E-Commerce and Intelligent Methods Javier Segovia,Piotr S. Szczepaniak,Marian Niedzwiedzinski,2013-06-05 This book covers significant recent developments in the field of Intelligent Methods applied to eCommerce. The Intelligent Methods considered are mainly Soft Computing Methods that include fuzzy sets, rough sets, neural networks, evolutionary computations, probabilistic and evidential reasoning, multivalued logic, and related fields. There is not doubt about the relevance of eCommerce in our daily environments and in the work carried out at many research centers throughout the world. The application of AI to Commerce is growing as fast as the computers and networks are being integrated in all business and commerce aspects. We felt that it was time to sit down and see how was the impact into that field of low-level AI, i.e. softcomputing. We found many scattered contributions disseminated in conferences, workshops, journal, books or even technical reports, but nothing like a common framework that could serve as a basis for further research, comparison or even prototyping for a direct transfer to the industry. We felt then the need to set up a reference point, a book like this. We planned this book as a recompilation of the newest developments of researchers who already made some contribution into the field. The authors were selected based on the originality and quality of their work and its relevance to the field. Authors came from prestigious universities and research centers with different backgrounds.

So You Think You Know About Britain? Danny Dorling,2011-03-17 When it comes to immigration, the population explosion, the collapse of the family, the north-south divide, devolution, or the death of the countryside, common wisdom tells us that we are in trouble; however, this is far from the truth. In his brilliant anatomy of contemporary Britain, leading geographer Daniel Dorling dissects the nation and reveals unexpected truths about the way we live today, contrary to what you might read in the news: The human mosaic: Most children who live above the fourth floor of tower blocks in England are Black or Asian. The higher you go in a building, the darker skinned children tend to be. Relationships: The more times a person's heart is broken, the nearer they will tend to move to the sea. If you want to find a good man to marry head for the countryside. North and South: People in the south move home on average every seven years and job every eight years. This is a year faster than in the north of England, but a year slower than is usual in Scotland. Optimum population: Immigrant nation - There are twice as many grandchildren of British-born people living over-seas as there are people living in Britain who have grandparents who were themselves born abroad. The problem now is more about getting pregnant than a population explosion and we need more immigration not less. Immigration: Muslims are far more likely to marry non-Muslims in Britain than Christians are to marry non-Christians. The elderly: Most people in Britain never live long enough to experience being burgled. In some areas you would have to live for over five hundred years to have an 'evens' chance of being a crime victim. Town and Country - divided since the enclosures: Step children are most commonly found in the most leafy of idyllic rural villages. Nuclear family homogeneity is now an inner city phenomena. Why are there no cheap homes in the countryside any more? Transport: The greatest threat to life in Britain of all those aged under 40 is the car. For adults aged over 24 they most likely die as a driver, over 15 as a passenger, and

over age 4 as a pedestrian. Work: There is no need for us to work until we drop - all could retire early. Reviews for Injustice: A geographer maps the injustices of Selfish Capitalism with scholarly detachment. --Oliver James. Dorling provides the brain-cleaning software we need to begin creating a happier society. --Richard Wilkinson author of The Spirit Level.

Stepping Out of the Brain Drain Michele R. Pistone,John J. Hoeffner,2007-05-30 Catholic social teaching's traditional opposition to 'brain drain' migration from developing to developed countries is due for a reassessment. Stepping Out of the Brain Drain provides exactly this, as it demonstrates that both the economic and the ethical rationales for the teaching's opposition to 'brain drain' have been undermined in recent years, and shows how the adoption of a less critical policy could provide enhanced opportunities for poor countries to accelerate their economic development.
