**Everyday Life Science Mysteries** Richard Konicek-Moran,2013 How do tiny bugs get into oatmeal? What makes children look like-- or different from-- their parents? Where do rotten apples go after they fall off the tree? By presenting everyday mysteries like these, this book will motivate your students to carry out hands-on science investigations and actually care about the results. These 20 open-ended mysteries focus exclusively on biological science, including botany, human physiology, zoology, and health. The stories come with lists of science concepts to explore, grade-appropriate strategies for using them, and explanations of how the lessons align with national standards. They also relieve you of the tiring work of designing inquiry lessons from scratch. What makes this book so special is the unique way science is integrated into the story line, using characters and situations children can easily identify with. -- Page Keeley, author of the NSTA Press series Uncovering Student Ideas in Science

*Encyclopedia of Human Memory [3 volumes]* Annette Kujawski Taylor Ph.D.,2013-10-29 Providing clear, comprehensible information for general readers, this three-volume, A–Z encyclopedia covers the major theories and findings associated with our understanding of human memory and some of the crippling disorders associated with memory malfunction. This encyclopedia comprehensively addresses one of the most critical components of human intelligence—memory. Comprising approximately 500 A–Z entries written by experts who have studied memory and its impacts, the work defines complex terminology for lay readers and includes answers to the most common questions regarding human memory. Readers will gain an understanding of the various psychological and physiological systems of memory, such as short-term or procedural memory; comprehend the principles that underlie effective encoding, storage, and construction of memories; and learn the truth about often misconceptualized conditions like amnesia or how our memories are stored in bits and pieces rather than linearly like a recorded tape or video. This set is ideal for high school students writing term papers or studying for advanced examinations such as Advanced Placement (AP) in psychology. The volumes also provide a breadth of information invaluable to family members, friends, and caretakers of individuals who suffer from various memory disorders, including descriptions of major disorders, explanations of specific memory deficits, strategies for memory improvement, and information on the parts of the brain that access and store memory as well as the types of tests used to assess memory loss. Also included are biographies of key contributors to the field of cognitive psychology, and to the area of memory in particular.

Students will also appreciate the numerous illustrations and examples.

**Sensor-Actuator Supported Implicit Interaction in Driver Assistance Systems** Andreas Riener,2011-06-07 Andreas Riener studies the influence of implicit interaction using vibro-tactile actuators as additional sensory channels for car-driver feedback and pressure sensor arrays for implicit information transmission from the driver toward the vehicle. The results of his experiments suggest the use of both vibro-tactile notifications and pressure sensor images to improve vehicle handling performance and to decrease the driver's cognitive workload.

Who is a Normative Foreign Policy Actor? Daniel Sheldon Hamilton,2008 This book investigates Who is a normative foreign policy actor? It forms part of a new project intended to explore fundamental aspects of foreign policy at the global level, against the backdrop of a proliferation of global actors in the 21st century, following half a century with only one undisputed global hegemon: the United States. The European Union is itself a new or emerging foreign policy actor, driven by self-declared normative principles. But Russia, China and India are also increasingly assertive actors on the global stage and similarly claim to be driven by a normative agenda. The fundamental question explored is how will these various global actors define their foreign policy priorities, and how they will interact, especially if their ideas of normative behaviour differ?--BOOK JACKET.

The United States, India and the Global Nuclear Order Tanvi Pate,2018-06-13 In the Post-Cold War era, US nuclear foreign policies towards India witnessed a major turnaround as a demand for 'cap, reduce, eliminate' under the Clinton administration was replaced by the implementation of the historic 'civil nuclear deal' in 2008 by Bush, a policy which continued under Obama's administration. This book addresses the change in US nuclear foreign policy by focusing on three core categories of identity, inequality, and great power narratives. Building upon the theoretical paradigm of critical constructivism, the concept of the 'state' is problematised by focusing on identity-related questions arguing that the 'state' becomes a constructed entity standing as valid only within relations of identity and difference. Focusing on postcolonial principles, Pate argues that imperialism as an organising principle of identity/difference enables us to understand how difference was maintained in unequal terms through US nuclear foreign policy. This manifested in five great power narratives constructed around peace and justice; India-Pakistan deterrence; democracy; economic progress; and scientific development. Identities of 'race', 'political economy', and 'gender', in terms of 'radical otherness' and 'otherness' were recurrently utilised through these narratives to maintain a difference enabling the respective administrations to maintain 'US' identity as a progressive and developed western nation, intrinsically justifying the US role as an arbiter of the global nuclear order. A useful work for scholars researching identity construction and US foreign and security policies, US-India bilateral nuclear relations, South Asian nuclear politics, critical security, and postcolonial studies.

**Single Best Answer Questions for the Final FFICM** Keith Davies, Christopher Gough, Emma King, Benjamin Plumb, Benjamin Walton, 2016-12-22 This is the first dedicated revision aid for the Single Best Answer component of the Final FFICM, added to the written examination in July 2014. It contains 240 SBA practice questions, divided into eight papers covering the Faculty of Intensive Care Medicine curriculum. Each answer consists of a short explanation, allowing a quick review of the correct answer, and a long explanation, providing a more in-depth discussion of the question topic. All answers are also fully referenced, encouraging further reading and providing sources for more detailed study. In combination with the companion volume, Multiple True False Questions for the Final FFICM, this guide allows readers to access full written mock exams in the style and format of the official FFICM examination, and is an invaluable resource for trainees in intensive care medicine.

**East Sails West** Stephen Davies, 2013-12-01 In December 1846, the Keying, a Chinese junk purchased by British investors, set sail from Hong Kong for London. Named after the Chinese Imperial Commissioner who had signed away Hong Kong to the British, manned by a Chinese and European crew, and carrying a travelling exhibition of Chinese items, the Keying had a troubled voyage. After quarrels on the way and a diversion to New York, culminating in a legal dispute over arrears of wages for Chinese members of the crew, it finally reached London in 1848, where it went on exhibition on the River Thames until 1853. It was then auctioned off, towed to Liverpool, and finally broken up. In this account of the ship, the crew and the voyage, Stephen Davies tells a story of missed opportunities, with an erratic course, overambitious aims, and achievements born of lucky breaks—a microcosm, in fact, of early Hong Kong and of the relations between China and the West.

*Clinical Skills in Treating the Foot* Warren Turner, Linda M. Merriman, 2005-08-30 The eagerly awaited new edition of Clinical Skills in Treating the Foot has been revised and updated with the needs of a broad range of health professionals in mind. For anyone treating patients with foot disorders, Clinical Skills in Treating the Foot will provide invaluable support through three key areas: Section 1 is concerned with the general principles of managing foot disorders and the context in which treatment of the foot takes place. Included are chapters on treatment planning, evidence based practice, governance and audit, clinical protocols, clinical emergencies and health promotion. Section 2 examines the application of clinical therapeutics to foot disease and includes chapters on operative techniques, surgery and the foot, pharmacology, physical therapy, mechanical therapeutics, chairside devices, prescription devices and footwear therapy. Section 3 considers the particular needs of special groups and includes chapters on the adult foot, the child's foot, sports injuries and management of tissue viability. With its clarity of text and liberal use of case studies and illustrations, the latest edition of Clinical Skills will be required reading for practising and student podiatrists. It will also be a valuable reference and guide for all others involved in the provision of treatment of the foot. This book has been written as a companion volume to the editors' Assessment of the Lower Limb, also published by Elsevier Churchill Livingstone. Written by an experienced team of clinicians who also understand the needs of students as well as practitioners Logical and clear structure makes it easy to use for both clinicians and students Each chapter is self-contained and can be used for independent reading topics Case histories and clinical comment sections illustrate important clinical points Key points and summaries provides assistance for learning and review Features approximately 400 illustrations Half of the contributors are new - more experienced clinicians than those used for the previous edition New chapter by new author on Clinical Governance (replacing old chapter of Audit and Outcome Measurement) Major revision by new authors of chapter on Treatment Planning to reflect new developments and changes in practice Completely rewritten chapter by new authors on Clinical protocols Major revision by new author of the chapter on Foot health education and promotion Major rewrite with new author of the chapter on Pharmacology which will have expanded sections on topical and injected steroids and prescription medicines. **Teaching Anti-Fascism** Michael Vavrus, 2022 This timely book examines how fascist ideology has taken hold among certain segments of American society and how this can be addressed in curriculum and instruction. Vavrus presents middle, secondary, and college educators and their students with a conceptual framework for enacting a critical multicultural pedagogy by analyzing discriminatory discourse and recommending civic anti-fascist steps people can take right now. For teacher education programs and policymakers, anti-fascist civic assessment rubrics are provided. To help clarify contemporary debates over what can be taught in public schools, an advance organizer highlights contested and misunderstood terminology. Featuring historical and contemporary patterns of fascist politics, this accessible text is organized in four parts: "Good Trouble," Unpacking Ideological Orientations, Indicators of Colonial Proto-Fascism and U.S. Fascist Politics, and An Anti-Fascist "Reading the World." Readers will come away with a deeper knowledge base that marshalls a century of anti-fascist actions in response to contemporary acts of racism, anti-Semitism, Islamophobia, gender and sexuality discrimination, bias against Latinx and migrant populations, and other actions that undermine our democracy and harm marginalized students and their families and communities. Book Features: A groundbreaking framework for incorporating anti-fascist pedagogical concepts into multicultural education Descriptions of common characteristics of historical fascism, far-right extremism, and anti-fascism. Anti-fascist assessment rubrics for teacher educators. Guidance to assist classroom teachers in contextualizing current anti-democracy events. Recommended and annotated anti-fascist background readings informed by critical, theoretical, and intersectional perspectives.

*Competing Visions of India in World Politics* K. Sullivan,2015-07-06 This edited collection presents an alternative set of reflections on India's contemporary global role by exploring a range of influential non-Western state perspectives. Through multiple case studies, the contributors gauge the success of India's efforts to be seen as an alternative global power in the twenty-first century.

**TERRORISM: COMMENTARY ON SECURITY DOCUMENTS VOLUME 144** Douglas Lovelace Jr.,2016-09-05 Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 144, Autonomous and Semiautonomous Weapons Systems, examines the impact of robots and autonomous and semiautonomous weapons systems on the waging of modern warfare. It considers the likely effects of emerging technological innovations in this area from both a political and strategic standpoint, in addition to considering the implications of such technologies within the context of the law of armed conflict and international humanitarian law. This volume is divided into three sections: (1) U.S. policy and approaches to the use of autonomous and semiautonomous weapons systems; (2) U.S. armed forces use of such weapons systems; and (3) potential terrorist use of such weapons systems. Official policy documents from the DoD and the U.S. Army and Air Force are complemented by reports from the Strategic Studies Institute/Army War College Press and other U.S. military sources.
