A Collection of Hieroglyphs Francis Llewellyn Griffith,1898

Adoring Outlander Valerie Estelle Frankel,2016-02-03 What is behind Outlander fever--the hit television drama's popularity? Is it author Diana Gabaldon's teasing posts on social media? Is it the real history reimagined? The highly emotional melodrama? Or is it the take-charge heroine and the sweet hero in a kilt? One of the show's biggest draws is its multigenre appeal. Gabaldon--whose Outlander novels form the basis of the series--has called it science fiction, fantasy, romance, historical fiction and military fiction, depending on her audience. This collection of new essays explores the series as a romance, a ghost story, an epic journey, a cozy mystery, a comedy of manners, a gothic thriller and a feminist answer to Game of Thrones, and considers the source of its broad appeal.

Hispano-Arabic Literature and the Early Provençal Lyrics J. A. Abu-Haidar,2013-12-16 As the distinctive contribution of Islamic Spain to Arabic literature, the strophic muwashshah and zajal are still viewed by some as a development from putative Romance prototypes. No less than seven theories of origin of the Provençal lyrics have been proffered, foremost among them being the Arabic origins theory. This book lets the strophic muwashshah tell its own tale of a natural development in the context of classical Arabic literature.

Digital Decision Making Ray Corrigan,2007-07-05 Since the mid 1990s, when the general public began using the Internet, governments and commerce have made vast investments in digital communications technology. There has been confusion and sometimes controversy over these, for example the proposed UK identity card system. The far-reaching commercial and social implications of decisions made in invisible or opaque specialist fields should concern every citizen. This book argues that decisions should be based on an understanding of the systems, technology and environment within which they operate; that experts and ordinary people should work together; and that technology and law are evolving in restrictive rather than enabling ways.

Open Access Peter Suber,2012-07-20 A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work “open access”: digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

New Perspectives on Creating Web Pages with HTML Patrick Carey,1998

Mythologies ,

Ancient Records of Egypt: Indices James Henry Breasted,1907

Making Saints in Modern China David Ownby,Vincent Goossaert,Ji Zhe,2016-11-01 Sainthood has been, and remains, a contested category in China, given the commitment of China's modern leadership to secularization, modernization, and revolution, and the discomfort of China's elite with matters concerning religion. However, sainted religious leaders have succeeded in rebuilding old institutions and creating new ones despite the Chinese government's censure. This book offers a new perspective on the history of religion in modern and contemporary China by focusing on the profiles of these religious leaders from the early 20th century through the present. Edited by noted authorities in the field of Chinese religion, Making Saints in Modern China offers biographies of prominent Daoists and Buddhists, as well as of the charismatic leaders of redemptive societies and state managers of religious associations in the People's Republic. The focus of the volume is largely on figures in China proper, although some attention is accorded to those in Taiwan, Hong Kong, and other areas of the Chinese diaspora. Each chapter offers a biography of a religious leader and a detailed discussion of the way in which he or she became a saint. The biographies illustrate how these leaders deployed and sometimes retooled traditional themes in hagiography and charismatic communication to attract followers and compete in the religious marketplace. Negotiation with often hostile authorities was also an important aspect of religious leadership, and many of the saints' stories reveal unexpected reserves of creativity and determination. The volume's contributors, from the United States, Canada, France, Italy, China, and Taiwan, provide cutting-edge scholarship. Taken together, these essays make the case that vital religious leadership and practice has existed and continues to exist in China despite the state's commitment to wholesale secularization.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
