Politics as Usual Michael Margolis, David Resnick, 2000-01-24

Cyberspace is no longer a mystery. It has become irrevocably intertwined with everyday life, facilitating everything from reading the news and paying the bills to ordering birthday presents. We are in the midst of a revolution in mass communication, and there now exists the technology for creating new forms of community, empowering citizens, and challenging existing power structures. But will such changes occur? In this fascinating book Michael Margolis and David Resnick ponder the effects of cyberspace on American Politics. Our political system tends to normalize political activity, and thus, the Internet's vast potential could be lost, rendering it just another purveyor of ignored information. This broad examination begins with a history of cyberspace and moves through discussions of parties, political interest groups, candidates, mass media, information dissemination, and commercial uses of the Internet. *Politics as Usual* offers an innovative and exciting look into previously ignored aspects of the Internet and American politics.

Judicial Reform and Reorganization in 20th Century Iran Majid Mohammadi, 2013-05-13 Iran is now at the center of political and social developments in the Middle East. This book examines the reform of the judicial system in 20th century Iran and is the first to relate state-building process with rule of law promotion and judicial reform in the region. This subject occupies the critical juncture of three developments in the contemporary study of Iranian society as an important and early case of social revolution and reform in the Middle East: the state-building process in a non-Western country throughout the 20th century, the incorporation of a non-Western Muslim country

into the Western legal framework through codification and transplantation (1911-1979), and the Islamicization process after this critical social development and the Islamic Revolution of 1979. This exceptional study furthers our understanding of Iranian modern history as well as the democratization process, human rights and rule of law issues in the Middle East.

Security and Environment in the Mediterranean Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists, peace researchers, environmental scholars, demographers as well as climate, desertification, water, food and urbanisation specialists from the Middle East and North Africa, Europe and North America review security and conflict prevention in the Mediterranean. They also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South. The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II, the Gulf War, the Balkan wars and the Middle East conflict. It also examines factors of global environmental change: population growth, climate change, desertification, water scarcity, food and urbanisation issues as well as natural disasters. Furthermore, it draws conceptual conclusions for a fourth phase of research on human and environmental security and

peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century.

They have assembled renowned researchers as authors for 29 chapters to cover individual aspects of human injury assessment and prevention.
