Youth Drinking Cultures Margaretha Järvinen, Robin Room, 2017-03-02 How can 'binge drinking' be explained and understood? Is alcohol consumption related to the particular cultural characteristics of some European countries? Should heavy drinking cultures be seen as a mainstream youth phenomenon or as marginal - and is this different in different countries? A team of leading researchers addresses these questions and more in their analysis of the alcohol consumption patterns of European young people. Alcohol consumption is an important marker of transition from childhood to early adulthood, yet the timing, intensity and purpose of adolescent drinking varies dramatically between countries. The contributors provide cross-national comparisons to investigate how drinking behaviour varies, examining factors such as gender, societal context and family socio-economic backgrounds. Youth Drinking Cultures offers a comprehensive set of perspectives on adolescent drinking in Europe. In linking issues around social identity and the life-course with a highly topical area of media and policy concern, the book will be of great value to sociology and social policy scholars, especially youth researchers, and also to professionals working with young people.

One Country, Two Systems Kam C. Wong, 2017-07-28 The legal issues evoked by cross-border crime in Hong Kong and China are sparse and what does exist is mostly in Chinese. This book provides the first systematic, comprehensive, and in-depth analysis of how Chinese, British, Hong Kong, and international law were applied in the Big Spender case. Kam C. Wong outlines the respective positions of various parties to the dispute. Part of the case's fascination involves competing interests, and that political clout counted for more than legal theory. Big Spender may be little known outside Hong Kong and China, but he made history there. It was the first time a Hong Kong legal resident had been prosecuted, tried, and ultimately executed in China for acts largely perpetrated in Hong Kong. The case tested the limits of the one-country, two-systems approach under which Hong Kong and China coexist. It also forced politicians, government officials, and the public in both Hong Kong and China to come to terms with the legal and policy issues related to cross-border crime. Wong sees the Big Spender case as making clear the dire need for both sides to find workable solutions to concurrent jurisdiction, police cooperation, and judicial assistance. Until there is an acceptable arrangement governing the rendition of offenders between Hong Kong and mainland China, the one-country, two-systems formula cannot be stabilized. This is a case study in large-scale terms.

It's Not You Ramani Durvasula PhD, 2024-02-20 INSTANT NEW YORK TIMES BESTSELLER From clinical psychologist and expert in narcissistic relationships Dr. Ramani Durvasula, a guide to protecting and healing yourself from the daily harms of narcissism AN OPEN FIELD PUBLICATION FROM MARIA SHRIVER It's not always easy to tell when you're dealing with a narcissistic person. One day they draw you in with their charm and charisma, the next they gaslight you, wreck your self-esteem, and leave you wondering, What should I have done differently? As Dr. Ramani explains in It's Not You, the answer is: absolutely nothing. Just as a tiger can't change its stripes, a narcissist will not stop manipulating and invalidating you, no matter how much you try to appease them. The first step toward healing from their toxic influence—and to protect yourself from future harm—is to accept that you are not to blame for their behavior. Drawing on more than two decades of studying the landscape of narcissism and working with survivors, Dr. Ramani explores how narcissists hijack our well-being and offers a healing path forward. Unpacking the oft-misunderstood personality, she reveals the telltale behavioral patterns that indicate you may be dealing with a narcissist. Along the way, you'll learn how to become gaslight resistant, chip away at the trauma bonds that keep you stuck in the cycle, grieve the loss of these painful relationships, create and maintain realistic

boundaries, discern unhelpful behaviors from narcissistic behaviors, and recover your sense of self after constant invalidation. Thriving after, or even during, a narcissistic relationship can be challenging, but *It's Not You* shows you it is possible. Dr. Ramani invites you to stop blaming yourself and trying to change the narcissistic person, and to start giving yourself permission to let go of their hold on you and finally embrace your true self.

Intranet Performance Management Kornel Terplan, 2022-01-27 To avoid serious bottlenecks, components of the Internet and of intranets—such as servers, browsers, and the access networks—must be properly designed, implemented, managed, and monitored. Beginning with the basics, *Intranet Performance Management* sets forth the standards, methods, and tools that can simplify and unify systems and network management, avoid the seemingly inherent problems associated with them, and contain costs. In this book, world renowned expert Kornel Terplan addresses: Proactive server, browser, and access network monitoring Managing and authoring home page content Traffic management and load balancing in the access networks Reviewing and evaluating usage statistics using log files These tasks—essential to the success of an intranet—require the active and diligent work of the management team. Effective performance of these tasks allows for the use of inexpensive browsers, facilitates education, and improves Internet culture and scalability.

The Protein Myth David Gerow Irving, 2011-09-30 The Protein Myth illustrates how we can avoid the major killer diseases by eliminating animal products from the diet. It challenges the healthcare establishment to stop ignoring the scientific evidence that a diet based on animal protein costs millions of lives. For example, why do the National Cancer Institute and the American Cancer Society turn a blind eye to the scientific facts that avoiding animal protein could prevent many women from getting breast cancer by lowering their oestrogen levels? The book links the Western diet to major problems facing the world such as 1) animal cruelty on factory farms, 2) the pollution of our atmosphere, rivers and streams, 3) obesity in children, 4) the needless vivisection of animals at university laboratories for the purpose of getting billions of tax dollars from the public, 5) the manufacture of drugs to treat counterfeit diseases, and 6) the creation of poverty in the developing world. The Protein Myth makes a compelling case that the way to a healthier life and a better world is to end our abuse and exploitation of animals.

Night Hunters William Pace Head, 2014-03-18 In *Night Hunters*, air power historian William P. Head provides the first detailed study of the development and deployment of the AC-130 gunship. While other airframes and other types of close air support (CAS) and interdiction weapon systems preceded or flew with the AC-130s, this four-engine cargo airframe proved to be not only the longest serving fixed-wing gunship but also the most effective by far. During the Vietnam War, the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features, the difficult climate, and the shifting diplomatic context. One of the most important was the development of the AC-130. Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam-era fixed-wing gunship and the only one that continues to fly missions in the twenty-first century. In addition, it employed many of the most advanced weapons, sensors, targeting devices, and fire control systems of the 1970s or of any era. By recounting both the technical development and the combat operations of the plane, and by looking at the proposed alternatives for its use in the War on Terror, *Night Hunters* offers a clear view of the role of gunships and of close air support in US wars. In today's never-ending brushfire wars, the AC-130s continue to uphold their reputation for excellence.

The Politics of Green Transformations Ian Scoones, Melissa Leach, Peter Newell, 2015-01-09 Multiple 'green transformations' are required if humanity is to live sustainably on planet Earth. Recalling past transformations, this book examines what makes the current challenge different, and especially urgent. It examines how green transformations must take place in the context of the particular moments of capitalist development, and in relation to particular alliances. The role of the state is emphasised, both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations. The book also highlights the role of citizens, as innovators, entrepreneurs, green consumers and members of social movements. Green transformations must be both 'top-down', involving elite alliances between states and business, but also 'bottom up', pushed by grassroots innovators and entrepreneurs, and part of wider mobilisations among civil society. The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability. Written by experts in the field, this book will be of great interest to researchers and students in environmental studies, international relations, political science, development studies, geography and anthropology, as well as policymakers and practitioners concerned with sustainability.

Jihad and International Security J. Roshandel, S. Chadha, 2006-10-27 This book explores the global jihad movement and its emergence in the latter half of the twentieth century. Roshandel and Chadha investigate the nature and extent of this threat, tracing its religious and ideological roots, relevant history, and its goals.

Traffic Paul Josephson, 2017-03-09 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Speed. Bump. Speed. Traffic considers the history and philosophy of roundabouts, speed bumps, the pedestrian mall, and other efforts to manage traffic. Exploring ways to reign in the power of the internal combustion engine, ramp back century-long efforts to increase the flows of traffic, and establish greater balance between humans and machines, Paul Josephson considers the history of traffic, and the political and other controversies that frame the belated technological efforts to calm it. Object Lessons is published in partnership with an essay series in The Atlantic.

Nurse Practitioners Dr. Eileen Sullivan-Marx PhD, CRNP, RN, FAAN, Diane McGivern PhD, MA, BSN, Julie Fairman PhD, RN, FAAN, Sherry Greenberg MSN, BN, GNP-BC, 2010-04-20 Named a 2013 Doody's Core Title! This excellent book highlights the development of the nurse practitioner movement. The current state of practice is defined and the potential growth of the role is explored. The important issues influencing the continued development of the nurse practitioner role are clearly presented and reviewed. This update is needed in light of the ever-evolving healthcare arena. Score: 100, 5 stars --Doody's there are plenty of lessons to be learned not only from the experiences and insights of these authors, but also principles and practices which they have found to be patient-centered, effective, efficient, and economical. -Loretta C. Ford, EdD, RN, PNP, FAAN, FAANP (From the Foreword) This fifth edition discusses the evolution and future of advanced practice nursing, primarily for APN faculty and APN/NP practitioners as well as for leaders and administrators in education. Fully updated and expanded, the book comprehensively describes the historical, social, economic, and global contexts of advanced practice nursing. The team of expert contributors provides a wealth of insight into key issues of the

day, such as the mechanics of financial recognition of NPs, the effects of managed care, and the globalization of advanced practice models. The new edition also presents a fresh perspective on the role of nurse practitioners in both small- and large-scale reform initiatives-such as health promotion, disease management, the rapid spread of global disease, and the diminished economic capacity of many countries to meet standards for health care. Enriched with case studies, key principles, and best practices, this book is a must-have for all those invested in the current and future status of advanced practice nursing. Key topics include: ilPublic relations strategies ilNurse-managed health centers ilAdult health and gerontology care ilBusiness, policy, and politics: success factors for practice ilGlobal health, international developments, and future challenges

Space Supporting Africa Annette Froehlich, André Siebrits, Christoffel Kotze, 2020-12-19 This book addresses the need to support decision-makers across Africa by promoting awareness of the importance of space technologies and data to African development through the presentation of existing examples where space supports education and healthcare, and by making recommendations for further roll-out of these efforts. This is necessary because of the enduring misconception that space-related research and expenditure competes with other, more pressing, needs on the continent, when in truth space can play a major role in meeting these needs. Accordingly, the book unpacks the United Nations Sustainable Development Goals (SDGs) 2030 and the critical needs they address in the African context. Secondly, it provides an analysis of the African higher education landscape and considers the network of higher education-related SDGs, their targets, and their indicators. Africa's own development plan, Agenda 2063, is also explored. The African higher education landscape is then assessed by way of three models - the Space-Education Equation (SEE), the Benefits to Education by Space Transection (BEST), and the Enhanced Education for Sustainable Development Access and Success (EESDAS) model. The critical role of educational technologies and e-learning in bridging the educational access and success gap is appraised, as is the role of the space sector, and its technologies, applications, and data in African higher education. Finally, it explores e-health and provides an analysis of pertinent technologies required by e-health, past and present, and the opportunities and challenges it presents. Space technology can play a critical role in eliminating the barriers that are currently preventing e-health from playing a more significant role in a developing region such as sub-Saharan Africa.

Where Now, O Biologists, is Your Theory? Andrew P. Porter, 2006-03-31 Intelligent Design creationism faults evolutionary biology for being ``naturalistic," but ID is in its own strange way just as naturalistic. Like the man who can't find his car-keys at night and looks for them under a street-light, though he last saw the keys someplace else, intelligent design creationism seeks acts of God within the gaps in our scientific knowledge. Creation takes the goodness of this world on faith, but Creationism works to get out of the challenge of the doctrine of creation, not to embrace it.
