elements. Color theory is rarely taught in architecture schools, leaving architects to puzzle out the hows and whys of which colors to select and how they interact, complement, or clash. Color for Architects is profusely illustrated and provides a clear, concise primer on color for designers of every kind. This latest volume in our Architecture Briefs series combines the theoretical and practical, providing the basics on which to build a fuller mastery of this essential component of design. A wealth of built examples, exercises, and activities allows students to apply their learning of color to real-world situations.

No One Owns the Colors Gianna Davy,2023-02-07 For every young artist scolded for using the “wrong” color crayon, every boy teased for wearing a pastel shirt, every girl denied blue shoes, here’s the perfect response: All colors are for everyone. Just ask Nature! No One Owns the Colors is a lively celebration of self-expression and a bolstering invitation to advocate for your special uniqueness. The unnamed and non-gendered narrator shows us that colors are simply part of our natural world. No bit of the spectrum—from pink and blue to scarlet and chartreuse—is meant to be claimed by any one gender or being or culture. Color is not something that can be right or wrong, or better or worse. Inspired by school yard experiences of the author's own children, this melodic, rhythmic text provides the words and the confidence readers may need if someone says that their color—be it skin, shirt, shoes, or simply the crayon they love most—is wrong.

This unit, developed by Vanderbilt University's Programs for Talented Youth, is aligned to the Common Core State Standards for English Language Arts and Next Generation Science Standards. Ideal for gifted classrooms or gifted pull-out groups, the unit features fictional texts from Lynne Cherry, Katherine Applegate, and Jacqueline Woodson; art from Mark Rothko and Georges Seurat; informational texts about deforestation and a variety of animals; biographies about Michael Jordan, J. Colour Films in Britain Sarah Street, 2019-07-25 How did the coming of colour change the British film industry? Unlike sound, the arrival of colour did not revolutionise the industry overnight. For British film-makers and enthusiasts, colour was a controversial topic. While it was greeted by some as an exciting development – with scope for developing a uniquely British aesthetic – others were deeply concerned. How would audiences accustomed to seeing black-and-white films – which were commonly regarded as being superior to their garish colour counterparts – react? Yet despite this initial trepidation, colour captivated many British inventors and film-makers. Using different colour processes, these innovators produced films that demonstrated remarkable experimentation and quality. Sarah Street's illuminating study is the first to trace the history of colour in British cinema, and analyses the use of colour in a range of films, both fiction and non-fiction, including *The Open Road*, *The Glorious Adventure*, *This is Colour*, *Blithe Spirit*, *This Happy Breed*, *Black Narcissus*, *The Red Shoes*, *The Tales of Hoffmann* and *Moulin Rouge*. Beautifully illustrated with full colour film stills, this important study provides fascinating insights into the complex process whereby the challenges and opportunities of new technologies are negotiated within creative practice. The book also includes a Technical Appendix by Simon Brown (Kingston University, UK), which provides further details of the range of colour processes used by British film-makers.

Welcome to Our Real Matrix: One with No Escape Thomas Arant, 2021-05-21 Did you know that we (and all life) are unknowingly imprisoned? That your perception of Reality has little to do with the truth? In these ways, our existence is like the virtual reality in the movie, *The Matrix*. The differences are more overwhelming, including that our Real Matrix emerged through abiogenesis and evolution processes without intention nor direction (i.e., no sentient machines), and that there is no escape through taking a Red Pill. *Welcome to Our Real Matrix* proves all this using accepted science taken to its logical conclusion. It then explores the consequences of this truth and the possible paths for how and why to live this life, including the philosophies of Stoicism, Buddhism, and Existentialism. Finally, it introduces a community, the Purplepills Society, that has been established to continue the scientific and philosophical discussion.

Cinema and Colour Paul Coates, 2017-11-07 *Cinema and Colour: The Saturated Image* is a major new critical study of the use of colour in cinema. Using the dialectic of colour and monochrome as a starting point, Paul Coates explores the symbolic meanings that colour bears in different cultures, and engages with a range of critical approaches to filmic colour, building on the work of such theorists as Sergei Eisenstein, Rudolf Arnheim and Stanley Cavell. Coates also provides close analyses of films by directors such as Antonioni, Bergman, Godard, Hitchcock, Hou Hsiao-Hsien, Sirk, Kieslowski, Tarkovsky, Von Trier and Zhang Yimou. Coates' focus is on films that deliberately exploit the rich multiplicity of cultural meanings and associations ascribed to colour, including *All That Heaven Allows*, *Deux ou trois choses que je sais d'elle*, *The Double Life of Véronique*, *The Flight of the Red Balloon*, *Red Desert*, *Schindler's List*, *Silent Light*, *Solaris*, *The Three Colours Trilogy* and *The Wizard of Oz*.

Aliens in Ancient Egypt Xaviant Haze, 2013-10-31 The alien influences behind the rise and fall of Egypt's Golden Age • Explains how Akhenaten was the last pharaoh entrusted with the sacred and ancient alien knowledge of stargates, free energy, and antigravity technologies • Reveals how the Brotherhood of the Snake, a secret society of reptilian aliens, sought to destroy Akhenaten and suppress the sacred knowledge of the pharaohs • Explores the original purpose of the pyramids--to transmit energy to expand consciousness--and how they were decommissioned after the Great Flood The sophisticated civilization of ancient Egypt arose seemingly overnight, complete with advanced levels of art, agriculture, astronomy, and physics. Then, with the death of Pharaoh Akhenaten, much of this higher knowledge was lost--or suppressed. But evidence of this former Golden Age, the alien visitors behind its rise, and those behind its decline still exists--some of it in plain sight. Examining the purposefully obscured reign of Akhenaten and Nefertiti, Xaviant Haze explains how they represent the last dynasty with access to the sacred knowledge of stargates, free energy, and antigravity technologies, knowledge handed down from an advanced interstellar race in the remote past. He reveals how the reptilian race known as the Shemsu Hor infiltrated the Egyptian priesthood and banking systems and formed the Brotherhood of the Snake--a secret society set on destroying Akhenaten's flourishing kingdom and suppressing the sacred knowledge of the pharaohs. Haze examines the evidence of aliens in ancient Egypt, such as the reptilian beings depicted in the Temple of Hathor and Thutmose III's alien encounter. He shows how Akhenaten and his family are always portrayed with elongated skulls and explores the connection between ancient aliens and Mars, including the Martian materials used in Egyptian monuments. He explains the original purpose of the pyramids--to transmit uplifting energy throughout the planet to help expand consciousness--and explores how they were decommissioned after the Great Flood of prehistory. He reveals how the original builders of the pyramids foresaw humanity's fall from the Golden Age and strategically encoded these magnificent structures to wake humanity from the depths of the Dark Ages.
