Democracy in Southern Europe Isabelle Calleja Ragonesi,2019-02-28 How have Malta and Cyprus - both EU members - transitioned from colonial island states to independent democracies? With the assistance of primary documentation this book traces the difficult path of these two states to becoming independent liberal democracies by using the pathway of democratization through decolonization. Using socio-economic and political data, analysed through the microscope of political science and international relations theories, Isabelle Calleja Ragonesi charts the progress of the two islands in the context of a number of four distinct phases. Firstly decolonization, independence and achieving the status of procedural democracies; secondly post-colonial independence consolidating democracy and regime breakdown; thirdly sovereign nation-state status and second attempts at consolidating democracy and finally attempting to reach substantive democracy status and EU membership. The study of these two states is contextualized within the context of democratization in Southern Europe and the cases of Malta and Cyprus provide new insights on the region for scholars of political science and international institutions.

Contemporary Israel Robert O Freedman,2018-05-04 This book provides the reader with a balanced understanding of both the dynamism and the complexity of Israeli politics. It is devoted to Israel's domestic politics which includes right-wing and left-wing parties, Israel's main interest-group parties, Israeli security and foreign policy issues.

Religious Education at Schools in Europe Martin Rothgangel, Martin Jäggle, Thomas Schlag, 2015-11-18 The project Religious Education at Schools in Europe (REL-EDU), which is divided up into six volumes (Central Europe, Western Europe, Northern Europe, Southern Europe, South-Eastern Europe, Eastern Europe), aims to research the situation with regard to religious education in Europe. This volume outlines the organisational form of religious education in the countries of Central Europe (Austria, Croatia, Czech Republic, Germany, Hungary, Poland, the Principality of Liechtenstein, Slovakia, Slovenia and Switzerland). This is done on the basis of thirteen key issues, which allows specific points of comparison between different countries in Europe. Thereby the volume focusses the comparative approach and facilitates further research into specific aspects of the comparison.

Mental Health and Addiction Care in the Middle East Richard Isralowitz, Patricia A. Findley, 2016-11-21 This ambitious resource describes innovative intervention programs for treating substance abuse and other mental health problems in the Middle East in the context of larger issues in the region. Deftly combining clinical acumen with in-depth knowledge of sociopolitical currents, contributors present data and analysis on similarities and differences within the region, addiction issues in special populations (youth, mothers, immigrants), and the efficacy of local and international initiatives. New trends in evidence-based responses, including mental health services in war and disaster, are related to the larger goals of promoting peace. To that end, the editors go beyond the concept of shared problems to discuss strategies toward shared solutions, most notably psychological first aid as a healing approach to mediation. Among the topics covered: Drug abuse in the Middle East: promoting mutual interests through resistance and resilience. Toward uniform data collection and monitoring of Israeli and Palestinian adolescent drug use. Substance abusing mothers: toward an understanding of parenting and risk behavior. Immigration, acculturation, and drug use. Psychological first aid: a tool for mitigating conflict in the Middle East. Collaborative approaches to addressing mental health and addiction. For health psychologists, psychiatrists, clinical social workers, and addiction counselors, *Mental Health and Addiction Care in the Middle East* demonstrates the deep potential for mental health and social issues to be addressed to benefit all communities involved.

Educating Adolescents Around the Globe Meike Watzlawik, Alina Burkholder, 2020-05-04 By traveling to different parts of the world, this book provides a multidisciplinary perspective on the current state of adolescent education and demonstrates how education systems are formed by and closely tied to culture. After establishing a theoretical background, the book delves into the particulars of adolescent education and its associated challenges in six countries (India, Kenya, Germany, Brazil, Japan, and Denmark). In tandem with the discussion of institutions, the stories of those who are all too often underserved or left behind are told. Despite the diversity of each education system, the investigation reveals several unifying themes that transcend the specific contexts. The lessons from each example are woven together to demonstrate how the individualized needs of students can best be met, in a vision for the future of educating adolescents.

Wireless Multimedia Network Technologies Rajamani Ganesh, Kaveh Pahlavan, Zoran Zvonar, 2006-04-18 This book is a collection of invited papers that were presented at the Ninth IEEE International Symposium on Personal, Indoor and Mobile Radio Communications, September 5-8, 1998, Boston, MA. These papers are meant to provide a global view of the emerging third-generation wireless networks in the wake of the third millennium. Following the tradition of the PIMRC conferences, the papers are selected to strike a balance between the diverse interests of academia and industry by addressing issues of interest to the designers, manufacturers, and service providers involved in the wireless networking industry. The tradition of publishing a collection of the invited papers presented at the PIMRC started in PIMRC'97,

Helsinki, Finland. There are two benefits to this tradition (1) it provides a shorter version of the proceedings of the conference that is more focused on a specific theme (2) the papers are comprehensive and are subject of a more careful review process to improve the contents as well as the presentation of the material, making it more appealing for archival as a reference book. The production costs of the book is subsidized by the conference and the editors have donated the royalty income of the book to the conference.

Managing Diversity through Non-Territorial Autonomy Tove Malloy, Alexander Osipov, Balázs Vizi, 2015-07-23 Non-territorial autonomy (NTA) is a statecraft tool that is increasingly gaining importance in societies seeking to accommodate demands by ethno-cultural groups for a voice in cultural affairs important to the protection and preservation of their identity, such as language, education, and religion. As states recognize the specific rights of identity minorities in multicultural and multi-ethnic societies, they are faced with a need to improve their diversity management regimes. NTA offers policy-makers a range of options for institutional design adaptable to specific circumstances and historical legacies. It devolves degrees of power through legal frameworks and institutions in specific areas of ethno-cultural life, while maintaining social unity at the core level of society. Throughout Europe and North America, NTA exists and is implemented at a state, regional, and local level. Much has been written about the concept of autonomy and its usage as a statecraft tool in states facing regional division, but little literature addresses its non-territorial institutional and public administration functions. This edited volume seeks to fill this gap. Managing Diversity through Non-Territorial Autonomy: Assessing Advantages, Deficiencies, and Risks, carves a space for contextual knowledge production on NTA in law, as well as social and political sciences. Contextual knowledge involves a description of institutions and their functionality as well as of the institutional and legal frames protecting these. What are the institutions, bodies, and functions that ethno-cultural groups can draw on when seeking to have a voice over their own affairs, as well as over issues in society related to their identity production? How are these entities incorporated and empowered to have a voice? What degree of voice do they have, and how are they designed to project this voice? Thus, contextual knowledge also involves critical assessment and risk analysis as well as penetrating insights as to the unintended consequences and hidden agendas that may inform NTA policies. This volume is to provide both policy-makers and ethno-cultural groups with a tool-kit that promotes social cohesion while respecting diversity. This is the first volume in a series of five which will examine the protection and representation of minorities through non-territorial means.

EPA's 2008 Report on the Environment ,2008 [The report]... provides the American people with an important resource from which they can better understand trends in the condition of the air, water, land, and human health of the United States. This report uses scientifically sound measures, called indicators, to address fundamental questions relevant to the EPA's mission to protect the environment and human health. To accomplish its mission to protect human health and the environment, EPA must pay close attention to trends in the condition of the Nation's environment. This kind of information, which is captured in EPA's 2008 ROE, can help EPA to prioritize its work and to focus on human health and ecological activities that can lead to improvements in the conditions of the Nation's environment.

The Internet Playground Ellen Seiter, 2005 Based on four years of experience teaching computers to 8-12 year olds, media scholar Ellen Seiter offers parents and educators practical advice on what children need to know about the Internet and when they need to know it. The Internet Playground argues that, contrary to the promises of technology boosters, teaching with computers is very difficult. Seiter points out that the Internet today resembles a mall more than it does a library. While children love to play

online games, join fan communities, and use online chat and instant messaging, the Internet is also an appallingly aggressive marketer to children and, as this book passionately argues, an educational boondoggle.

Smart and Sustainable Power Systems João P. S. Catalão, 2017-12-19 The smart grid initiative, integrating advanced sensing technologies, intelligent control methods, and bi-directional communications into the contemporary electricity grid, offers excellent opportunities for energy efficiency improvements and better integration of distributed generation, coexisting with centralized generation units within an active network. A large share of the installed capacity for recent renewable energy sources already comprises insular electricity grids, since the latter are preferable due to their high potential for renewables. However, the increasing share of renewables in the power generation mix of insular power systems presents a significant challenge to efficient management of the insular distribution networks, mainly due to the variability and uncertainty of renewable generation. More than other electricity grids, insular electricity grids require the incorporation of sustainable resources and the maximization of the integration of local resources, as well as specific solutions to cope with the inherent characteristics of renewable generation. Insular power systems need a new generation of methodologies and tools to face the new paradigm of large-scale renewable integration. *Smart and Sustainable Power Systems: Operations, Planning, and Economics of Insular Electricity Grids* discusses the modeling, simulation, and optimization of insular power systems to address the effects of large-scale integration of renewables and demand-side management. This practical book: Describes insular power systems, renewable energies, uncertainty, variability, reserves, and demand response Examines state-of-the-art forecasting techniques, power flow calculations, and scheduling models Covers probabilistic and stochastic approaches, scenario generation, and short-term operation Includes comprehensive testing and validation of the mathematical models using real-world data Explores electric price signals, competitive operation of distribution networks, and network expansion planning *Smart and Sustainable Power Systems: Operations, Planning, and Economics of Insular Electricity Grids* provides a valuable resource for the design of efficient methodologies, tools, and solutions for the development of a truly sustainable and smart grid.

Diaspora Entrepreneurs and Contested States Maria Koinova, 2021 Résumé de l'éditeur : This book develops a novel understanding of four types of diaspora entrepreneurs based on their linkages to de facto states and different global contexts, and a theory about their interactions with host-land foreign policies, homeland governments, parties, non-state actors, critical events, and limited global influences

Surveillance and Crime Roy Coleman, Michael McCahill, 2010-10-15 Surveillance has a long-standing relationship with crime and its identification, prevention, detection and punishment. With information on each citizen spanning up to 700 databases, and over 4 million CCTV cameras in the United Kingdom alone, this book explores how new technologies have given rise to new forms of monitoring and control. Offering a comprehensive understanding of the relationship between surveillance, crime and criminal justice, this book explores: the development of surveillance technologies within a broad historical context how new surveillance technologies are shaped by existing social relations, political practices, cultural traditions and organizational contexts the implications of the use of surveillance in responding to crime (including biometrics, DNA samples and electronic monitoring) how 'new' surveillance technologies reinforce 'old' social divisions - particularly along the lines of class, race, gender and age. The book draws upon

theoretical debates from a range of disciplines to shed light on this topical subject. Engaging and authoritative, this is an important read for advanced students and academics in criminology, criminal justice, social policy and sociology. The Key Approaches to Criminology series celebrates the removal of traditional barriers between disciplines and, specifically, reflects criminology's interdisciplinary nature and focus. It brings together some of the leading scholars working at the intersections of criminology and related subjects. Each book in the series helps readers to make intellectual connections between criminology and other discourses, and to understand the importance of studying crime and criminal justice within the context of broader debates. The series is intended to have appeal across the entire range of undergraduate and postgraduate studies and beyond, comprising books which offer introductions to the fields as well as advancing ideas and knowledge in their subject areas.

Engaging the Past Elizabeth George, 2024-02-14 This book presents a variety of strategies to help teachers rethink their relationship to the content and their students. Each chapter explains an active learning approach, practical steps for how to put the approach into practice, and ideas for how teachers can customize the strategy.
